Summary . . . . .	3
Acknowledgements . . . . .	4
List of figures . . . . .	10
List of boxes . . . . .	13
List of tables . . . . .	14
Glossary . . . . .	16
Abbreviations . . . . .	20
Notation . . . . .	21
<b>1 INTRODUCTION . . . . .</b>	<b>23</b>
1.1 Background to the book . . . . .	26
1.2 Objectives of the book . . . . .	27
1.3 Intended readership and layout of the book . . . . .	27
1.4 Applicability of the book . . . . .	28
<b>2 APPLICATIONS AND FUNDAMENTALS OF SOIL NAILING . . . . .</b>	<b>29</b>
2.1 Development of soil nailing . . . . .	29
2.2 Development of soil nailing in the UK . . . . .	31
2.3 Applications of soil nailing . . . . .	34
2.4 Fundamentals of soil nailing . . . . .	41
2.5 Health and safety . . . . .	44
2.6 Contractual requirements . . . . .	45
2.7 Risk-based approach to soil nailing . . . . .	48
2.8 Design process . . . . .	52
2.9 Design requirements and performance criteria . . . . .	53
2.10 Failures in soil-nailed systems . . . . .	54
<b>3 UK AND INTERNATIONAL TECHNICAL STANDARDS, CODES OF PRACTICE AND GENERAL PRACTICE . . . . .</b>	<b>55</b>
3.1 UK practice generally . . . . .	55
3.2 UK practice on highways . . . . .	55
3.3 UK practice on railways . . . . .	58
3.4 Eurocodes and European standards . . . . .	60
3.5 French practice (Project <i>Clouterre</i> ) . . . . .	60
3.6 Scandinavian practice ( <i>Nordic handbook</i> ) . . . . .	61
3.7 USA practice (FHWA) . . . . .	61
3.8 Hong Kong practice . . . . .	61
<b>4 ASPECTS OF UK GROUND CONDITIONS RELEVANT TO SOIL NAILING . . . . .</b>	<b>63</b>
4.1 Understanding the geology of the site . . . . .	64
4.2 General requirements for suitability of natural soils and rocks for soil nailing . . . . .	64
4.3 Cohesive soils . . . . .	65
4.4 Granular soils . . . . .	69
4.5 Weak rocks . . . . .	70
4.6 Fill . . . . .	72
4.7 Groundwater . . . . .	76
4.8 Effect of underlying geological features . . . . .	77

<b>5</b>	<b>SITE INVESTIGATION FOR SOIL NAILING</b> .....	<b>79</b>
5.1	Planning a site investigation .....	79
5.2	Preliminary site appraisal .....	83
5.3	Sub-surface investigation .....	84
5.4	Field trials .....	92
<b>6</b>	<b>KEY MECHANISMS OF BEHAVIOUR</b> .....	<b>93</b>
6.1	The soil-nailing system .....	93
6.2	Development of load in soil nails .....	95
6.3	Role of bending and shear resistance .....	97
6.4	Role of the facing .....	98
6.5	Deformation .....	98
6.6	Redundancy in soil-nailing systems .....	99
6.7	Limit state design .....	99
6.8	General requirements and factors of safety .....	102
<b>7</b>	<b>CONCEPTUAL DESIGN</b> .....	<b>105</b>
7.1	Factors to be considered for soil nailing .....	105
7.2	Geometry .....	110
7.3	Layout and spacing of nails .....	110
7.4	Preliminary assessment of soil nail length for conceptual design .....	111
7.5	Head plates .....	114
7.6	Facing .....	114
7.7	Drainage .....	118
<b>8</b>	<b>DETAILED DESIGN</b> .....	<b>123</b>
8.1	Geometry and design cross-sections (Step 1) .....	126
8.2	Surcharges and loads (Step 2) .....	126
8.3	Ground model (Step 3) .....	127
8.4	Groundwater and design of drainage (Steps 4 and 5) .....	127
8.5	Design codes and design methods (Step 6) .....	128
8.6	Characteristic soil strengths (Step 7) .....	129
8.7	Determination of design soil parameters and design loads (Step 8) .....	129
8.8	Nail orientation .....	131
8.9	Internal stability and pullout resistance (Step 9) .....	132
8.10	Nail tendon design (Step 9 continued) .....	142
8.11	Ground aggressivity and corrosion protection (Step 9 continued) .....	142
8.12	Internal and external stability checks (Steps 10 and 11) .....	142
8.13	Design of facings and head plates (Step 12) .....	146
8.14	Prediction of deformations (Step 13) .....	151
8.15	Monitoring and instrumentation .....	152
<b>9</b>	<b>DURABILITY AND DEGRADATION</b> .....	<b>155</b>
9.1	Assessment of degradation risk .....	156
9.2	Service environments .....	161
9.3	Materials .....	163
9.4	Uncoated steel .....	163
9.5	Coated steels .....	163
9.6	Stainless steel .....	165
9.7	Fibre-reinforced plastic soil nails .....	166
9.8	Materials directly within the ground .....	169
9.9	Materials with cement grout surround .....	172
9.10	Steels surrounded by grouted impermeable ducting .....	175
9.11	Steels and composites with enhanced corrosion protection .....	176
9.12	Cost .....	177

9.13	Observation and exhumation .....	178
9.14	Nail heads .....	182
9.15	Facings .....	184
9.16	Summary and durability requirements related to geotechnical risk categories for nail tendons .....	184
<b>10</b>	<b>CONSTRUCTION .....</b>	<b>187</b>
10.1	Planning for health and safety and safe systems of work .....	189
10.2	Programming and procurement .....	190
10.3	Safe working on slopes .....	192
10.4	Soil nail installation techniques .....	192
10.5	Excavation .....	198
10.6	Construction tolerances .....	199
10.7	Construction of drainage for soil nailing .....	199
10.8	Construction of facings for soil-nailed systems .....	199
<b>11</b>	<b>CONSTRUCTION QUALITY CONTROL, TESTING AND RECORDS ....</b>	<b>205</b>
11.1	Construction quality control and inspection .....	205
11.2	Material procurement and storage .....	205
11.3	Soil nail testing .....	206
11.4	Non-destructive testing .....	214
11.5	Installation records .....	215
<b>12</b>	<b>MAINTENANCE OF SOIL-NAILED STRUCTURES .....</b>	<b>217</b>
12.1	Inspections .....	217
12.2	Typical routine maintenance activities .....	219
<b>13</b>	<b>FURTHER WORK AND RESEARCH .....</b>	<b>221</b>
	<b>APPENDICES .....</b>	<b>223</b>
<b>A1</b>	<b>Worked design examples .....</b>	<b>224</b>
<b>A2</b>	<b>Additional information on detailed design of hard facings .....</b>	<b>255</b>
<b>A3</b>	<b>Typical details .....</b>	<b>261</b>
<b>A4</b>	<b>Case study of suitability test method .....</b>	<b>263</b>
<b>A5</b>	<b>Case study of the design of a widened railway cutting using soil nails with a flexible facing .....</b>	<b>267</b>
<b>A6</b>	<b>Case study of the use of actively stressed soil nails and multiple anchors to retain a steep slope .....</b>	<b>273</b>
	<b>REFERENCES .....</b>	<b>275</b>
