# CONTENTS

<b>Preface</b>	<b>ix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Phenomenological Macroscopic Nature of Metals,	2
1.2 Idealizations of Macroscopic Plastic Behavior,	9
1.3 Small and Large Deformations,	11
1.4 Microscopic Phenomena during Plastic Deformation,	12
References,	13
<b>2 Strain and Stress</b>	<b>15</b>
2.1 Configurations and Displacement,	15
2.2 Deformation Gradient and Deformation of Line, Area, and Volume Elements,	20
2.3 Measures of Finite Deformations,	24
2.4 Decomposition of Deformation Gradient and Principal Stretches,	29
2.5 Velocity, Acceleration, and Material Derivatives,	30
2.6 Velocity Gradient and the Material Derivatives of the Line, Area, and Volume Elements,	32
2.7 Deformation Rate and Spin Tensors,	35
2.8 Material Derivatives of the Strain Tensors,	39
2.9 Forces, Surface Traction, and Cauchy Stress Tensor,	41
2.10 Alternative Stress Measures,	44
2.11 Examples,	46
References,	59

<b>3</b>	<b>General Principles</b>	<b>60</b>
3.1	Conservation of Mass, 61	
3.2	Conservation of Momentum, 64	
3.3	Conservation of Moment of Momentum, 67	
3.4	Conservation of Energy: The First Law of Thermodynamics, 69	
3.5	Clausius-Duhem Inequality: The Second Law of Thermodynamics, 72	
3.6	Principle of Material Objectivity or Frame Indifference, 76	
	References, 81	
<b>4</b>	<b>Yield Criteria</b>	<b>82</b>
4.1	Stress State and Stress Space, 83	
4.2	Yield Surface, 92	
4.3	Yield Criteria for Metals, 94	
4.4	Yield Criteria for Pressure-Sensitive Materials, 104	
4.5	Subsequent Yield Surface, 109	
	References, 117	
<b>5</b>	<b>Classical Theory of Plasticity</b>	<b>119</b>
5.1	Basic Considerations of Plasticity Theory, 119	
5.2	Stress-Strain Relations for Elastic Deformation, 128	
5.3	Volume Change and Poisson's Ratio for Plastic Deformation, 132	
5.4	Levy-Mises Equations, 135	
5.5	Prandtl-Reuss Equations, 138	
5.6	Plastic Potential Theory and Plastic Work, 142	
5.7	Drucker's Stability Postulate and Its Consequences, 146	
5.8	Isotropic Hardening, 156	
5.9	Kinematic Hardening, 160	
5.10	General Stress-Strain Relations for Plastic Deformation, 164	
5.11	Deformation Theory of Plasticity, 177	
	References, 179	
<b>6</b>	<b>Recent Developments in Plasticity</b>	<b>181</b>
6.1	Observations during Cyclic Loading of Metals, 183	
6.2	Mroz's Multisurface Model, 189	
6.3	Dafalias and Popov's Two-Surface Model, 203	
6.4	Nonlinear Kinematic Hardening Model, 214	
6.5	Endochronic Theory of Plasticity, 222	
	References, 237	

<b>7</b>	<b>Finite Plastic Deformation</b>	<b>239</b>
7.1	Basic Considerations,	239
7.2	Kinematics of Finite Plastic Deformation,	245
7.3	Hypoelasticity and Simple Shear,	250
7.4	Plasticity Theory for Finite Deformation,	254
7.5	Plastic Spin,	259
7.6	Corotational Integration of Deformation Rate,	261
7.7	Endochronic Theory for Finite Deformation,	263
7.8	Simple Shear,	269
	References,	276
<b>8</b>	<b>Strain Space Formulations for Plastic Deformation</b>	<b>278</b>
8.1	One-Dimensional Loading Case,	281
8.2	Plasticity Postulate and Its Implications,	285
8.3	Yield Surface in Strain Space,	289
8.4	Constitutive Laws in Strain Space,	291
8.5	Perfect Plasticity and Loading Criterion in Strain Space,	294
8.6	Finite Plasticity in Strain Space,	298
	References,	309
<b>9</b>	<b>Introduction to Dislocation Theory</b>	<b>310</b>
9.1	Crystalline Structure of Metals,	311
9.2	Theoretical Strength of Single Crystals,	318
9.3	Edge and Screw Dislocations,	320
9.4	Properties of Dislocations,	326
	References,	341
<b>10</b>	<b>Plastic Deformation of Single Crystals</b>	<b>343</b>
10.1	Elementary Considerations,	344
10.2	Kinematics of Single-Crystal Deformation,	353
10.3	Elastic-Plastic Constitutive Equations for Single Crystals,	360
10.4	Hardening Rules for Single Crystals,	365
10.5	Rigid Plasticity; Uniaxial Tension,	372
	References,	377
<b>11</b>	<b>Polycrystal Plasticity Theory</b>	<b>379</b>
11.1	Determination of Slip Systems,	381
11.2	Taylor's Rigid Plastic Model for Polycrystals,	390
11.3	Eshelby's Solution for Ellipsoidal Inclusion,	395

- 11.4 Kroner, Budiansky, and Wu's Model, 398
- 11.5 Modification of Kroner, Budiansky, and Wu's Model, 402
- 11.6 Hill's Self-consistent Model, 405
- 11.7 Calculated Results of Self-consistent Models, 408
- References, 415
