Acknowledgments	ix
Introduction	3
1. Human Capital and Consumption: The Theoretical Framework	7
The Role of an Environmental Variable	7
The Implied Effects on the Household's Demand	11
2. Education as an Environmental Variable	14
Education and the Neutrality Assumption	14
Empirical Implications of Neutrality	20
3. The Engel Curve	22
The Form of the Function	22
The Variables Considered	26
4. An Empirical Test: The 1960 BLS Consumer Expenditures Survey	33
The Goods-Services Dichotomy	35
The Consumption Pattern	39
The Implied Consumption Income Elasticity	48
5. Detailed Expenditure Items	53
Elasticity Estimates for Detailed Items	57
Elasticity Estimates for Composite and Nondurable Items	63
6. Additional Empirical Evidence	72
1950 BLS Consumer Expenditures Survey	72
Consumption Patterns in Israel	77
Children as a Consumption Item	83
7. Summary	86
Appendix A	92
1. Maximizing the Household's Utility	92
2. The Commodity Price	93
3. The Effect of H on Productivity and the Commodity Price	94
4. The Price Level	96
5. The Demand for the Commodity and the Inputs	96
6. The Productivity Model and Utility	99
7. A "Change in Tastes" Interpretation	102

	<i>Page</i>
Appendix B	105
1. The Structure	105
2. The Estimating Equation	106
3. The Direction of Biases	107
4. The Traditional Engel Curve	111
Appendix C	113
1. Perishables-Nonperishables	113
2. Zero Values	114
3. The Effect of Race	117
4. Education Dummies	120
5. Total Current Consumption Expenditure	123
6. The Elasticity of Consumption Income	126
Appendix D	130
1. An Additional Cross-Classification: by Occupation	130
2. The Gainfully Employed	132
Appendix E: Educational Attainment in Israel	134
Bibliography	136
Index	138
