
Management of Deteriorating Concrete Structures

George Somerville

Taylor & Francis

Taylor & Francis Group

LONDON AND NEW YORK

Contents

<i>List of Figures</i>	xiii
<i>List of Tables</i>	xvii
<i>Preface</i>	xxi
<i>Acknowledgements</i>	xxiii
1 Introduction	1
1.1 <i>Background</i>	1
1.2 <i>The book in outline</i>	3
1.2.1 <i>General</i>	3
1.2.2 <i>Scope and key points</i>	3
1.2.2.1 <i>Chapter 2 Feedback and perspective on deterioration</i>	3
1.2.2.2 <i>Chapter 3 Management and maintenance systems</i>	5
1.2.2.3 <i>Chapter 4 Defects, deterioration mechanisms and diagnosis</i>	6
1.2.2.4 <i>Chapter 5 Preliminary structural assessment</i>	6
1.2.2.5 <i>Chapter 6 Detailed structural assessment</i>	7
1.2.2.6 <i>Chapter 7 Protection, prevention, repair, renovation and upgrading</i>	9
1.2.2.7 <i>Chapter 8 Back to the future</i>	11
2 Feedback and perspective on deterioration	12
2.1 <i>General survey data</i>	12
2.2 <i>Environment and local micro-climate</i>	17
2.3 <i>Effect of design, detailing and construction quality</i>	25
2.4 <i>Performance of remedial/repair systems in the field</i>	29

- 2.5 *Structural issues* 33
 - 2.5.1 *Historical context* 33
 - 2.5.2 *What constitutes 'failure'?* 41
 - 2.5.3 *Structural sensitivity versus hidden strengths* 42
- 2.6 *Summary of Chapter 2* 44
 - References* 45

3 Management and maintenance systems 48

- 3.1 *Introduction and history* 48
- 3.2 *Some examples of current guidance on asset management* 52
 - 3.2.1 *Type 1: General national and international guidance* 52
 - 3.2.1.1 *Institution of Structural Engineers, UK. Appraisal of existing structures [3.9]* 52
 - 3.2.1.2 *American Concrete Institute (ACI). Strength evaluation of existing concrete buildings [3.10]* 52
 - 3.2.1.3 *Canadian Standards Association. Existing bridge evaluation [3.11]* 53
 - 3.2.1.4 *CEB/fib activity [3.12, 3.13]* 53
 - 3.2.1.5 *Concrete Society Technical Report 54 [3.14]* 56
 - 3.2.2 *Type 2: Structure specific – bridges* 56
 - 3.2.2.1 *Highway bridge structures in the UK* 56
 - 3.2.2.2 *BRIME, PONTIS and DANBRO* 60
 - 3.2.2.3 *The Swedish Bridge Management System: SAFE BRO* 61
 - 3.2.3 *Type 2: Structure specific – other structures* 63
 - 3.2.3.1 *Multi-storey car parks (MSCP)* 63
 - 3.2.3.2 *Ports, harbours, maritime structures* 65
 - 3.2.3.3 *General civil engineering* 66
 - 3.2.3.4 *Nuclear power installations* 68
 - 3.2.4 *Type 3: Aggressive actions* 69
 - 3.2.4.1 *Introduction* 69
 - 3.2.4.2 *Alkali-silica reaction* 70
 - 3.2.4.3 *Corrosion* 71
 - 3.2.4.4 *Freeze-thaw action* 71
 - 3.2.4.5 *Different forms of sulfate attack* 72
 - 3.2.4.6 *Summary of 3.2.4 – Aggressive actions* 72
 - 3.2.5 *Type 4 – Inspection and testing procedures* 73
- 3.3 *General principles and objectives* 74
 - 3.3.1 *Introduction* 74

