Zenithal light

Doctoral thesis,
Elías Torres Tur

Supervisor: Professor Rafael Serra Florensa
Department of Architectural Construction

This thesis was read on December 10,
1993 before a board composed of:
Prof. José Rafael Moneo Vallés,
Prof. Manuel de Solà-Morales Rubió,
Prof. José Ramón Sierra Delgado,
Prof. Miguel Usandizaga Calparsoro
and Prof. Enric Miralles Moya.

Escola Tècnica Superior
d'Arquitectura de Barcelona,
Universitat Politècnica de Catalunya

CONTENTS

10-15	INTRODUCTION
	Motives
11	Between Two Books
12	In the Light of the Images
15-30	CHAPTER I: Zenithal Light: the Autonomy of Interior Space
16	1. Windows and facades Interiors indifferent to their exterior
20	2. Light descending a staircase Cave light
22	Well light
24	Oculi, drains and rims
26	3. With zenithal light, the roof is the facade
30-41	CHAPTER II: Zenithal Light: Space and Form
32	1. Cones, pyramids, cylinders and spheres Cones Decapitated pyramids
34	Prisms Inscribed prisms Cylinders Inscribed cylinders
36	Spirals
38	Semi spheres on cylinders Spheres, polyhedrons
40	2. Bottles and vessels Vessels within vessels 3. Lampshades
42-69	CHAPTER III: Yearning for the Firmament
44	1. Under the light of the stars On how the Arabs bathed On stars again
46	Roofs of heavenly bodies
48	Traces of heavenly bodies Stars on the plane For roofs of stars
50	Opaque ceilings, light of stars Queens of the Night: The Magic Flute Constellations
52	In the open air at night Evoking the stars 2. The sun
54	The Pantheon as a model of the sun
56	Oculus rays: protagonists of the domes Weightless rays
58	Sun over nebulae and fireworks
60	Sun flakes. Interwoven rays
62	3. Daylight skies Through Romantic ruins Domes with a floating sun
64	Skies painted blue with clouds, birds and branches 4. Paradise on the ceiling
66	Heavenly domes Fragments of architecture painted on Heaven
68	Paintings of Architecture and Heaven
70-95	CHAPTER IV: Its Corporeal Manifestations
72	1. Rays and cones Zenithal light, heavenly light
74	Scratching the walls with zenithal light
76	2. Light stains, Sun dyes
78	3. It rains light
80	4. Forms of the sun Halos, aureoles, crowns, tonsures, skullcaps and Hosts

82	5. Luminous screens Zenithal shades Tingers of light Sails	168 170	Between modules 2. Overlapping roofs Stairs of light ...of concentric rings
84	Light within water or glass	172	Overlapping folds Shells, scales
86	6. Wrappings of light Hanging bodies of light	174	3. Between supports: grids, basketry Drop curtains?
88	Packed light	176	Large spans
90	7. Walled light, sculpted light Truncated cones	178 182	Eliminating fragments of roof between beams Against the wall Cracks against the wall Same shape, different material Between grids
92	Light caves Light chambers		Shades between grids Laced light Dotted light Triangular light roofs Triangles and three-dimensional rhombuses Mantillas Between branches and leaves Domes Belfries Woven baskets
96-115	CHAPTER V: Stagings	184 186	4. Raised roofs Domes bitten by light Light pressure: roofs floating on light Horizontal light crevices: radiant roofs
98	1. Zenithal floodlights and scenes of interior architecture	188	5. Lifting fragments of the roof Waves and saws Lifted and crossed Beaks and swellings Simple superimpositions
102	2. Vertical breachings	190	
104	Double and triple light vaults	192	
106	3. Museums: stage sets for objects	194	
110	4. Scenes of zenithal light in paintings, sculptures and altars	198 200	
116-161	CHAPTER VI: The Skylighter's Surgical Instruments: cuttings, trimmings, puncturings, breachings, ducts, diving helmets, hoods, lanterns...	204 206 208 210	
118	1. Piercings, puncturings and cuttings	212-239	CHAPTER VIII: Zenithal Light Conquers Large Expanses
120	2. Cuttings and trimmings In domes	214 218	1. Modules with zenithal light 2. Vessels, suns and moons Forests of sunshades 3. Light injections for intense darkness 4. Light wells in the centre of buildings 5. Alternating solids and voids 6. Adjoining linear roofs Continuous materials Large expanses 7. Vertical and horizontal growth Juxtaposing various bodies with zenithal light
124	Strokes of the saw Cutting slabs	220 222	
126	Interior cleftsp Circular cuttings	224 226	
128	Assorted cuttings	230	
130	Cuttings for windows that hesitate between walls and roofs	240-257	CHAPTER IX: Zenithal Light and the City
132	3. Glass bodies on the roof Laid upon or inlaid Glass urns	242 244	1. The top floor 2. Exterior spaces as interiors because of zenithal light 3. Cases in which... Exterior spaces that seem interior 4. Sventramenti 5. Zenithal city buildings
134	Pyramids Assorted glass objects	246 252 254	
136	4. Ducts Pipes as chimneys Protagonist ducts When ducts dive into interiors	256-257	
138	Interior hoods	258-275	
142	5. Chimneys, collectors, snorkels and diving helmets Chimney exteriors Towers for capturing the wind Hoods and diving helmets	262 263 265	
146	Sun ducts	276-277	
150	6. Buildings on the roof, or so they seem	278-290	
152	7. Lanterns and lantern domes Light towers Protecting the oculus: lanterns		
154	The domes of the Pantheon and St Peter's as universal models Lantern domes on the facade High domes: sometimes, mere spectacle Wrapped domes: only lanterns emerge		
156	Lanterns: they come in every possible style Lanterns as buildings. Guarino Guarini		
158	Special cases		
160	Cone lanterns		
162-211	CHAPTER VII: Through the Structure's Interstices		
164	1. Superjoints Slivers		
166	Between bodies Detached slabs, hanging roofs
