Contents

PREFACE vii

ACKNOWLEDGMENTS ix

CHAPTER	I. Introduction	1
CHAPTER	II. Approaches to Energy Use Modeling	
	1. Issues in Simulation Model Design	4
	2. The Problem of Modeling Residential Energy Consumption	19
CHAPTER	III. Residential Energy Demand Simulation Models	
	1. Historical Developments	41
	2. The Oak Ridge National Laboratory Model	45
	3. The Residential End-Use Energy Planning System	61
	4. A Methodological Comparison	107
CHAPTER	IV. Residential Energy Policy Analysis: The Alternative Policy Scenarios	
	1. Introduction	111
	2. The Base Case Scenario	121

	3.	The Immediate Natural Gas Deregulation Scenario	129
	4.	The Mandatory Thermal Efficiency Standards Scenario	129
	5.	Policy Relevance	134
CHAPTER	V.	Simulation Results from the REEPS Model	
	1.	Model–Scenario Implementation	137
	2.	National Implications	140
	3.	Income Distribution Implications	149
	4.	End-Use Implications	163
	5.	Regional Distribution Implications	178
	6.	Conclusions	189
CHAPTER	VI.	Simulation Results from the ORNL Model	
	1.	Model–Scenario Implementation	193
	2.	National Implications	195
	3.	Income Distribution Implications	201
	4.	End-Use Implications	216
	5.	Conclusions	220
CHAPTER	VII.	A Comparative Analysis of Model Performance: REEPS versus ORNL	
	1.	Introduction	225
	2.	Comparison of Model Projections	230
	3.	Other Dimensions of Model Comparison	262
	4.	Conclusions	267
CHAPTER	VIII.	Implications	
	1.	Lessons for Energy Policy Analysis	270
	2.	Lessons for Model Construction	279
CHAPTER	IX.	Concluding Remarks	284
