Contents

Preface	vii
1. OBJECT-ORIENTED DATABASES	1
1.1 Object-oriented data model and query language	3
1.2 Index organizations for aggregation graphs	7
1.3 Index organizations for inheritance hierarchies	20
1.4 Integrated organizations	29
1.5 Caching and pointer swizzling	36
1.6 Summary	38
2. SPATIAL DATABASES	39
2.1 Query processing using approximations	40
2.2 A taxonomy of spatial indexes	42
2.3 Binary-tree based indexing techniques	46
2.4 B-tree based indexing techniques	56
2.5 Cell methods based on dynamic hashing	64
2.6 Spatial objects ordering	70
2.7 Comparative evaluation	71
2.8 Summary	73
3. IMAGE DATABASES	77
3.1 Image database systems	78
3.2 Indexing issues and basic mechanisms	80
3.3 A taxonomy on image indexes	84
3.4 Color-spatial hierarchical indexes	91
3.5 Signature-based color-spatial retrieval	105
3.6 Summary	109

4. TEMPORAL DATABASES	113
4.1 Temporal databases	114
4.2 Temporal queries	119
4.3 Temporal indexes	121
4.4 Experimental study	142
4.5 Summary	148
5. TEXT DATABASES	151
5.1 Querying text databases	152
5.2 Indexing	157
5.3 Query evaluation	169
5.4 Refinements to text databases	175
5.5 Summary	181
6. EMERGING APPLICATIONS	185
6.1 Indexing techniques for parallel and distributed databases	186
6.2 Indexing issues in mobile computing	194
6.3 Indexing techniques for data warehousing systems	203
6.4 Indexing techniques for the Web	210
6.5 Indexing techniques for constraint databases	214
References	225
Index	247
