

ALUMINUM STRUCTURES

A Guide to Their Specifications and Design

J. Randolph Kissell

Robert L. Ferry

The TGB Partnership

A WILEY-INTERSCIENCE PUBLICATION

JOHN WILEY & SONS, INC.

New York • Chichester • Brisbane • Toronto • Singapore

CONTENTS

| | |
|--------------------------------------|-----------|
| I INTRODUCTION | 1 |
| 1 What's In This Book? | 3 |
| 2 What Is Aluminum? | 5 |
| 2.1 Metal in Construction | 5 |
| 2.2 Many Metals From Which to Choose | 7 |
| 2.3 Aluminum—The Metal of Choice | 8 |
| 2.4 Aluminum Alloys | 10 |
| 2.5 Examples of Aluminum Structures | 13 |
| 3 Working With Aluminum | 21 |
| 3.1 Product Forms | 21 |
| 3.1.1 Extrusions | 21 |
| 3.1.2 Sheet and Plate | 36 |
| 3.1.3 Castings | 48 |
| 3.1.4 Forgings | 51 |
| 3.1.5 Preformed Products | 52 |
| 3.2 Coatings and Finishes | 54 |
| 3.2.1 Mill Finish | 54 |
| 3.2.2 Anodized Finishes | 55 |
| 3.2.3 Painted Finishes | 58 |
| 3.2.4 Mechanical Finishes | 59 |
| 3.2.5 Cladding | 60 |
| 3.2.6 Roofing and Siding Finishes | 60 |
| 3.3 Erection | 61 |

| | | |
|-----------|--|-----------|
| II | STRUCTURAL BEHAVIOR OF ALUMINUM | 63 |
| 4 | Material Properties for Design | 65 |
| 4.1 | Mechanical Properties | 65 |
| 4.2 | Elongation | 66 |
| 4.3 | Typical Versus Minimum Properties | 67 |
| 4.4 | The Shear Modulus G | 67 |
| 4.5 | The Effect of Welding on Mechanical Properties | 67 |
| 4.6 | The Effect of Temperature on Mechanical Properties | 68 |
| 4.7 | Physical Properties | 69 |
| 4.8 | Aluminum Material Specifications | 69 |
| 4.9 | Alloy Identification | 69 |
| 4.10 | Certification Documentation | 71 |
| 5 | Explanation of the Aluminum Specifications | 73 |
| 5.1 | Tension Members | 73 |
| 5.1.1 | Tensile Strength | 74 |
| 5.1.2 | Threaded Parts in Axial Tension | 81 |
| 5.1.3 | Net Area | 82 |
| 5.1.4 | Effective Net Area | 84 |
| 5.1.5 | Maximum Slenderness Ratios for Tension Members | 86 |
| 5.2 | Compression Members | 86 |
| 5.2.1 | Overall Buckling | 89 |
| 5.2.2 | Local Buckling | 106 |
| 5.3 | Members in Bending | 131 |
| 5.3.1 | Bending Yielding and Fracture | 131 |
| 5.3.2 | Bending Buckling | 140 |
| 5.3.3 | Bending Shear | 158 |
| 5.4 | Torsion | 163 |
| 5.4.1 | St. Venant Torsion | 165 |
| 5.4.2 | Warping Torsion | 167 |
| 5.4.3 | A Final Note | 169 |
| 5.5 | Combined Stresses | 169 |
| 5.5.1 | Combined Axial Compression and Bending | 169 |
| 5.5.2 | Combined Tension and Bending | 171 |
| 5.5.3 | Combined Shear, Compression, and Bending | 172 |

| | | |
|------------|---|------------|
| 6 | Orientation to the Aluminum Specifications | 175 |
| 6.1 | Background | 175 |
| 6.2 | The Aluminum Design Manual | 178 |
| III | DESIGN CHECKS FOR STRUCTURAL COMPONENTS | 183 |
| 7 | Structural Members | 185 |
| 7.1 | Tension Member Design Procedure | 185 |
| 7.1.1 | Net Effective Area | 186 |
| 7.1.2 | Allowable Stress | 187 |
| 7.1.3 | Tensile Capacity | 187 |
| 7.2 | Compression Member Design Procedure | 187 |
| 7.2.1 | Overall Column Slenderness Ratio | 188 |
| 7.2.2 | Slenderness Ratio of Cross-Sectional Elements | 189 |
| 7.2.3 | Allowable Column Stress of Typical Shapes | 189 |
| 7.2.4 | Summary of Column Allowable Stress | 195 |
| 7.3 | Bending Member Design Procedure | 195 |
| 7.3.1 | Bending Tension | 197 |
| 7.3.2 | Bending Compression | 197 |
| 7.3.3 | Shear | 202 |
| 7.4 | Combined Stresses Design Procedure | 202 |
| 7.4.1 | Combined Axial Compression and Bending | 202 |
| 7.4.2 | Combined Tension and Bending | 203 |
| 7.4.3 | Combined Shear, Compression, and Bending | 204 |
| 8 | Connections | 205 |
| 8.1 | Mechanical Connections | 205 |
| 8.1.1 | Introduction | 205 |
| 8.1.2 | Types of Fasteners | 206 |
| 8.1.3 | Fastener Material Selection | 212 |
| 8.1.4 | Fastener Mechanical Properties | 213 |
| 8.1.5 | Types of Loads on Fasteners | 215 |
| 8.1.6 | Types of Bolted Connections | 216 |
| 8.1.7 | Holes | 217 |

