# CONTENTS

PREFACE ix

**part one** INTRODUCTION 1

<b>1</b>	<b>Operations Research and the Management Process</b>	<b>2</b>	
1.1	The Process of Want Satisfaction		3
1.2	The Objectives of Organized Activity		5
1.3	Alternative Courses of Action		7
1.4	Effectiveness and Efficiency		8
1.5	The Quantitative Approach to Decisions		10
1.6	Applying Operations Research		12
<b>2</b>	<b>Models and Simulation in Operations Research</b>	<b>16</b>	
2.1	A Classification of Models		17
2.2	The Simulation Process		19
2.3	Formulating and Manipulating the Model		22
2.4	Control of the Solution		24
2.5	The Application of Models		25

<b>3</b>	<b>Some Fundamentals of Probability and Statistics</b>	<b>30</b>	
	3.1 Probability Concepts and Theory		31
	3.2 Discrete Probability Distributions		36
	3.3 Continuous Probability Distributions		41
	3.4 Summary of Probability Distributions		44
	3.5 Descriptive Statistics		47
	3.6 Inferential Statistics		54
	3.7 Regression and Correlation		60
	3.8 Monte Carlo Analysis		65
	<b>part two</b>	<b>ECONOMIC MODELS FOR PRODUCTION OPERATIONS</b>	<b>73</b>
<b>4</b>	<b>Cost and Income Models for Production Processes</b>	<b>74</b>	
	4.1 The Production System		75
	4.2 Classes of Production Costs		77
	4.3 Break-Even Production Models		80
	4.4 Break-Even Analysis Involving Price		88
	4.5 The Production Function		89
<b>5</b>	<b>Interest, Depreciation, and Economic Equivalence</b>	<b>102</b>	
	5.1 The Time Value of Money		103
	5.2 Interest Formulas		105
	5.3 The Concept of Depreciation		112
	5.4 Depreciation Models		115
	5.5 Evaluating a Single Alternative		125
	5.6 Evaluating Multiple Alternatives		129
<b>6</b>	<b>Models for Equipment Replacement</b>	<b>136</b>	
	6.1 Considerations Leading to Replacement		137
	6.2 The Basic Replacement Model		138
	6.3 The Optimum Replacement Interval		142
	6.4 The MAPI Replacement Algorithm		146
	6.5 Replacement Under Inflation and Increased Productivity		148
	6.6 Replacements of Units that Fail		161
	<b>part three</b>	<b>MODELS FOR PRODUCTION AND PROJECT CONTROL</b>	<b>171</b>
<b>7</b>	<b>Manufacturing Progress Models</b>	<b>172</b>	
	7.1 Manufacturing Improvements		173
	7.2 The Graphical Function		177

7.3	The Analytical Model	181
7.4	Defining the Progress Function	186
7.5	Applications of the Progress Function	189
7.6	Other Forms of the Progress Function	193
<b>8</b>	<b>Models for Production Sequencing</b>	<b>200</b>
8.1	Flow Shop Sequencing for Two Machines	201
8.2	Flow Shop Sequencing for Several Machines	204
8.3	The Job Shop Sequencing Problem	211
8.4	Comparison of Job Shop Sequencing Rules	215
<b>9</b>	<b>Models for Project Planning and Control</b>	<b>228</b>
9.1	Deterministic Project Control—CPM	229
9.2	An Example of Project Control with CPM	231
9.3	Probabilistic Project Control—PERT	235
9.4	An Example of Project Control with PERT	237
9.5	The Economy of Project Control	239
<b>part four</b>	<b>STATISTICAL MODELS FOR QUALITY ASSURANCE</b>	<b>249</b>
<b>10</b>	<b>Models for Statistical Quality Control</b>	<b>250</b>
10.1	The Concept of Statistical Control	251
10.2	Control Charts for Variables	255
10.3	Operating Characteristics of $\bar{X}$ Charts	262
10.4	Control Charts for Attributes	266
<b>11</b>	<b>Methods of Acceptance Sampling</b>	<b>282</b>
11.1	The Concept of Acceptance Sampling	283
11.2	Acceptance Sampling by Attributes	288
11.3	Acceptance Sampling by Variables	301
11.4	Systems of Acceptance Sampling Plans	304
11.5	The Economy of Acceptance Sampling	308
<b>part five</b>	<b>PROCUREMENT AND INVENTORY MODELS</b>	<b>315</b>
<b>12</b>	<b>Deterministic Procurement and Inventory Models</b>	<b>316</b>
12.1	The Procurement and Inventory System	317
12.2	The Decision Environment	320
12.3	The Purchase Alternative	323
12.4	The Manufacture Alternative	326
12.5	Making the Source Decision	329
12.6	Models for Variable Item Cost	331

12.7	Models for Finite Shortage Cost	335
<b>13</b>	<b>Probabilistic Inventory Models</b>	<b>348</b>
13.1	Monte Carlo Analysis of Inventory Flow	349
13.2	Expressions for Expected Values	354
13.3	The Distribution of Lead Time Demand	358
13.4	Expressions for Shortage Condition	361
13.5	The Minimum Cost Inventory Policies	366
13.6	Minimum Cost Policies for a Simplified System	369
13.7	A Single Period Inventory Model	373
	<b>part six</b>	
	<b>MODELS FOR</b>	
	<b>WAITING-LINE OPERATIONS</b>	<b>379</b>
<b>14</b>	<b>Deterministic Waiting-Line Models</b>	<b>380</b>
14.1	The Waiting-Line System	381
14.2	The Decision Environment	383
14.3	Models for No Initial Waiting Line	386
14.4	A Model with an Initial Waiting Line	390
14.5	An Approximation for Total Waiting Time	394
14.6	A General Numerical Solution Method	396
<b>15</b>	<b>Probabilistic Waiting-Line Models</b>	<b>402</b>
15.1	Monte Carlo Analysis of Waiting Lines	403
15.2	Single Channel Waiting-Line Derivations	407
15.3	The Distribution of Waiting Time	413
15.4	Multiple Channel Waiting-Line Derivations	417
15.5	Poisson Arrivals with Nonexponential Service	419
15.6	Finite Population Models	423
15.7	Finite Population Models and Maintenance	427
15.8	A General Solution Method	432
	<b>part seven</b>	
	<b>PROGRAMMING</b>	
	<b>MODELS FOR OPERATIONS</b>	<b>439</b>
<b>16</b>	<b>Distribution Models</b>	
	<b>of Linear Programming</b>	<b>440</b>
16.1	The Assignment Model	441
16.2	The Traveling Salesman Problem	448
16.3	The Transportation Model	454
16.4	Vogel's Approximation Method	463
<b>17</b>	<b>The General Linear Programming Model</b>	<b>472</b>
17.1	Graphical Solution Methods	473

17.2 Maximizing by the Simplex Method	480
17.3 Minimizing by the Simplex Method	484
17.4 Degeneracy and Equality Constraints	486
17.5 Matrix Interpretation of Linear Programming	491
17.6 Duality in Linear Programming	493
17.7 The Revised Simplex Method	495
<b>18 Some Applications of Dynamic Programming</b>	<b>506</b>
18.1 The Concept of Dynamic Programming	507
18.2 A Capital Investment Problem	511
18.3 A Shipping Problem	515
18.4 A Procurement Problem	518
18.5 A Replacement Problem	522
<b>Appendices</b>	<b>531</b>
A Statistical Tables	533
B Interest Tables	543
C Progress Function Tables	555
D Finite Queuing Tables	559
E Selected References	567