3.3.2	<i>Elements/factors in an asset management system</i>	75
3.3.3	<i>Implications for 'action modules'</i>	77
	<i>References</i>	82
4	Defects, deterioration mechanisms and diagnosis	85
4.1	<i>Introduction</i>	85
4.2	<i>Identification of defects and their causes</i>	90
4.2.1	<i>Introduction</i>	90
4.2.2	<i>Cracking</i>	90
4.2.3	<i>Other sources of defects</i>	92
4.3	<i>Aggressive actions</i>	93
4.3.1	<i>Introduction</i>	93
4.3.2	<i>Overall perspective</i>	93
4.3.3	<i>Material considerations</i>	96
4.3.3.1	<i>Cements</i>	96
4.3.3.2	<i>Aggregates</i>	100
4.3.3.3	<i>Concrete</i>	100
4.3.3.4	<i>Reinforcement and prestressing steel</i>	104
4.3.4	<i>Corrosion</i>	104
4.3.4.1	<i>Carbonation</i>	104
4.3.4.2	<i>Chloride ingress</i>	105
4.3.4.3	<i>Notes on the corrosion process</i>	106
4.3.5	<i>Sulfate attack</i>	108
4.3.5.1	<i>'Conventional' sulfate attack</i>	108
4.3.5.2	<i>The thaumasite form of sulfate attack (TSA)</i>	109
4.3.5.3	<i>Delayed ettringite formation (DEF)</i>	110
4.3.6	<i>Alkali-silica reaction (ASR)</i>	111
4.3.7	<i>Freeze-thaw action</i>	111
4.3.8	<i>Leaching</i>	113
4.3.9	<i>Acid attack</i>	113
4.3.10	<i>Other substances</i>	114
4.4	<i>Influence of the environment and micro-climate</i>	114
4.5	<i>Inspection, testing and preliminary diagnosis</i>	118
4.5.1	<i>Background and approach</i>	118
4.5.2	<i>Test options</i>	122
4.5.3	<i>Test locations and sampling</i>	122
4.5.4	<i>Selection of tests to confirm a provisional diagnosis</i>	124
4.6	<i>Interpretation and evaluation: pre-preparation for preliminary assessment</i>	124
	<i>References</i>	130

5	Preliminary structural assessment	132
5.1	<i>Introduction</i>	132
5.2	<i>Interpretation of test data</i>	133
5.2.1	<i>Introduction</i>	133
5.2.2	<i>Collection and classification of data</i>	134
5.2.3	<i>Overview of data interpretation</i>	135
5.3	<i>Engineering perspective in support of damage classification</i>	140
5.3.1	<i>Introduction</i>	140
5.3.2	<i>Overall picture</i>	140
5.3.3	<i>Structural analysis in perspective</i>	142
5.3.4	<i>Structural sensitivity versus hidden strengths</i>	150
5.3.5	<i>Engineering perspective of corrosion</i>	150
5.4	<i>Preliminary assessment; general principles and procedures</i>	153
5.5	<i>Preliminary assessment for alkali-silica reaction</i>	155
5.5.1	<i>Introduction</i>	155
5.5.2	<i>Free or restrained expansion</i>	155
5.5.3	<i>Residual mechanical properties</i>	156
5.5.4	<i>Structural detailing</i>	158
5.5.5	<i>Consequences of failure</i>	160
5.5.6	<i>Structural element severity ratings: SISD</i>	160
5.5.7	<i>Local micro-climate: moisture state</i>	162
5.5.8	<i>Stress levels due to dead and imposed loading</i>	162
5.5.9	<i>Deciding on the next steps</i>	162
5.6	<i>Preliminary assessment for frost action</i>	165
5.6.1	<i>Introduction</i>	165
5.6.2	<i>Classification of consequences of failure</i>	165
5.6.3	<i>Internal mechanical damage</i>	166
5.6.3.1	<i>Reduction in mechanical properties – indicative values</i>	166
5.6.3.2	<i>Classification of the environment</i>	167
5.6.3.3	<i>Structural element severity ratings: SISD</i>	168
5.6.4	<i>Salt frost scaling</i>	168
5.6.5	<i>Deciding on the next step</i>	169
5.6.6	<i>Synergetic effects</i>	170
5.7	<i>Preliminary assessment for corrosion</i>	170
5.7.1	<i>Introduction</i>	170
5.7.2	<i>Consequences of failure</i>	171
5.7.3	<i>Basis for SISD ratings for corrosion</i>	171
5.7.4	<i>Simplified corrosion index (SCI)</i>	172
5.7.4.1	<i>Corrosion damage index (CDI)</i>	172

5.7.4.2	<i>Environmental aggressivity factor (EAF)</i>	173
5.7.4.3	<i>Evaluating the SCI from Tables 5.25 and 5.26</i>	173
5.7.5	<i>Simplified Structural Index (SSI)</i>	173
5.7.6	<i>Structural element severity ratings (SISD) for corrosion</i>	176
5.8	<i>The nature and timing of intervention</i>	178
	<i>References</i>	179
6	Detailed structural assessment	181
6.1	<i>Introduction</i>	181
6.2	<i>Physical effects of deterioration</i>	183
6.3	<i>Minimum technical performance</i>	185
6.3.1	<i>Introduction</i>	185
6.3.2	<i>Serviceability factors</i>	186
6.3.2.1	<i>Reductions in section or mechanical properties</i>	186
6.3.2.2	<i>Cracking</i>	187
6.3.2.3	<i>Corrosion</i>	187
6.3.3	<i>Safety levels</i>	187
6.4	<i>The use of mechanical properties of materials in design</i>	190
6.4.1	<i>Introduction</i>	190
6.4.2	<i>Mechanical properties for concrete</i>	191
6.4.3	<i>Mechanical properties for reinforcement and prestressing steel</i>	193
6.5	<i>Analysis of structures</i>	196
6.6	<i>Overview of the effects of deterioration on the strength of elements and sections</i>	199
6.6.1	<i>Flexure</i>	200
6.6.2	<i>Compression</i>	202
6.6.2.1	<i>Section capacity</i>	203
6.6.2.2	<i>Element behaviour</i>	204
6.6.3	<i>Shear</i>	205
6.6.3.1	<i>History and perspective</i>	205
6.6.3.2	<i>The effects of ASR on performance in shear</i>	206
6.6.3.3	<i>The effects of corrosion on performance in shear</i>	208
6.6.4	<i>Punching shear</i>	214
6.6.5	<i>Bond and anchorage</i>	215
6.6.5.1	<i>Background</i>	215

