Foreword by <i>H.E. Raúl A. Estrada-Oyuela</i>	xiii
Preface	xvii
Acknowledgments	xx
About the authors	xxii
Outline structure of Convention and Protocol	xxiv
Glossary	xxvi
Summary and conclusions	xxxiii

Part I: The making of the Protocol

1 Analytic foundations: science, response options and the IPCC ...	3
1.1 Origins and the Intergovernmental Panel on Climate Change ...	3
1.2 Scientific foundations and the First Assessment Report of the IPCC	5
1.3 Findings of the IPCC Second Assessment Report	7
1.4 Key debates and implications of the Second Assessment Report	17
1.5 Developments after the Second Assessment Report	21
1.6 Conclusions	26
2 Political and legal foundations: national perspectives and the road to Kyoto	27
2.1 National interests, perspectives and negotiating groups	27
2.2 The UN Framework Convention on Climate Change	36
2.3 From Rio to the First Conference of Parties at Berlin	43
2.4 The shifting political foundations	49
2.5 Milestones to Kyoto	52

3	Negotiating the Kyoto Protocol	61
3.1	The negotiating process	62
3.2	Policies and measures	65
3.3	Defining emission targets: time scales, gas coverage and sinks ..	68
3.4	Assigning emission targets: differentiation and the 'EU bubble'	81
3.5	International flexibility within Annex I: joint implementation and emissions trading	87
3.6	International flexibility with developing countries: objections to JI and the emergence of the CDM	97
3.7	Developing-country concerns and participation	103
3.8	Extending commitments to new countries: evolution and voluntary accession	107
3.9	Conclusions	111
4	The Kyoto Protocol	115
4.1	Definition of Annex I commitments	115
4.2	'Bubbling' and the EU redistribution of emission commitments	122
4.3	Policies and measures	124
4.4	Mechanisms for international transfer	128
4.5	Additional issues relating to developing countries	138
4.6	Compliance, future development and related issues: monitoring, reporting and review	142
4.7	Conclusions	150
 Part II: Analysis of commitments, mechanisms and prospects		
5	Environmental and economic implications of the Kyoto commitments	155
5.1	Environmental consequences of the Kyoto commitments	155
5.2	Economic consequences of the Kyoto commitments	160
5.3	The potential impact of flexibility within Annex I	171
5.4	Potential impact of sinks and the CDM	186
5.5	Conclusions: inflation, efficiency and competition between the mechanisms	191

6 Implementing international transfers under the Kyoto mechanisms	194
6.1 General principles governing the creation and transfer of emission credits and allowances	194
6.2 Acquisition and trade of emission credits from JI and the CDM	198
6.3 Governing international emissions trading	206
6.4 Supplementarity, balancing and charges under the Kyoto mechanisms	217
6.5 Conclusions	224
7 The clean development mechanism	226
7.1 Introduction	226
7.2 A: additionality, and adaptation and administration charges ...	227
7.3 B: bilateral or portfolio structure?	232
7.4 C: crediting, certification and the control of corruption	237
7.5 D: distribution of activities under the CDM.	238
7.6 E: eligibility criteria	240
7.7 F: financing sources	242
7.8 G: governing the CDM	244
7.9 Conclusions	245
8 Prospects for the Kyoto regime	248
8.1 The Buenos Aires 'Plan of Action'	248
8.2 Prospects for ratification and entry into force	253
8.3 Business and public involvement in the Kyoto regime	257
8.4 First-period developing-country commitments: accession, expansion and inflation?	262
8.5 Longer-term approaches: an overview.	265
8.6 Emissions convergence: any room for compromise?	269
8.7 Conclusions	275

Part III: Appendices

1. Text of the Kyoto Protocol	281
2. Key themes in economic debates: insights from the IPCC Second Assessment Report	304
3. Analysis of international trade in emission allowances	324
4. Further reading and sources of information	330
Index	335

Tables

3.1 Greenhouse gases in the Kyoto Protocol	73
3.2 LUCF emissions for Parties reporting with LUCF emissions greater than 5% of 1990 emissions	78
3.3 Total anthropogenic CO ₂ emission changes, excluding LUCF, 1990–96	82
4.1 Emissions and commitments in the Kyoto Protocol (from base year)	118
4.2 The internal distribution of the EU ‘bubble’	122
5.1 Estimated costs of achieving Kyoto commitments from various economic models	160
5.2 Emission projections up to 2010 submitted by Parties (% from base year)	160
5.3 CO ₂ emissions increases and required cutbacks by major Annex I groups: IEA projections (MtC)	160
5.4 Base assumptions in the ITEA analysis	170
5.5 Aggregate implications of Kyoto emission commitments	170
5.6 Traded volumes under the high case (no constraints: moderate trading)	170
5.7 Emission distribution in Annex I after trade (% relative to base year)	180
5.8 Impact of trading on the cost distribution for the Kyoto targets ('\$'/cap)	180
5.9 Potential sinks from anthropogenic LUCF activities	180
5.10 Estimates of the size of the CDM	190

Figures

1.1	Observed and modelled temperature trends, with and without aerosol corrections	10
1.2	Global average surface temperature, 1860–1998	22
1.3	Estimated and predicted global CO ₂ absorption by vegetation	25
2.1	Global CO ₂ emissions, per capita and per population	28
3.1	Trends in emissions of the Kyoto greenhouse gases, 1990–95 and 1995–6	83
5.1	Potential impact of the Kyoto Protocol on future emissions, concentrations, temperature and sea level	157
5.2	A view of optimal global CO ₂ trajectories for stabilization at 450 ppm CO ₂ and 550 ppm CO ₂	159
5.3	Gap between Kyoto commitments and 1995 emission levels in principal Annex I groups	162
5.4	Standard marginal (a) and total abatement (b) cost curves for the ITEA model	172
5.5	US assigned amount and possible emissions under the Kyoto Protocol	181
6.1	Early crediting of projects	203
6.2	Accountability in international emissions trading	208
7.1	Portfolio/multilateral and bilateral structures for the CDM	233
8.1	Emissions convergence distributions under 450 ppm and 550 ppm	271
8.2	Kyoto commitments for industrialized countries	274

Boxes

1.1	A portfolio of actions	16
2.1	The distribution of global CO ₂ emissions	28
2.2	Berlin decision on activities implemented jointly	46
2.3	The Berlin Mandate	48
2.4	Ministerial Declaration at the Second Conference of the Parties to the Climate Convention, 8–19 July 1996	55
3.1	Progress on AIJ/JI projects before the Kyoto Protocol	101
4.1	Elements of policies and measures in the Kyoto Protocol	125
4.2	OECD proposal on emissions trading: the text that never made it	130

4.3	Joint implementation (Article 6)	132
4.4	The clean development mechanism (Article 12)	134
5.1	Countries and groups used for regional analysis of Annex I commitments	161
5.2	Which way for Russian and Ukrainian greenhouse gas emissions?	170
5.3	Abatement cost modelling in ITEA	172
6.1	Credit generation from joint implementation.	199
6.2	A 'review and assessment' approach to tackling 'hot air' trading	216
7.1	Bilateral versus portfolio approach to the CDM	235
