

# bracket—

**Bracket is an almanac that highlights emerging critical issues at the juncture of architecture, environment, and digital culture. The series looks at thematics in our age of globalization that are shaping the built environment in unexpected yet radically significant ways.**

## — on farming

**Farming harnesses the efficiency of collectivity and community. Whether cultivating land, harvesting resources, extracting energy or delegating labor, farming reveals the interdependencies of a globalized world. Simultaneously, farming represents the local gesture, the productive landscape, and the alternative economy. The processes of farming are mutable, parametric, and efficient.**