- 8.1.8 Failure Modes for Mechanically Fastened Joints 219
- 8.1.9 Tensile Loads on Fasteners 220
- 8.1.10 Shear Loads on Fasteners 223
- 8.1.11 Combined Shear and Tension on Bolts 227
- 8.1.12 Bearing and Edge Distance 228
- 8.1.13 Tension Strength of Connected Parts 229
- 8.1.14 Shear Rupture 229
- 8.1.15 Minimum Spacing and Edge Distance 230
- 8.1.16 Maximum Edge Distance and Spacing 232
- 8.1.17 Screw Connections 232
- 8.1.18 Minimum Requirements for Connections 236
- 8.2 Welded Connections 237
 - 8.2.1 Aluminum Welding Processes 237
 - 8.2.2 Selecting a Filler Alloy 238
 - 8.2.3 Types of Welds 239
 - 8.2.4 Comparing Aluminum and Steel Safety Factors 244
 - 8.2.5 Weld Fabrication 244
 - 8.2.6 Weld Quality Assurance 245

9 Special Provisions

247

- 9.1 Welded Members 247
 - 9.1.1 Types of Welded Members 247
 - 9.1.2 What Welding Does to Aluminum 247
 - 9.1.3 Strengths of Fully Weld-Affected Members 251
 - 9.1.4 Strengths of Partially Weld-Affected Members 251
 - 9.1.5 Welded Tension Members 256
 - 9.1.6 Welded Compression Members 258
 - 9.1.7 Post-Weld Heat Treatment 262
- 9.2 Fatigue 262
 - 9.2.1 Fatigue: What Is It Again? 262
 - 9.2.2 Fatigue Design: The Ground Rules 264
 - 9.2.3 Variable Amplitude Fatigue Design 268
 - 9.2.4 Aluminum Versus Steel in Fatigue 270

| | | | |
|-----------|--|-----|------------|
| 9.2.5 | Other Factors in Fatigue | 270 | |
| 9.2.6 | A Final Word | 270 | |
| IV | DESIGN OF STRUCTURAL SYSTEMS | | 271 |
| 10 | Structural Systems Built With Aluminum | | 273 |
| 10.1 | Cold-Formed Aluminum Construction | 273 | |
| 10.1.1 | Building Sheathing | 273 | |
| 10.1.2 | Cold-Formed Aluminum Design | 280 | |
| 10.1.3 | Elastically Supported Flanges | 286 | |
| 10.2 | Aluminum Frames | 287 | |
| 10.2.1 | System Description | 287 | |
| 10.2.2 | Model for Analysis | 289 | |
| 10.2.3 | Getting Started | 290 | |
| 10.2.4 | Analyzing the Dome | 294 | |
| 10.2.5 | Design Checks | 298 | |
| V | LOAD AND RESISTANCE FACTOR DESIGN | | 311 |
| 11 | Load and Resistance Factor Design | | 313 |
| 11.1 | New Tricks for Old Dogs | 313 | |
| 11.2 | LRFD—The Concept | 314 | |
| 11.3 | What's New: Load Factors | 315 | |
| 11.4 | What's the Same | 317 | |
| 11.5 | When Do I Use LRFD? | 317 | |
| 11.6 | Which Way Lets Me Use Less Metal? | 318 | |
| 11.7 | The General Expression for Comparing LRFD to ASD | 321 | |
| 11.8 | How They Came Up With the LRFD Specifications | 323 | |
| 11.9 | How Do I Actually Start Using LRFD? | 329 | |
| | Glossary | | 331 |
| | Technical Organizations | | 347 |
| | References | | 351 |
| | Appendices | | |
| A | Aluminum Extruders | 355 | |
| B | Section Properties of Common Aluminum Shapes | 359 | |

- C Minimum Mechanical Properties of Aluminum Alloys 363
- D Allowable Stresses for Elements of Common Aluminum Shapes 373
- E Design Stresses for Elements of Common Aluminum Shapes 377
- F Column Buckling Allowable Stress 381
- G Summary of the Aluminum Specifications Design Provisions 383
- H Cross Reference to the Specifications for Aluminum Structures 385
- I LRFD Design Stresses for Aluminum 389
