Large-Scale Modelling and Interactive Decision Analysis

Proceedings of a Workshop sponsored by IIASA
(International Institute for Applied Systems Analysis)
and the Institute for Informatics of the Academy of Sciences
of the GDR
Held at the Wartburg Castle, Eisenach, GDR,
November 18–21, 1985

FB Mathematik TUD
58201170

Edited by
G. Fandel, M. Grauer, A. Kurzhanski and A.P. Wierzbicki

Fachbereich Mathematik
Technische Hochschule Darmstadt
Bibliothek
Inv.-Nr. B 20 987

Springer-Verlag
Berlin Heidelberg New York London Paris Tokyo

Table of Contents

Part I. Theory and methodology

1. Utility and game theory

On measurable multiattribute value functions based on finite-order independence of structural difference 1
Hiroyuki Tamura and Shiro Hikita (Japan)

Preference separability and value functions 12
P.L. Yu (USA)

Two-person finite games with messages on the nature choices 22
B.S. Metev and Georgi G. Slavov (Bulgaria)

2. Multicriteria optimization theory and interactive procedures

A methodological approach to comparing parametric characterizations of efficient solutions 27
Andrzej P. Wierzbicki (Poland)

On scalarizing method in vector optimization 46
Dinh T. Luc (Vietnam)

Multicriterial duality, examples and advances 52
Alfred Göpfert (GDR)

Concepts of efficiency and fuzzy aggregation rules 59
Jochen Ester (GDR)

Multiregional economic policy-modelling 67
Marc Despontin (Belgium)

Interactive methods for multi-objective integer linear programming 75
J. Teghem Jr. and P.L. Kunsch (Belgium)

Interactive decision making for multiobjective linear programming problems with fuzzy parameters 88
Masatoshi Sakawa and Hitoshi Yano (Japan)

3. Dynamic models and systems

Multiobjective decisions for growth processes of time series 97
Manfred Peschel, Werner Mende (GDR) and Felix Breitenecker (Austria)

Interactive decision analysis and simulation of dynamic systems 107
Felix Breitenecker (Austria)

Pattern formation by natural selection with applications to decision support 117
Hans-Michael Voigt (GDR)

4. Concepts of multicriteria analysis

Rank preservation and propagation of fuzziness in pairwise-comparison methods for multi-criteria decision analysis 127
Freerk Lootsma (The Netherlands)

Learning in decision making 138
Robert Genser (Austria)

Interactive decision analysis for strategic management 148
Ivan Stantchev (Bulgaria)

Multi-objective decision analysis - the right objectives? 155
Eberhard Bischoff (UK)

Part II. Interaction principles and computational aspects

1. User-machine interface and intelligent decision support

Man-machine dialogue interfaces in decision support systems 161
Andrzej Lewandowski (Poland)

Solving discrete multiple criteria problems by using visual interaction 176
Pekka Korhonen (Finland)

Advanced computer applications for large-scale systems analysis 186
Kurt Fedra (Austria)

On an expert system for the design of chemical process systems 200
Klaus Hartmann and Michael Wagenknecht (GDR)

The object-oriented problem solving environment ARK-concept and first experience 215
Werner Gabrisch, Manfred Grauer and Lothar Pollmer (GDR)

2. Computational aspects of decision support

An interactive (optimization-based) decision support system for multi-criteria (nonconcave) control problems 222
R. Straubel and A. Wittmüss (GDR)

Toward the consolidation of interactive multiple objective programming procedures 232
Ralph E. Steuer and Alan W. Whisman (USA)

The interactive multiobjective package IMPROVE with application to strategic planning of carbochemical industry 242
Anne B. Barnikow, Ralph Gollmer and Manfred Grauer (GDR)

Part III. Applications

Experiences with interactive multi-objective linear programming methods in energy planning 251
Matthijs Kok (The Netherlands)

Decision-support model system for long-term water management in open-pit lignite mining areas 267
Stefan Kaden (GDR)

An approach for integrated energy-economy decision analysis: The case of Austria 277
Manfred Strubegger (Austria)

Natural gas trade in Europe and interactive decision analysis 291
Sabine Messner (Austria)

An application of satisficing trade-off method to a blending problem of industrial materials 303
H. Nakayama, J. Nomura, K. Sawada and R. Nakajima (Japan)

Multiobjective systems analysis for impact evaluation of the Hokuriku Shinkansen (Super-express railroad) 314
F. Seo, M. Sakawa, K. Yamane and T. Fukuchi (Japan)

A queueing theoretic model for planning diagnosis systems in hospitals 326
Günter Fandel and Holger Hegemann (FRG)

Decision support model for pest management: a preliminary report 340
Gerald L. Jubb, Subhash C. Narula and John F. Wellington (USA)

Decision support for development strategy in the area of interaction of the industrial and agricultural sectors 347
T. Ryś, M. Skocz, M. Zebrowski and W. Ziembla (Poland)

APPENDIX

List of Participants 358
