

# **GLOBAL STRUCTURAL ANALYSIS OF STEEL BOX GIRDER**

## **BRIDGES FOR VARIOUS LOADS**

Assoc. Prof. Encho M. Dulevski  
University of Architecture Civil Engineering and Geodesy  
Steel Structures Division  
1 Chr. Smirnenski Boulevard  
Sofia 1421  
Bulgaria

# TABLE OF CONTENTS

	Page
SUMMARY	3
1. FOREWORD	4
2. SYMBOLS	4
3. STRUCTURE USED FOR NUMERICAL ANALYSIS	5
4. BOX GIRDER UNDER VERTICAL LOADS	6
4.1 Features of the design process	6
4.2 Longitudinal stresses	7
4.3 Shear forces and diaphragm forces	9
4.4 Deformations	10
4.5 On the support conditions	12
5. BOX GIRDER UNDER WIND LOADS	13
5.1 Wind loads	13
5.2 Shape factors	14
5.3 Load vector (matrix)	15
5.4 Output results	16
5.5 Numerical results	16
6. BOX GIRDER UNDER LONGITUDINAL FORCES	18
6.1 State of the problem	18
6.2 Input data	18
6.3 Influence surfaces	18
6.4 Longitudinal stresses	20
6.5 Further discussion on the support conditions	21
7. EFFECTS OF TEMPERATURE DIFFERENCE	21
7.1 Temperature difference	21
7.2 Load vector	22
7.3 Numerical simulation	23
8. SUPPORT DISPLACEMENTS	25
9. CONCLUSION	26
10. REFERENCES	26
