Bed-Rest Studies in the

Spaceflight Era (1986-2005)

- A Review

A. Pavy-Le Traon, M. Heer, M. Narici, J. Rittweger & J. Vernikos

Table of contents

| 7 | Introduction | 2 |
|--------------------------|---|----|
| 1.1 | Bed-rest studies in the space era | 3 |
| 1.2 | Head-down bed-rest studies: value as a simulation model | 4 |
| 1.3 | Factors affecting the results | 6 |
| 1.4 | Testing or countermeasure? | 8 |
| 1.5 | Concluding remarks | 8 |
| 1.6 | Sources | 9 |
| 2 | Cardio-vascular and Pulmonary Adaptation | 10 |
| 2. 1 [.] | Body-fluid regulation in bed rest | 10 |
| 2.2 | Volume-regulating hormones | 12 |
| 2.3 | Red-cell mass | 15 |
| 2.4 | Blood pressure, heart rate, stroke volume and peripheral resistance | 16 |
| 2.5 | ECG changes | 17 |
| 2.6 | Cardio-vascular regulation by the autonomic nervous system | 18 |
| 2.7 | Orthostatic intolerance | 20 |
| 2.7.1 | Mechanisms involved in orthostatic intolerance | 21 |
| 2.7.2 | Predisposing factors | 25 |
| 2.8 | Decrease in exercise capacity C_{1}^{2} 471683 | 29 |
| 2.9 | Pulmonary function | 30 |
| 2.10 | Countermeasures | 31 |
| 2.10.1 | Fluid and salt loading Darmstadt | 31 |
| 2.10.2 | Lower-body negative pressure | 32 |
| 2.10.3 | Aerobic exercise | 33 |
| 2.10.4 | Other physical countermeasures | 35 |
| 2.10.5 | Pharmacological approaches | 35 |
| 2.10.6 | Combined countermeasures | 36 |
| 2.10.7 | Artificial gravity | 36 |
| 2.11 | Sources | 38 |
| 3 Metab | olism, Endocrine Mechanisms and Nutrition | 51 |
| 3.1 | Protein metabolism | 51 |
| 3.2 | Insulin, insulin resistance and energy metabolism | 52 |
| 3.3 | Inflammatory processes | 54 |
| 3.4 | Vitamins and minerals | 55 |
| 3.5 | Sources | 57 |
| 4 | Skeletal Muscle | 60 |
| 4.1 | Muscle mass and function | 60 |
