

# Innovative Surface Structures\_ Technology and Applications

Martin Bechthold

Taylor & Francis  
Taylor & Francis Group

# Contents

Acknowledgments	vi
<b>PART I Surface architecture</b>	<b>1</b>
1 Lightweight design – new directions	2
2 The quest for thinness	16
<b>PART II Membrane structures</b>	<b>47</b>
3 Types and structural behavior	48
4 Form-finding and analysis	64
5 Materials and fabrication	81
<b>PART III Rigid surfaces</b>	<b>99</b>
6 Form and structure	100
7 From concepts to constructs	124
8 Material and construction approaches	144
<b>PART IV Perspectives</b>	<b>197</b>
9 Emerging material technologies and systems	198
10 Towards a new architecture of structural surfaces	217
Bibliography	223
Index	225
Illustration credits	231
