Contents

Foreword	v
Preface	vii

1 Stereochemical Principles	1
1.1 Introduction.....	1
1.2 Chirality.....	1
1.3 Diastereotopic Groups and Faces	10
1.4 Enantiotopic Groups and Faces	10
1.5 Homotopic Groups and Faces	11
1.6 Homochiral Relationships	12
1.7 Selectivity in Organic Synthesis	13
1.7.1 Chemoselectivity	13
1.7.2 Regioselectivity.....	14
1.7.3 Diastereoselectivity.....	16
1.7.4 Enantioselectivity.....	20
1.7.4.1 Reactions in Presence of Chiral Additives.....	21
1.7.4.2 Reactions Involving Covalent Linkages of Chiral Auxiliary Groups with Substrates	22
1.7.4.3 Reactions with Chiral Reagents.....	23
1.7.4.4 Reactions with Enzymes	23
1.8 References	24
2 Stereoselective Catalytic Reductions	26
2.1 Homogeneous Catalytic Hydrogenations.....	27
2.1.1 Hydrogenation of Olefins	27
2.1.1.1 Hydrogenation with Rh-complexes	28
2.1.1.1.1 Tetrasubstituted Olefins	36
2.1.1.1.2 Substituted Itaconate Esters.....	37
2.1.1.2 Hydrogenation with Ru-complexes	40
2.1.1.2.1 Allylic and Homoallylic Alcohols.....	41
2.1.1.2.2 Unsaturated Carboxylic Acids.....	42
2.1.1.2.3 Dicarboxylic Acids	42
2.1.1.2.4 Dehydroamino Acids	43
2.1.1.2.5 Prochiral Ketones	43
2.1.1.3 Hydrogenation with Ti-complexes	45
2.1.1.4 Hydrogenation with Co-complexes	46
2.1.1.5 Hydrogenation with Heterobimetallic Complexes.....	49

2.1.2	Catalytic Hydrosilylation	50
2.1.2.1	Catalytic Hydrosilylation of Olefins	50
2.1.2.2	Catalytic Hydrosilylation of Imines	54
2.1.3	Catalytic Hydrogenation of Ketones	57
2.1.3.1	Direct Hydrogenation of Simple Ketones	58
2.1.3.2	Direct Hydrogenation of Functionalized Ketones	59
2.1.3.2.1	With Rhodium–Diphosphine Catalysts	62
2.1.3.2.2	With Ruthenium Complexes	62
2.1.3.2.3	With Copper Complexes	64
2.1.3.3	Hydrogenation of Ketones via Derivatization	65
2.1.3.3.1	Hydrogenation of Simple Ketones via Hydrosilylation	65
2.1.3.3.2	Hydrogenation of Functionalized Ketones via Hydrosilylation	72
2.1.3.3.3	Hydrogenation of Ketones via Enol Phosphinates ...	78
2.2	Heterogeneous Catalytic Hydrogenations	78
2.2.1	Enantioselective Heterogeneous Catalytic Hydrogenations ...	80
2.2.2	Diastereoselective Heterogeneous Catalytic Hydrogenations	83
2.2.2.1	Asymmetric Hydrogenation of Carbon–Carbon Double Bonds	83
2.2.2.1.1	Hydrogenation of <i>N</i> -Acyl- α,β -Dehydroamino Acids	84
2.2.2.1.2	Asymmetric Hydrogenation of Cyclic Dehydropeptides	91
2.2.2.2	Asymmetric Hydrogenation of other Carbonyl Compounds	93
2.2.2.2.1	Asymmetric Hydrogenation of Benzoylformic Acid Esters	93
2.2.2.2.2	Asymmetric Hydrogenation of α -Keto Amides	96
2.2.2.3	Asymmetric Hydrogenation of Carbon–Nitrogen Double Bonds	99
2.2.2.3.1	Hydrogenation of Imines, Oximes and Hydrazones	99
2.3	References	105

3 Stereoselective Non-Catalytic Reductions 115

3.1	Enantioselective Non-Catalytic Reductions	115
3.1.1	Chiral Metal-hydride Complexes	115
3.1.1.1	Lithium Aluminium Hydride Modified with Chiral Groups	115
3.1.1.1.1	LAH Modified with Alcohols	116
3.1.1.1.2	LAH Modified with Amino Alcohols	121
3.1.1.2	Chiral Boranes and Borohydrides	127

