

Proceedings
of the Second Prague Symposium
on Asymptotic Statistics
21 - 25 August 1978

Edited by Petr Mandl and Marie Hušková
Faculty of Mathematics and Physics
Charles University, Prague

1979

NORTH-HOLLAND PUBLISHING COMPANY

SOCIETY OF CZECHOSLOVAK MATHEMATICIANS AND
PHYSICISTS, PRAGUE

CONTENTS

Preface	5
List of participants	6
Adresses of authors	7

INVITED PAPERS

O. BUNKE : Model choice for time series	13
G.A.D.D'AUBIGNY : A probabilistic look at ordinal methods in data analysis	23
R. HASMINSKIJ, I.A. IBRAGIMOV : On the nonparametric estimation of functionals	41
A. PÁZMAN : Hilbert-space methods in estimation, prediction and in the design of experiments	53
B. ROSÉN : A tool for derivation of asymptotic results for sampling and occupancy problems, illustrated by its application to some general capture-recapture sampling problems	67
J.L. TEUGELS, Te Lin CHOW : The sum and the maximum of i.i.d. random variables	81
W.R.van ZWET : The Edgeworth expansion for linear combinations of uniform order statistics	93

CONTRIBUTED PAPERS

W. ALBERS : Asymptotic expansions for the power of one-sample tests against continuous nonparametric alternatives . . . 105

J. ANĐĚL : On reversed multiple processes 119

J. ANTOCH : Robustness of measures of spread 127

H. CALLAERT, P. JANSSEN, N. VERAVERBEKE : Some asymptotic results for the distribution function of U-statistics. 135

C. DOMAŃSKI, A. TOMASZEWICZ : A note on convergence of the independence test statistic for 2x2 contingency tables to the Chi-square distribution 147

A.H.EL-SHAARAWI : Inference about the general linear model . . 159

Ch.A. FIELD : Summary of small sample size asymptotics for location estimates 173

Z. GOVINDARAJULU, Meyer DWASS : Simultaneous tests for randomness and location of symmetry in one-sample case 1,2 181

W. GROSMANN : Efficiency of estimates for nonlinear time series models 199

T. HAVRÁNEK : Approximate distribution of the maximum of 2x2 statistics derived from an RxC contingency table211

R. HELMERS : Edgeworth expansions for trimmed linear combinations of order statistics 221

J. HURT : Asymptotic expansions for moments of functions of statistics	233
J. JUREČKOVÁ : Bounded-length sequential confidence intervals for regression and location parameters	239
CH.A.J. KLAASSEN : Nonuniformity of the convergence of location estimators	251
L.B. KLEBANOV, I.A. MELAMED : One linear method of estimation of parameters	259
H.S. KONIJN : Bias and mean square error of the ratio estimator and conditions for their validity	271
P. MANDL : On the sequential improvement of replacement policies	277
P. NEUMANN : An asymptotically optimal procedure for searching a zero or an extremum of a function if a prior distribution of its location is known	291
G.CH. PFLUG : Stochastic approximation in time series regression	303
J. ŠTĚPÁN : Probability measures with given expectations	315
J.Á. VÍŠEK : A note on the assumptions used to find an asymptotic distribution of the likelihood ratio	321
K. WINKELBAUER : On the asymptotic properties of discrete channels decomposable into stable components	327
