**Introduction** 1

## *Part I* MODEL SELECTION

### *Chapter One*

**Classical Model Selection through Specification Error Tests** 13

JAMES B. RAMSEY

- I. Some Examples of Specification Errors and Their Effects on Inference 15
- II. An Analysis of Model Differences 23
- III. Hypothesis Tests and Methods of Model Discrimination 27
- IV. Some Specific Specification Error Tests 30
- V. Use of Specification Error Tests for Model Discrimination 40
- VI. A Suggested Research Strategy and Problems for Future Research 45
- References 46

### *Chapter Two*

**Discriminating among Alternative Models:  
Bayesian and Non-Bayesian Methods** 49

KENNETH M. GAVER AND MARTIN S. GEISEL

- I. Non-Bayesian Methods for Discriminating among Models 51
- II. Bayesian Procedures for Comparing and Choosing among Alternative Models 62
- III. Concluding Remarks 74
- References 75

*Part II* LINEAR MODELS*Chapter Three***Transformation of Variables in Econometrics 81**

PAUL ZAREMBKA

I. Transformation of Variables in Statistics	84
II. Estimation of $\lambda$ under Heteroskedasticity in $\varepsilon$	87
III. Applications in Econometrics: Demand Studies	95
IV. Applications in Econometrics: Production Studies	99
V. New Directions	101
References	103

*Chapter Four***Conditional Logit Analysis of Qualitative Choice Behavior 105**

DANIEL MCFADDEN

I. Preferences and Selection Probabilities	106
II. Conditional Logit Estimation	113
III. Statistical Properties	119
IV. An Empirical Application	130
Appendix: Proofs of Statistical Properties	134
References	139

*Chapter Five***Linear Models with Random Coefficients 143**

P. A. V. B. SWAMY

I. Different Schemes of Parameter Variation	146
II. Estimation of Random Coefficient Regression Models When Disturbances Are Contemporaneously and Serially Correlated	154
III. Illustrative Example	160
IV. Suggestions for Further Research	163
References	166

*Chapter Six***Estimation by Minimizing the Sum of Absolute Errors 169**

LESTER D. TAYLOR

I. Mechanics of Least Absolute Error Estimation	172
II. Rudiments of A Distribution Theory for Least Absolute Error	177
III. Geometrical Representation of Least Absolute Error	188
IV. Concluding Observations	188
References	189

*Part III* MULTIPLE-EQUATION MODELS*Chapter Seven***Unobservable Variables in Econometrics** **193**

ARTHUR S. GOLDBERGER

I. Multiple Indicators	194
II. Factor Analysis	198
III. Multiple Causes	200
IV. A Multiple-Indicator–Multiple-Cause Model	204
V. Unobservables in Simultaneous-Equation Models	207
VI. Conclusions	211
References	211

*Chapter Eight***Consistent and Efficient Estimation of Systems of Simultaneous Equations by Means of Instrumental Variables** **215**

JAMES M. BRUNDY AND DALE W. JORGENSON

I. The Statistical Model	219
II. Instrumental Variables Estimation of a Single Equation	223
III. Instrumental Variables Estimation of a System of Equations	227
IV. Repeated Least Squares Estimation	235
V. Example: Klein Model I	238
VI. Suggestions for Further Research	241
References	242