3.1.1.2.1 Chiral Alkylboranes	127
3.1.1.2.2 Chiral Borohydride Reagents	136
3.1.1.2.2.1 NaBH_4 -derived Reagents	136
3.1.1.2.2.1.1 Phase Transfer Catalyzed Reductions	138
3.1.1.2.2.1.2 LiBH_4 Reductions	141
3.1.1.2.2.2 Super Hydrides	141
3.1.2 Chiral Metal Alkyls and Alkoxides	146
3.1.3 Chiral Dihydropyridine Reagents	152
3.2 Diastereoselective Non-Catalytic Reductions	159
3.2.1 Cyclic Substrates	159
3.2.2 Acyclic Substrates	162
3.2.2.1 1,2- Induction	164
3.2.2.2 1,3-, 1,4- and 1,6- Inductions	165
3.2.2.2.1 Cyclic Ketones	171
3.3 References	174

4 Stereoselective Carbon-Carbon Bond Forming Reactions 185

4.1 Nucleophilic Additions to Aldehydes and Ketones	185
4.1.1 Enantioselective Addition Reactions	185
4.1.2 Diastereoselective Addition Reactions	195
4.1.2.1 Diastereoselective Additions to Carbonyl Compounds...	195
4.1.2.2 Diastereoselective Additions to Cyclic Ketones	198
4.1.3 Addition of Chiral Reagents	199
4.1.4 Stereoselectivity of Nucleophilic Addition Reactions	202
4.2 Asymmetric Catalytic Hydrocarbonylations	207
4.2.1 Asymmetric Hydroformylations	207
4.2.1.1 Asymmetric Hydroformylation with Homogeneous Catalysts	208
4.2.1.2 Asymmetric Hydroformylations with Heterogeneous Catalysts	214
4.2.2 Asymmetric Hydroesterification	216
4.3 Asymmetric Aldol Reactions	217
4.3.1 Stereochemistry of the Aldol Reaction	218
4.3.1.1 Transition State Models in the Aldol Reaction	219
4.3.2 Addition of Enolates to Achiral Aldehydes	222
4.3.2.1 Generation and Aldol Reactions of Enolates	222
4.3.2.1.1 Li Enolates in Aldol Reactions	222
4.3.2.1.1.1 Ketone Enolates	224
4.3.2.1.1.2 Ester and Lactone Enolates	226
4.3.2.1.1.3 Amide and Lactam Enolates	228
4.3.2.1.1.4 Thioester and Thioamide Enolates	229
4.3.2.1.1.5 Carboxylic Acid Dianions	231
4.3.2.1.2 Boron Enolates in Aldol Reactions	232
4.3.2.1.3. Magnesium Enolates in Aldol Reactions	235

4.3.2.1.4	Titanium Enolates in Aldol Reactions	236
4.3.2.1.5	Zinc Enolates in Aldol Reactions	237
4.3.2.1.6	Tin Enolates in Aldol Reactions	238
4.3.2.1.7	Silicon Enolates in Aldol Reactions	239
4.3.2.1.8	Zirconium Enolates in Aldol Reactions	241
4.3.3	Addition of Chiral Enolates to Achiral Aldehydes and Unsymmetric Ketones (the Cross Aldol Reaction)	242
4.3.3.1	Metal Atoms as Chiral Centres in Aldol Reactions	244
4.3.3.2	Chiral Ketone Enolates in Aldol Reactions	246
4.3.3.3	Chiral Azaenolates in Aldol Reactions	247
4.3.4	Addition of Achiral Enolates to Chiral Aldehydes	250
4.3.5	Reactions of Chiral Aldehydes with Chiral Enolates	253
4.4	Allylmetal and Allylboron Additions.....	259
4.4.1	Configurational Stability of Allylmetal Compounds.....	260
4.4.2	Stereochemistry of Allylmetal Additions.....	261
4.4.3	Addition of Allylboron Compounds	263
4.4.4	Addition of Allyltitanium Compounds.....	269
4.4.5	Addition of Allylstannanes.....	275
4.4.6	Addition of Allylsilanes.....	279
4.4.7	Palladium-Catalyzed Asymmetric Allylation	284
4.4.8	Chromium (II)-Catalyzed Allylic Additions.....	285
4.4.9	Addition of other Allylmetals	287
4.5	Asymmetric Alkylation Reactions.....	290
4.5.1	Alkylation of Chiral Enolates	290
4.5.1.1	Exocyclic Enolates	292
4.5.1.2	Endocyclic Enolates	294
4.5.1.3	Norbornyl Enolates.....	297
4.5.2	Alkylation of Imine and Enamine Salts	299
4.5.3	Alkylation of Chiral Hydrazones	304
4.5.4	Alkylation of Chiral Oxazolines	308
4.5.4.1	Synthesis of Alkyl Alkanoic Acids	309
4.5.4.2	Synthesis of α -Hydroxyacids	311
4.5.4.3	Synthesis of Butyrolactones and Valerolactones.....	311
4.5.4.4	Synthesis of β -Alkylalkanoic Acid	313
4.5.4.5	Synthesis of Unsubstituted 1,4-Dihydropyridines	314
4.5.4.6	Synthesis of Resin-Bound Oxazolines	316
4.5.4.7	Alkylation via Diketopiperazines.....	317
4.5.5	Alkylation of Sulfoxides and Dithianes	318
4.5.6	Michael Addition Reactions.....	322
4.5.6.1	Addition of Chiral Anions	322
4.5.6.2	Addition of Achiral Anions Complexed with Chiral Ligands to Prochiral Michael Acceptors.....	322
4.5.6.3	Addition of Achiral Anions to Michael Acceptors Having One or More Chiral Centres.....	323

