

Hamiltonian Dynamical Systems

a reprint selection
compiled and introduced by

R S MacKay

Mathematics Institute, University of Warwick

and

J D Meiss

*Institute for Fusion Studies
University of Texas, Austin*

Adam Hilger, Bristol and Philadelphia

Contents

Preface	xi
Part 1: Introductory articles	
Survey of Hamiltonian dynamics	3
R S MacKay and J D Meiss	
Is the Solar System stable?	20
J K Moser	
<i>Math. Intelligencer</i> 1 65–71 (1978)	
Regular and irregular motion	27
M V Berry	
<i>Topics in Nonlinear Dynamics</i> (ed S Jorna), <i>Am. Inst. Phys. Conf. Proc.</i> 46 16–120 (1978)	
The mechanisms of stochasticity in classical dynamical systems	54
A S Wightman	
<i>Perspectives in Statistical Physics</i> (ed H J Raveché) pp 343–63 (1981)	
Part 2: Equilibria and periodic orbits	
Lectures on Hamiltonian systems	77
J K Moser	
<i>Mem. Am. Math. Soc.</i> 81 1–60 (1968)	
Stability of equilibria of Hamiltonian systems	137
R S MacKay	
<i>Nonlinear Phenomena and Chaos</i> (ed Sarben Sarkar) pp 254–70 (1986)	
On the periodic motions of dynamical systems	154
G D Birkhoff	
<i>Acta. Math.</i> 50 359–79 (1927)	
Linear stability of periodic orbits in Lagrangian systems	175
R S MacKay and J D Meiss	
<i>Phys. Lett.</i> 98A 92–4 (1983)	

Generic bifurcation of periodic points	178
K R Meyer Trans. Am. Math. Soc. 149 95–107 (1970)	
Universal behaviour in families of area-preserving maps	191
J M Greene, R S MacKay, F Vivaldi and M J Feigenbaum Physica 3D 468–86 (1981)	
Quasi-elliptic periodic points in conservative dynamical systems	210
S E Newhouse Am. J. Math. 99 1061–87 (1977)	

Part 3: Quasiperiodic orbits

Geodesics on a two-dimensional Riemannian manifold with periodic coefficients	239
G A Hedlund Ann. Math. 33 719–39 (1932)	
Small denominators and problems of stability of motion in classical and celestial mechanics	260
V I Arnol'd Russ. Math. Surveys 18:6 85–191 (1963)	
Variational principles for invariant tori and cantori	367
I C Percival Nonlinear Dynamics and the Beam–Beam Interaction (ed M Month and J C Herrera), Am. Inst. Phys. Conf. Proc. 57 302–10 (1979)	
Periodic and quasi-periodic orbits for twist maps	376
A Katok Dynamical Systems and Chaos (ed L Garrido), Springer Lect. Notes Phys. 179 47–65 (1983)	
Non-existence of invariant circles	395
J N Mather Erg. Theor. Dyn. Sys. 4 301–9 (1984)	

Part 4: Breakup of invariant tori

Resonance processes in magnetic traps	407
B V Chirikov J. Nucl. Energy C 1 253–60 (1960)	
Destruction of magnetic surfaces by magnetic field irregularities	415
M N Rosenbluth, R Z Sagdeev, J B Taylor and G M Zaslavski Nucl. Fusion 6 297–300 (1966)	

A method for determining a stochastic transition	419
J M Greene <i>J. Math. Phys.</i> 20 1183–201 (1979)	
Fractal diagrams for Hamiltonian stochasticity	438
G Schmidt and J Bialek <i>Physica</i> 5D 397–404 (1982)	
Large-scale stochasticity in Hamiltonian systems	446
D F Escande <i>Physica Scripta</i> T2/1 126–41 (1982)	
A renormalisation approach to invariant circles in area-preserving maps	462
R S MacKay <i>Physica</i> 7D 283–300 (1983)	

