

# **IRRIGATION CANAL LINING**

*by*

**D.B. KRAATZ**

*Hydraulic Engineer*

*FAO Land and Water Development Division*

# CONTENTS

<b>Preface</b> .....	v
<b>Introduction</b> .....	1
<b>1. Determining the need for lining</b> .....	3
WATER CONSERVATION .....	3
PREVENTION OF DAMAGE TO ADJACENT LAND AND DRAINAGE COST REDUCTION .....	8
REDUCED DIMENSIONS AND RIGHT-OF-WAY COSTS .....	10
REDUCED MAINTENANCE AND OPERATION COSTS .....	12
PROTECTION AGAINST EROSION, STRUCTURAL SAFETY AND OTHER BENEFITS .....	17
<b>2. Determination of seepage losses</b> .....	18
FACTORS AFFECTING SEEPAGE .....	19
ESTIMATION OF SEEPAGE FROM A PROPOSED CANAL.....	22
Calculation of seepage losses .....	22
<i>Empirical formulae — Analytical solutions — Graphical             solutions derived from electrical analogy</i>	
Methods for determining soil hydraulic conductivity ....	31
<i>Methods of measuring hydraulic conductivity below the water         table — Methods of measuring hydraulic conductivity above         the water table — Laboratory methods of measuring permea-         bility</i>	

Conclusions .....	37
MEASURING SEEPAGE FROM EXISTING CANALS .....	38
Inflow-outflow method .....	38
<i>Current meter — Flumes, drops, weirs, orifices</i>	
Ponding method .....	40
<i>Examples of ponding tests</i>	
Seepage meter method .....	44
<i>Seepage meter with submerged flexible water bag — Falling-head seepage meter — Application considerations</i>	
Special methods .....	49
<i>Tracer method — Electrical logging or resistivity measurement method — Piezometric surveys — Remote sensing</i>	
<b>3. Design and construction .....</b>	<b>51</b>
HARD-SURFACE LININGS .....	51
General design considerations .....	51
<i>Cross section — Subgrade — Subgrade sterilization — Embankments — Drainage — Water velocities — Coefficient of roughness — Prevention of silt deposits in canals</i>	
Cement concrete linings .....	62
<i>Design of cement concrete linings — Construction of cement concrete linings</i>	
Pneumatically applied mortar .....	102
Grouted fabric mats .....	103
Precast concrete slab or block linings .....	103
Soil-cement linings .....	108
<i>Dry-mix soil-cement — Plastic soil-cement — Methods of testing soil-cement for canal linings — Cost and performance</i>	
Asphaltic concrete linings .....	116
<i>Hot-mixed asphaltic concrete — Cold-mixed asphaltic concrete</i>	

Prefabricated asphaltic linings .....	120
Brick linings .....	121
<i>Examples of brick linings — Construction aspects — Asphaltic or synthetic membranes in brick linings — Clay tiles in small channels</i>	
Stone linings .....	125
EXPOSED MEMBRANES .....	128
Installation .....	128
COVERED MEMBRANE LININGS .....	129
General design considerations .....	129
<i>Subgrade — Protective cover</i>	
Buried sprayed-in-place asphaltic membranes .....	132
Prefabricated asphaltic membrane linings .....	134
Plastic and synthetic rubber membrane linings .....	134
<i>Materials — Installation — Cost — Examples</i>	
Fabric-cum-cement plaster lining .....	144
Bentonite membrane linings .....	144
EARTH LININGS .....	145
General design considerations .....	145
Thick compacted earth linings .....	147
<i>Suitable soils — Construction considerations</i>	
Thin compacted earth linings .....	155
Compaction of slopes and bed of unlined earth canals and ditches .....	155
Loosely placed earth linings .....	156
Soil modification .....	156
Cost of earth linings .....	157
SOIL SEALANTS .....	158
FLUMES, PIPES AND LAY-FLAT TUBING .....	159
Flumes .....	159

Pipelines .....	161
Lay-flat irrigation tubing .....	164
<b>4. Selection of type of lining .....</b>	<b>166</b>
FACTORS GOVERNING THE SELECTION OF LINING .....	167
Soil properties .....	167
Topography .....	173
Water table .....	173
Land use and irrigation systems .....	173
Operation and maintenance .....	174
Watertightness .....	175
Durability .....	175
Availability of construction materials .....	176
Availability of labour and machinery .....	176
Cost and financial aspects .....	177
BENEFIT-COST ANALYSIS .....	178
<b>5. Suggestions for further research and development .....</b>	<b>183</b>
<b>Glossary .....</b>	<b>185</b>
<b>Bibliography .....</b>	<b>189</b>
A. General .....	189
B. Seepage losses .....	190
C. Design and construction of lining .....	192
D. Economics of lining .....	198
E. Operation and maintenance of lining .....	198
F. Miscellaneous .....	199
