Contents

		List of Tables and Figures	**xi**
		Introduction	**1**
Section	**I**	**Concept of Structural Standards**	**3**
		The System Development Process	3
		Structural Standards	4
Section	**II**	**The Problems that Confront the Systems Development Manager**	**7**
		General	7
		Technological Explosion	7
		Shortage of Trained Personnel	8
		Communication of User Requirements	9
		Increase in Project Scale	9
		Rapid Increase in Fixed Costs	10
		Research and Development Orientation	10
		Summary	10
Section	**III**	**Basic Principles for Managing the Systems Development Process**	**13**
		General	13
		Relationship between System Development and New Product Development Cycle	13

Axioms for System Development 14
Axiom 1. Information Systems Are Capital Investments 15
Axiom 2. Building Success Criteria Measurements into the Operational System 15
Axiom 3. The System Is for the User 16
Axiom 4. Establish Landmarks 17
Axiom 5. Don't Be Afraid To Cancel Projects 18
Axiom 6. Get Management To Participate Where It Counts 19
Axiom 7. People Are the Problem 20
Axiom 8. System Development Is an Iterative Process 21
Axiom 9. Consider as Many Design Alternatives as Are Feasible 21
Axiom 10. The Great Leap Forward Is Best Accomplished in Short Comfortable Hops 22
Axiom 11. When in Doubt . . . Document 23
Axiom 12. Use Documentation To Structure the Design Process 23
Axiom 13. Establish Checks and Balances 24
Axiom 14. If You Can't Plan It, You Can't Do It 25
Axiom 15. Procedures Are as Important as Programs 26
Axiom 16. Conversion Is a System 26
Summary 26

Section IV The System Development Cycle Is the Primary Structural Standard 27

General 27
Development Cycle Description 27
Relationship of System Development Cycle to General Development Landmarks 28
Utility of Development Cycle Phases 28
Subdivision of Systems Definition into Three Development Phases 30

Effect of Parallel Development Efforts on the Development Cycle 31
Other Topics That Could Be Considered Within the Scope of the Development Cycle 32
Project Selection 32
Equipment Selection 32
Documentation and Control Flow for the Development Cycle 33
Review and Approval of the Development Cycle 33
Subordinate Structural Standards 38
Summary 38

Section V Feasibility Study Phase 41

General Description 41
Input 41
Output 41
Subordinate Structural Standards 43
1. Project Outline 43
2. Cost Evaluation Form 44
3. Feasibility Study Report 45
Management Review 48

Section VI System Specification Phase 49

General Description 49
Input 49
Output 49
Subordinate Structural Standards 49
1. Task List 50
2. Questionnaire 51
3. Matrix Design Techniques 51
4. Flow Diagrams 52
5. Implementation Planning Table 52
6. File Creation Data Sources Matrix 54
7. System Specification Report 55

Section VII System Engineering Phase 59

General Description 59
Input 59
Output 59
Subordinate Structural Standards 61
1. Task List 61
2. System Modularization and Reduction of Interfaces 63
3. Prototypes of Systems 65
4. Specifications 68
5. Conversion Timetable 72

Section VIII Programming and Procedure Development 73

General Description 73
Inputs 73
Outputs 73
Subordinate Structural Standards 75
1. Task List 75
2. Program Construction Conventions 77
3. Test Construction Conventions 78
4. Procedure Construction Conventions 80

Section IX Implementation 83

General Description 83
Inputs 83
Outputs 83
Subordinate Structural Standards 83
1. Task List 83
2. Measuring the Cutover 85

Section X System Operation 87

General Description 87
Inputs and Outputs 87

Subordinate Structural Standards 87
1. Control of Change 87
2. System Improvement 89

Section XI The Design of Structural Standards 91

Summary of Concepts 91
Estimating as a Structuring Property 92
Use of Outlines and Forms as a Structuring Property 92
Use of Diagrams as a Structuring Property 92
Summary 92

Index 93
