

SCIENCE, TECHNOLOGY AND SOCIETY

A Cross-Disciplinary Perspective

Edited by

Ina Spiegel-Rösing and Derek de Solla Price

under the aegis of the

International Council for Science Policy Studies

SAGE Publications
London and Beverly Hills

X

Technische Hochschule Darmstadt
Fachbereich Mechanik
Bibliothek
Inv.-Nr. BM 128/77

CONTENTS

Preface 1

PART ONE THE NORMATIVE AND PROFESSIONAL CONTEXTS

1 The Study of Science, Technology and Society (SSTS): Recent Trends and Future Challenges 7

I. Spiegel-Rösing

Institutional Development and 'Regionalizations'

Origins of the Field · Institutional
Development · Sociopolitical
Regionalization · Cognitive
Regionalization and the Place of
'Scientometrics'

Tendencies and Deficiencies

Some Recent Research Tendencies
in the Field · Humanistic Tendencies
· Relativistic Tendencies · Reflexive
Tendencies · De-simplifying
Tendencies · Normative Tendencies
· Deficiencies · Rhetoric Pathos
· Fragmentation · Lack of
Comparative Research · The Bigness
and Hardness Bias · Future Research

SSTS: Its Audiences, Critics, Tasks

Knowledge Production and Its
Impurities · Application and Its
Impracticabilities · Ethics of Science
and Technology in Society

Bibliography

| | | |
|----------|--|----|
| 2 | Science Policy Studies and the Development of Science Policy <i>Jean-Jacques Salomon</i> | 43 |
| | Introduction | |
| | The Prehistory of Science Policy | |
| | The Rise of Science Policy | |
| | The Age of Pragmatism | |
| | The Age of Questioning | |
| | The New Social Objectives | |
| | The Death and Resurrection of Science Policy | |
| | <i>Bibliography</i> | |

| | | |
|----------|---|----|
| 3 | Criticisms of Science <i>J. R. Ravetz</i> | 71 |
| | An Example from Classical Civilization | |
| | Criticism in the Scientific Revolution | |
| | The Romantic Challenge and Its Descendants | |
| | Modern Radical Criticisms of Science | |
| | Science Policy Studies: From Publicity to Politics | |
| | Doubts Among the Scholars | |
| | Personal Interpretation | |
| | <i>Bibliography</i> | |

**PART TWO SOCIAL STUDIES OF SCIENCE:
THE DISCIPLINARY PERSPECTIVES**

| | | |
|----------|--|----|
| 4 | Sociology of the Scientific Research Community <i>M. J. Mulkey</i> | 93 |
| | Introduction: Pure and Applied Research | |
| | The Norms of Pure Research | |
| | The Distribution of Professional Rewards | |
| | Social Exchange and Social Control | |
| | The Formal and Informal Organization of Pure Research | |
| | Problem Networks and Processes of Communication | |
| | The Development of Research Networks | |
| | Competition and Secrecy | |
| | Intellectual Resistance | |
| | The Future of the Pure Research Community | |
| | Social Characteristics of Applied Research | |
| | Summary | |
| | Evaluation | |
| | <i>Bibliography</i> | |

| | | |
|----------|---|------------|
| 5 | Changing Perspectives in the Social History of Science <i>Roy MacLeod</i> | 149 |
| | Introduction | |
| | The Social History of Science and the Internalist/Externalist Debate | |
| | The Changing Scope of the Social History of Science | |
| | Epistemological Obstacles and Externalist Goals | |
| | <i>Bibliography</i> | |

| | | |
|----------|---|------------|
| 6 | Conditions of Technological Development <i>E. Layton</i> | 197 |
| | Introduction: Science Policy and Technology | |
| | Definitions of Terms · Technology and Technique | |
| | Measurement of the Growth of Technology and Technique | |
| | Production Functions · Patent Statistics · Indirect Social Costs and Benefits of Technological Change · The Study of Innovations · The Flow of Information · Embodiment of Science in Technology | |
| | The Sources of Technical Development: | |
| | Linear-Sequential Models | |
| | Necessary and Sufficient Conditions of Technological Change · Conflicts Among Innovation Studies | |
| | The Role of Science in Historical Perspective | |
| | The History of Technology · Interactions of Science and Technology · The Technological 'Sciences' | |
| | The Institutionalization of Applied Science | |
| | The Interdisciplinary Research Laboratory · Convergence in Research · Government R & D · Industrial R & D · Technological Sophistication and Social Need | |
| | Changing Conceptions of Technology | |
| | <i>Bibliography</i> | |

7 Economics of Research and Development

C. Freeman

223

Introduction

Definitions and Conceptual Framework

- Technology · Technical Change
- Inventions, Innovations and Diffusion
- Research and Experimental Development
- Summary of Definitions