4.5.6.4 Addition with Optically Active Transition Metal-Ligand Catalysts	325
4.6 Pericyclic Reactions	326
4.6.1 Asymmetric Cycloaddition Reactions.....	326
4.6.1.1 Asymmetric Diels-Alder Reactions	326
4.6.1.1.1 Addition to Chiral Dienophiles.....	327
4.6.1.1.2 Addition to Chiral Dienes	332
4.6.1.1.3 Chiral Catalysts	334
4.6.2 Asymmetric [2+2] Cycloadditions	338
4.6.3 Asymmetric 1,3-Dipolar [3+2] Cycloadditions	342
4.6.4 Sigmatropic Rearrangements	345
4.6.4.1 [3,3] Sigmatropic Rearrangements	348
4.6.4.2 [2,3] Sigmatropic (Wittig) Rearrangements	352
4.6.4.2.1 Allylsulfenate Rearrangements	357
4.6.5 Ene Reactions	360
4.6.5.1 Intermolecular Ene Reactions.....	361
4.6.5.2 Intramolecular Ene Reactions.....	362
4.7 References	365
5 Asymmetric Oxidations	397
5.1 Asymmetric Epoxidation	397
5.1.1 Asymmetric Epoxidation of Allylic Alcohols	397
5.1.1.1 Katsuki-Sharpless Epoxidation	397
5.1.2 Asymmetric Epoxidation of other Substrates	402
5.2 Asymmetric Oxidation of Sulfides	405
5.3 Asymmetric Oxidation of Selenides.....	405
5.4 Asymmetric Hydroxylations.....	406
5.4.1 Vicinal Hydroxylations.....	408
5.5 Asymmetric Oxidation of Aromatic Substrates via Donor-Acceptor Interaction	411
5.6 References	412
6 Asymmetric Carbon-Heteroatom Bond Formations	416
6.1 Carbon-Oxygen Bond Formation.....	416
6.1.1 Asymmetric Halolactonization	416
6.1.2 Asymmetric Hydroboration.....	420
6.2 Carbon-Nitrogen Bond Formation	423
6.2.1 Halocyclization	423
6.2.1.1 Iodolactamization.....	424
6.2.2 Mercuricyclization.....	424
6.3 Carbon-Sulfur Bond Formation	426
6.4 Carbon-Phosphorus Bond Formation	428
6.5 Stereoselective C-H Bond Formation and Proton Migration	429
6.6 References	431

7 Enzyme-Catalyzed Reactions	434
7.1 Enzyme Specificity.....	435
7.1.1 Enantiomeric Specificity of Enzymes	435
7.1.2 Prochiral Stereospecificity.....	439
7.1.2.1 Additions to Stereoheterotopic Faces	439
7.1.2.2 Stereoheterotopic Groups and Atoms	445
7.2 Meso Compound Transformations	449
7.3 Multienzyme Systems	451
7.4 References	453
 8 Stereoselective Free Radical Reactions	 458
8.1 Free Radical Chain Reactions	458
8.1.1 The Tin Hydride Method	461
8.1.1.1 Intramolecular Radical Cyclizations.....	462
8.1.1.2 Intermolecular Radical Additions	467
8.1.2 The Mercury Hydride Method.....	471
8.1.2.1 Intramolecular Cyclization Reactions	472
8.1.2.2 Intermolecular Radical Reactions	474
8.1.2.2.1 Cyclic Radicals	474
8.1.2.2.2 Acyclic Substrates	478
8.1.3 The Fragmentation Method	479
8.1.4 The Barton (Thiohydroxamate Ester) Method.....	481
8.1.5 The Atom Transfer Method.....	484
8.1.5.1 Hydrogen Atom Transfer Addition and Cyclization.....	485
8.1.5.2 Halogen Atom Transfer	488
8.1.5.2.1 Halogen Atom Transfer Additions	488
8.1.5.2.2 Halogen Atom Transfer Cyclizations	488
8.1.5.2.3 Halogen Atom Transfer Annulations.....	488
8.1.6 Heteroatom-Halogen Donors	489
8.1.7 Organocobalt Transfer Method	490
8.2 Non-Chain Radical Reactions.....	492
8.3 References	494
 9 Miscellaneous Stereoselective Reactions	 503
9.1 Asymmetric Cyclopropanations	503
9.2 References	506
 Subject Index	 508
