

PROCEEDINGS OF THE SECOND INTERNATIONAL JUNIOR RESEARCHER  
AND ENGINEER WORKSHOP ON HYDRAULIC STRUCTURES  
PISA / ITALY / 30 JULY - 1 AUGUST 2008

# Hydraulic Structures

*Edited by*  
Stefano Pagliara  
*Department of Civil Engineering, University of Pisa, Pisa, Italy*

## Table of contents

Preface	IX
Executive Committee	XI
List of Reviewers	XIII
Local Committee	XV
<i>Keynote Lectures</i>	
Digital publishing, ethics and hydraulic engineering: the elusive or "boring" bore ? <i>H Chanson</i>	3
Obstacles in streams and their roles as hydraulic structures <i>J. D. Fenton</i>	15
<i>Technical session 1</i>	
Scour at semi-integral bridge piers and pile groups <i>S. Akib, I. Othman, F. Othman &amp; M.S. Marzuki</i>	25
Measurement of scour-hole geometry at a square pier in a gravel Bed <i>R. Diab, O. Link &amp; U. Zanke</i>	33
Scour reduction due to partial block ramp failure <i>I. Lotti &amp; S. Pagliara</i>	39
3D plunge pool scour profiles <i>D.Roy, M.Amidei &amp; S.Pagliara</i>	43
<i>Technical session 2</i>	
Characteristic depths and energy dissipation downstream of a labyrinth weir <i>R. Lopes, J. Matos &amp; J. F., Melo</i>	51
Labyrinth weirs <i>B. Crookston &amp; B. Tullis</i>	59
Stability analysis for rubble toe protections <i>A. Reda &amp; W. Sulisz</i>	65

Overflow features in a particular combined sewer manhole	71
<i>I. Carnacina, M. Bernats, &amp; S. Pagliara</i>	

### *Technical session 3*

Modelling of flow over low gradient stepped chutes	81
<i>M. Spano</i>	
Turbulence intensity and integral turbulent scales on a stepped spillway in skimming flows	89
<i>S. Felder &amp; H. Chanson</i>	
Optimization of the re-aeration potential on embankment stepped spillways in skimming flow regime	97
<i>D. B. Bung &amp; A. Schlenkhoff</i>	
Efficiency evaluation of cavitating jet apparatus	107
<i>J.G. Dalfré Filho &amp; A.I.B. Genovez</i>	
A geometrical alternative to reduce the potential for cavitation in high lift lock culvert valves	113
<i>C. C. Battiston, E. B. C. Schettini &amp; M. M. Marques</i>	

### *Technical session 4*

Downstream flow from sluice gate in conduits as a hydraulic jump	123
<i>A. A. A. Mees, C. C. Battiston &amp; M. G. Marques</i>	
Hydraulic jump classification downstream of block ramps for nonuniform channel bed material	129
<i>M. Palermo, R. Das &amp; S. Pagliara</i>	
Hydraulic performance of roughened channels with cross beams	135
<i>P. Mendes, R. Carvalho &amp; M. Lorena</i>	
Performance of a multipurpose hydraulic channel	143
<i>F. A. Santos, R. F. de Carvalho &amp; F. Sancho</i>	

### *Technical session 5*

Experimental investigation of the effect of sediment on discharge ratio at bottom intake structures	153
<i>M. Shafaibejstan &amp; A.Kamanbedast</i>	
Hydropower project vianden, computer controlled operation of scaled hydraulic models	159
<i>T. Mohringer, F. Seidel, M. Lösche &amp; F.Nestmann</i>	
Modeling groundwater fluctuations in unconfined aquifers by artificial neural networks	165
<i>Roshni T., Madan K. Jha &amp; Yasunori Kamii</i>	

Application of SWMM for urban stormwater management: A case study with modelling <i>Lai S.H., Ab. Ghani A., Zakaria N.A., Leow C.S., Chang C.K. &amp; Yusof M.F.</i>	173
An experimental and numerical analysis of effects induced by moving bodies in free surface water <i>F. Kergerl, S. Detrembleur, P. Archambeau, S. Erpicum, B.J. Dewals &amp; M. Piroton</i>	179
 <i>Technical session 6</i>	
Effectiveness of fishways: Fish experiments in a vertical slot model (scale 1:1) <i>F. Morcillo, M. Castillo &amp; L.J. Balairón</i>	189
Influence of the widening of a tributary on confluence morphology: Preliminary results <i>M. Leite Ribeiro, S. Wampfler, K. Blanckaert &amp; A. Schleiss</i>	195
Application of HRF and SSF for up-gradation of traditional surface water <i>A. Roy, P. K. Roy, A. Majumder &amp; A. Mazumdar</i>	203
A fish protective operational mode for hydropower plants at the river Moselle and its effect on the eel population <i>B. Becker, F. Notermanns, J. Köngeter &amp; H. Schüttrumpf</i>	209
 <i>Technical session 7</i>	
RANS simulation of the flow generated by sluice gates <i>L. Cassan &amp; G. Belaud</i>	217
An explicit projection method for solving incompressible Navier-Stokes equations <i>S. Detrembleur, B.J. Dewals, P. Archambeau, S. Erpicum, &amp; M. Piroton</i>	227
Howell bunker valve discharge coefficients <i>O.A. Pizzutolo &amp; F.M. Renna</i>	237
 <b>Author Index</b>	 245