A Historical Review of Economic Thought on Technical Change

- Adam Smith and the Classical Economists · Malthus · Marx · Neoclassical Economics · Schumpeter
- The Economics of Oligopoly and Galbraith

Some Recent Empirical Research

- R & D Statistics and Technological Change · The Sources of Invention and Innovation · Research, Innovation and Size of Firm · Uncertainty, Management of Innovation, and Theory of the Firm
- Project Evaluation, Cost Benefit, Programming and Technology Assessment
- Conclusions and Future Research

Bibliography

8 Psychology of Science

R. Fisch

277

Introduction

General Studies on Scientists and Technologists Motives, Norms and Values, Political Attitudes Motives · Norms and Values · Political Attitudes

Psychological Aspects in the Development of Scientists

- Socialization Processes · Scientific Career · Mobility · Creativity and Productivity · Creativity, Productivity and its Criteria · Creative Scientists
- Sex Differences · Environmental Conditions

Conclusion

Bibliography

9 Models for the Development of Science 319
Gernot Böhme

Introduction

Models for the Development of Science

Phases of the Development of Science: Kuhn's

 Theory of Normal and Revolutionary Science

Continuity in the Development of Science

Evolutionary Development Models

 Historical Change of Developmental Models

The Interaction Between Scientific

 Development and Technical Development

Marxist Concepts of the Development of Science

The State of the Art: Future Prospects

Bibliography

**PART THREE SCIENCE POLICY STUDIES:
THE POLICY PERSPECTIVE**

10 Scientists, Technologists and Political Power 355
Sanford A. Lakoff

Historical Evolution: Past and Present

The Tradition that Science is Politically Neutral

The End of Neutrality and Internationalism

World War II and the Development of the Atomic Bomb

The Atomic Arms Race and the 'Scientists' Movement'

The Expanding Social Role of the Scientist and

 Technologist

The Specter of Technocracy

Political Dimensions: The Political Characteristics

 of Scientists and Technologists

The Political Functions of Scientists and Technologists

 As Advocates of Support · As Advisers · As

 Adversaries

Scientists, Technologists and Social Responsibility

Epilogue: Knowledge and Power in Scholarly Perspective

Bibliography

11 Technology and Public Policy 393
D. Nelkin

Introduction

The Use of Science and Technology

 Allocation of Resources · Strategies

 · Problems of Utilization

Impact of Science and Technology
Areas of Impact · Policy Importance

Control

Participatory Controls · Reactive Controls
Anticipatory Controls

Conclusion

Bibliography

12 Science, Technology and Military Policy 443
Harvey M. Sapolsky

Introduction

Science, Technology and War

Military R & D as a National Priority

The Nature of Modern Weapons

The Organization of Military R & D Efforts

The Effect on the Military: Science and Warfare

Arms Control

Bibliography

13 Science, Technology and Foreign Policy 473
Brigitte Schroeder-Gudehus

Introduction: Historical Perspective

Science and Technology as Power Factors

Goals and Instruments of Foreign Policy

· International Cooperation and

Transnational Actors

The Process of Foreign Policy Making: Adjustments,
Gaps and Barriers

Political Dimensions of the International Scientific
Community

Bibliography

14 Science, Technology and the International System 507
Eugene B. Skolnikoff

General Effects of Scientific and Technological

Development: Introduction

Five General International Effects of Technology

Interdependence · The Meaning of

Warfare · New Patterns of Interactions

and New Actors · Rich and Poor

· Domestic Policy Processes: Foreign

Policy and Feedback to Science Policy

Seven Specific Issue-Areas
Food and Population · Energy · Atomic
Energy · Environment · Oceans · Outer
Space · Technology and Trade,
Multinationals, Transfer of Technology

Approaches to Intergration Across Issue-Areas
Concluding Remarks

Bibliography

15 **Science Policy and Developing Countries** 535
Ziauddin Sardar and Dawud G. Rosser-Owen

Scope and Terminology
Introduction: A Three Faction World?
The Concept of the Occident · The
Development Continuum · Conspicuous
Technology

Historical Perspective
Planning for Development: The
Conventional Views · Internal Sources
of Income · Foreign Aid · Foreign
Loans · Pearson's Report

Some Aspects of Development
The Multidimensional Process · Social
Capital · The Traditional Background
· Educational Systems · Education
and Training · Agriculture and Land
Reform · Industrialization and
Manpower Problems

Some Recent Trends
New Theories of Underdevelopment
· Technology Transfer · The Chinese
Model of Development · Alternative
Technology · The UNCTAD Meetings