6.6.5.2	<i>The effects of corrosion on bond and anchorage</i>	218
6.6.5.3	<i>The effects of expansive mechanisms on bond and anchorage</i>	224
6.7	<i>Cracking</i>	225
	<i>References</i>	227
7	Protection, prevention, repair, renovation and upgrading	229
7.1	<i>Introduction</i>	229
7.2	<i>Performance requirements for repaired structures</i>	231
7.3	<i>Classification of protection, repair, renovation and upgrading options</i>	235
7.4	<i>Performance requirements for repair and remedial measures</i>	241
7.4.1	<i>Introduction</i>	241
7.4.2	<i>External strengthening of barriers</i>	242
7.4.2.1	<i>Element replacement</i>	242
7.4.2.2	<i>Plate bonding</i>	242
7.4.2.3	<i>External prestressing</i>	243
7.4.2.4	<i>Provision of additional concrete cover</i>	243
7.4.2.5	<i>Waterproofing membranes</i>	243
7.4.2.6	<i>Enclosures or physical barriers</i>	243
7.4.3	<i>Structural repairs</i>	244
7.4.3.1	<i>Pre-preparation</i>	244
7.4.3.2	<i>Basic compatibility between repair material and parent concrete</i>	245
7.4.3.3	<i>Compatibility, with respect to effectiveness of repair</i>	245
7.4.3.4	<i>Performance requirements in special circumstances</i>	245
7.4.3.5	<i>Health and safety</i>	246
7.4.4	<i>Creating barriers to contaminants and/or moisture control</i>	246
7.4.4.1	<i>General requirements</i>	246
7.4.4.2	<i>Coatings</i>	247
7.4.4.3	<i>Impregnations</i>	247
7.4.4.4	<i>Crack fillers</i>	247
7.4.5	<i>Electro-chemical techniques</i>	248
7.5	<i>Engineering specifications</i>	248
7.5.1	<i>Introduction</i>	248
7.5.2	<i>Strengthening options</i>	249
7.5.3	<i>Barrier solutions</i>	249
7.5.4	<i>Specialist techniques</i>	250

-
- 7.6 *Moving towards the selection process* 250
 - 7.7 *Performance of repairs in service* 252
 - 7.7.1 *Introduction* 252
 - 7.7.2 *Lessons from the CONREPNET survey* 252
 - 7.7.2.1 *Scope* 252
 - 7.7.2.2 *Expectations for repairs with different management strategies* 254
 - 7.7.2.3 *Classification of performances* 255
 - 7.7.2.4 *Success rates in relation to deterioration mechanisms* 256
 - 7.7.2.5 *Modes of repair failure* 256
 - 7.7.2.6 *Causes of repair failures* 257
 - 7.7.2.7 *Influence of environment* 258
 - 7.7.3 *General conclusions from the CONREPNET project* 259
 - 7.8 *Timing of an intervention* 259
 - 7.9 *Selecting a repair option – general* 263
 - 7.9.1 *Introduction* 263
 - 7.9.2 *Tools to aid selection* 264
 - 7.9.2.1 *Introduction* 264
 - 7.9.2.2 *Essential elements of selection tools* 268
 - 7.9.2.3 *Current methods under development* 275
 - 7.10 *The role of EN 1504 [7.13] in selection* 276
 - 7.11 *Selecting a repair option in practice* 279
 - 7.11.1 *Level (3) in Figure 7.7 – Deciding on a structural or non-structural intervention* 279
 - 7.11.2 *Level (4) in Figure 7.7 – Structural repairs* 280
 - 7.11.2.1 *External strengthening solutions* 280
 - 7.11.2.2 *External barrier solutions* 285
 - 7.11.2.3 *Internal Strengthening Solutions* 285
 - 7.11.3 *Level (4) in Figure 7.7– Non-structural repairs* 287
 - 7.11.3.1 *Coatings and impregnations* 288
 - 7.11.3.2 *Filling cracks and voids* 290
 - 7.11.4 *Level (4) in Figure 7.7 – Electro-chemical techniques* 290
 - 7.11.4.1 *Introduction* 290
 - 7.11.4.2 *Re-alkalisation and chloride extraction* 293
