<b>1. Introduction</b>	<b>1</b>
Overview	1
What is adaptation?	1
Sustainability in building adaptation	15
Performance management	23
Phases of adaptation	24
Market conditions affecting adaptation	25
Building obsolescence and redundancy	28
Vacant buildings	32
The pros and cons of adapting buildings	36
The options for property owners	40
The decision to adapt a building	40
Summary	46
<b>2. Feasibility</b>	<b>48</b>
Overview	48
Background	48
Constructional characteristics of buildings	57
Other adaptation issues	61
Assessing the building	64
Problems with adapting buildings	70
Deleterious materials	72
Preliminary considerations	76
The adaptation process	81
Design guidelines for adapting buildings	83
Pre-adaptation building audits	88
Summary	96

<b>3. Basic conversions</b>	<b>97</b>
Overview	97
Background	97
The building conversion process	103
Converting old buildings	108
Code compliance	120
Inflexible buildings	128
Summary	133
<b>4. Adaptive reuses</b>	<b>137</b>
Overview	137
Background	137
Adaptive reuse options	141
Adaptive reuse of farm buildings	146
Adaptive reuse of church buildings	150
Adaptive reuse of industrial buildings	160
Adaptive reuse of office buildings	165
Adaptive reuse of public buildings	167
Problems with the adaptive reuse of old buildings	168
Fire safety in adaptations	173
Summary	185
<b>5. Lateral extensions</b>	<b>186</b>
Overview	186
Background	186
Forms of lateral extensions	187
Design and other influences on extensions	194
Conservatories	205
Joining new work to old	208
Summary	228
<b>6. Vertical extensions</b>	<b>232</b>
Overview	232
Background	232
Loft extensions	234
Retrofit dormers	240
Retrofit rooflights	249
Extensions to flat roofs	252
Over-roofing	255
Combined vertical and lateral extensions	262
Basement extensions	264
Constraints and problems	267
Summary	271
<b>7. Structural alterations</b>	<b>272</b>
Overview	272
Background	272

Structural and fabric repairs	275
Strengthening existing buildings	288
Alterations to floors	293
Alterations to walls	303
Alterations to roofs	307
Alterations to frames	308
Underpinning	310
Partial demolition	311
Statutory approvals for structural alterations	316
Summary	318
<b>8. Principles of modernization</b>	<b>319</b>
Overview	319
Background	319
British housing stock	324
Non-traditional housing	327
Indoor air quality	329
Condensation control	339
Other housing improvements	343
Office refurbishment	348
Retail refurbishment	359
Industrial refurbishment	361
Public refurbishment	364
Summary	373
<b>9. Further aspects of modernization</b>	<b>375</b>
Overview	375
External improvements	375
Energy-efficiency measures	385
Upgrading floors	401
Upgrading walls	403
Upgrading roofs	413
Modular construction	420
Accessibility improvements	423
Summary	430
<b>10. Implementation</b>	<b>431</b>
Overview	431
Adaptation assessment procedure	431
Spatial considerations	442
Graphical presentation of proposals	442
Specifications for adaptation work	445
Procuring adaptation work	449
Risk in adaptation work	454
Managing adaptation projects	463
Post-adaptation evaluation	470
Aftercare strategy	473
Summary and conclusion	477

## viii Contents

### Appendices

Appendix A: Checklist for assessment of habitability	479
Appendix B: Key aspects of performance	481
Appendix C: Table of suitable sizes of precast concrete lintels for various spans and loadings	483
Appendix D: Typical notes and specification column in a drawing for a small extension scheme	485
Appendix E: Building control checklist	487
Appendix F: Typical specimen maintenance schedules	492
<i>Glossary</i>	494
<i>Bibliography</i>	505
<i>Index</i>	535