Part 5: Chaotic behaviour

Roughness of geodesic flows on compact Riemannian manifolds of negative curvature	483
D V Anosov <i>Sov. Math. –Dokl.</i> 3 1068–70 (1962)	
Ergodic properties of geodesic flows on closed Riemannian manifolds of negative curvature	486
D V Anosov <i>Sov. Math. –Dokl.</i> 4 1153–6 (1963)	
Markov partitions and C-diffeomorphisms	490
Ya G Sinai <i>Funct. Anal. Appl.</i> 2 61–82 (1968)	
Ljapunov characteristic exponents and ergodic properties of smooth dynamical systems with an invariant measure	512
Ja B Pesin <i>Sov. Math. –Dokl.</i> 17 196–9 (1976)	
Ergodicity of linked twist maps	516
R Burton and R W Easton <i>Springer Lect. Notes Math.</i> 819 35–49 (1980)	
Principles for the design of billiards with nonvanishing Lyapunov exponents	531
M Wojtkowski <i>Commun. Math. Phys.</i> 105 391–414 (1986)	

Shift automorphisms in the Hénon mapping	555
R Devaney and Z Nitecki <i>Commun. Math. Phys.</i> 67 137–46 (1979)	
Part 6: Mixed systems	
A model problem with the coexistence of stochastic and integrable behaviour	569
M Wojtkowski <i>Commun. Math. Phys.</i> 80 453–64 (1981)	
Fat fractals on the energy surface	581
D K Umberger and J D Farmer <i>Phys. Rev. Lett.</i> 55 661–4 (1985)	
Long-time correlations in the stochastic regime	585
C F F Karney <i>Physica</i> 8D 360–80 (1983)	
Transport in Hamiltonian systems	606
R S MacKay, J D Meiss and I C Percival <i>Physica</i> 13D 55–81 (1984)	
Instability of dynamical systems with several degrees of freedom	633
V I Arnol'd <i>Sov. Math.-Dokl.</i> 5 581–5 (1964)	
Behavior of Hamiltonian systems close to integrable	638
N N Nekhoroshev <i>Funct. Anal. Appl.</i> 5 338–9 (1971)	
Melnikov's method and Arnold diffusion for perturbations of integrable Hamiltonian systems	640
P J Holmes and J E Marsden <i>J. Math. Phys.</i> 23 669–75 (1982)	
Arnold diffusion, ergodicity and intermittency in a coupled standard mapping	647
K Kaneko and R J Bagley <i>Phys. Lett.</i> 110A 435–40 (1985)	
Part 7: Applications	
Nature of the Kirkwood gaps in the asteroid belt	655
S F Dermott and C D Murray <i>Nature</i> 301 201–5 (1983)	

The chaotic rotation of Hyperion	660
J Wisdom, S J Peale and F Mignard <i>Icarus</i> 58 137–52 (1984)	
A method for mapping a toroidal magnetic field by storage of phase stabilized electrons	676
R M Sinclair, J C Hosea and G V Sheffield <i>Rev. Sci. Instrum.</i> 41 1552–9 (1970)	
Electron heat transport in a tokamak with destroyed magnetic surfaces	684
A B Rechester and M N Rosenbluth <i>Phys. Rev. Lett.</i> 40 38–41 (1978)	
Elimination of stochasticity in stellerators	688
J D Hanson and J R Cary <i>Phys. Fluids</i> 27 767–9 (1984)	
The dynamics of the beam–beam interaction	691
A Gerasimov, F M Izrailev, J L Tennyson and A B Temnykh <i>Nonlinear Dynamics Aspects of Particle Accelerators</i> (ed J M Jowett, M Month and S Turner), <i>Springer Lect. Notes Phys.</i> 247 154–75 (1986)	
Intramolecular dynamics and nonlinear mechanics of model OCS	710
D Carter and P Brumer <i>J. Chem. Phys.</i> 77 4208–21 (1982)	
Stirring by chaotic advection	725
H Aref <i>J. Fluid Mech.</i> 143 1–21 (1984)	
The twist map, the extended Frenkel–Kontorova model and the devil's staircase	746
S Aubry <i>Physica</i> 7D 240–58 (1983)	

Part 8: Bibliography
