Contents

Preface	xi
1 Introduction	1
1. Equilibrium: Some Introductory Concepts	2
1.1. Complete Contingent Claims Equilibrium	2
1.2. Security Market Equilibrium	5
1.3. Arbitrage and Asset Valuation	8
1.4. Asset Pricing Relations	10
1.5. Complete Markets and the Composite Consumer	12
1.6. CAPM and APT	14
2. Risk Aversion	16
2.1. Measures of Risk Aversion	16
2.2. Measures of Increasing Risk	19
3. Aggregation	22
4. Risk-Sharing	26
5. Dynamic Programming	29
5.1. A Consumption and Savings Problem	29
5.2. Mathematical Preliminaries	32
5.3. Optimal Consumption and Savings Choices	36
6. Exercises	37
2 Consumption and Asset Pricing	41
1. A Basic Asset Pricing Model	41
1.1. Discount Bonds and the Yield Curve	51
1.2. Pricing Derivative Instruments	55
1.3. Pricing Contingent Claims Contracts	57
1.4. Portfolio Separation	60
1.5. A Growing Economy	62
2. Extensions of the Basic Model	66
2.1. Habit Persistence and Consumption Durability	66
2.2. Pricing Durable Consumption Goods	68
2.3. The Nonexpected Utility Hypothesis	72
3. Solving Asset Pricing Models	76

4.	Exercises	81
3	Tests of Asset Pricing Relations	87
1.	Euler Equation-Based Tests	88
1.1.	Stochastic Processes: Basic Concepts	90
1.2.	Estimation Method	93
1.3.	Empirical Evidence	99
2.	Volatility Bounds for MRSs	109
3.	Variance Bounds Tests	115
3.1.	The Present-Value Model	115
3.2.	Criticisms of Variance Bounds Tests	119
3.3.	New Developments	121
4.	Conditional Volatility and Nonlinearity in Asset Prices	125
4.1.	Variants of ARCH	126
4.2.	Testing for Nonlinearities	130
5.	Bootstrapping	134
5.1.	Stock Returns and Technical Trading Rules	135
6.	Exercises	139
4	Models with Production and Capital Accumulation	143
1.	The One-Sector Optimal Growth Model	144
1.1.	Optimal Policy Functions	144
1.2.	The Growth Model and the Data	149
2.	Asset Pricing with Production	158
3.	Financial Structure, Taxes and Investment	165
3.1.	Financial Structure of a Firm	165
3.2.	Taxes and Capital Accumulation	175
3.3.	The Q -theory of Investment	179
4.	Dynamic Discrete Choice	185
4.1.	A Search Model	186
4.2.	A Matching Model	189
4.3.	A Model of Replacement Investment	199
5.	Exercises	204
5	Inflation and Asset Returns	209
1.	The Basic Cash-in-Advance Model	209
1.1.	Velocity and Interest Rates	218
1.2.	Inflation Risk and the Inflation Premium	219
2.	Variants of Cash-in-Advance Models	223
2.1.	The Cash-Credit Model	224
2.2.	A Model with a Consumption-Leisure Choice	228

2.3.	Liquidity Effects and Asset Prices	236
3.	Timing of Information	242
4.	Exercises	245
6	International Asset Markets	249
1.	A Two-Country Model	250
1.1.	The Terms of Trade and the Exchange Rate	256
1.2.	Pricing Alternative Assets	260
2.	Variants of the Basic Model	265
2.1.	Nontraded Goods	265
2.2.	Exchange Rates and International Capital Flows	270
3.	The Empirical Behavior of Foreign Exchange Markets	278
3.1.	Regression-Based Tests	279
3.2.	Models of Risk Premia	284
3.3.	Risk Premia or Expectational Errors?	286
3.4.	Modeling Short-Term Changes in Exchange Rates	288
4.	Exercises	291
7	Asset Markets with Heterogeneous Populations	295
1.	Equilibrium Models for Panel Data	296
1.1.	Applications	296
1.2.	A Factor Structure	304
1.3.	Tests of Risk-Sharing	310
1.4.	Extensions	314
2.	Models with Private Information	316
2.1.	The Principal-Agent Problem	318
2.2.	Moral Hazard and Managerial Compensation	324
3.	Exercises	333
	References	339
	Index	369
