Econometric Decision Models

Proceedings of a Conference
Held at the University of Hagen, West Germany,
June 19 – 20, 1981

Edited by Josef Gruber

GRUBER, J.:

"Introduction: Towards observed preferences in econometric decision models"

1

PROBLEM AREA 1: *Econometric decision models in theory and practice: experiences and problems in large-scale applications, recent developments in theory and methods (except those of problem areas 2 and 3 below)*

FISCHER, J. and UEBE, G.:

"The "optimal" control of the RWI-model"

10

HEIKE, H.D. and ROSSA, H.:

"Optimal stabilization with a quarterly model of the Federal Republic of Germany"

21

RIESS, H. Ch.:

"Some experiences with the control of a macroeconomic model with a scalarvalued objective function from the viewpoint of applied economic research"

48

KIRCHGÄSSNER, G.:

"An application of optimal control to a small model of politico-economic interaction"

55

BAUM, Ch. F.:

"Evaluating macroeconomic policy: Optimal control solutions versus suboptimal alternatives"

81

KENDRICK, D.:

"Adaptive control of macroeconomic models" (abstract)

110

LESERER, M.:

"A fine-tuning scheme for economic decision rules"

111

FROMMHOLZ, H. and WOLTERS, J.:

A control-theoretic analysis for a small econometric model of the Federal Republic of Germany"

116

FRIEDMANN, R.:

"The asymptotic distribution of optimal policy feedback coefficients"

131

HAAS, H.:

"Conflict, cooperation and social preference functions"

148

PETKOVSKI, D.B.:

"Decentralized control strategies for large-scale discrete-time systems"

170

HEADY, E.O., LANGLEY, J.A., and HUANG, W.:

"A recursive adaptive hybrid model for national and interregional analysis"

183

<u>PROBLEM AREA 2:</u>	<i>Methods for obtaining the weights and target values in the scalarvalued objective function of (e.g.) the linear-quadratic econometric decision model</i>	Page
STÜPPLER, S. and STEIN, J.-P.:	"A study of adaptive revision of target values in an econometric decision model"	221
MERKIES, A.H.Q.M. and NIJMAN, TH.E.:	"The measurement of quadratic preference functions with small samples"	242
ANCOT, J.P. and HUGHES HALLETT, A.J.:	"The determination of collective preferences in economic decision models: With an application to Soviet economic policy"	263
<u>PROBLEM AREA 3:</u>	<i>Methods for avoiding the necessity of explicitly specifying and quantifying a scalarvalued objective function before solving the econometric decision model</i>	
DEISSENBERG, Ch.:	"Interactive solution of multiple objective, dynamic, macroeconomic stabilization problems: A comparative study"	305
WALLENIOUS, H. and WALLENIOUS, J.:	"A methodology for solving the multiple criteria macroeconomic policy problem"	310
STREUFF, H. and GRUBER, J.:	"The interactive multiobjective optimization method by Elemer E. Rosinger: A computer program and aspects of applications"	334
