

# Fundamentals of Space Systems

## Second Edition

**Edited by**

**Vincent L. Pisacane**

**OXFORD**  
UNIVERSITY PRESS

2005

# Contents

---

## Contributors, ix

1. Systems Engineering and Management, 3  
*Vincent L. Pisacane*
2. The Space Environment, 49  
*Brian J. Anderson and Donald G. Mitchell*
3. Astrodynamics, 102  
*Vincent L. Pisacane*
4. Spacecraft Propulsion, Launch Systems, and Launch Mechanics, 171  
*Vincent L. Pisacane*
5. Spacecraft Attitude Determination and Control, 236  
*Malcolm D. Shuster and Wayne F. Dellinger*
6. Space Power Systems, 326  
*George Dakermanji and Ralph Sullivan*
7. Spacecraft Thermal Control, 423  
*Douglas Mehoke*
8. Spacecraft Configuration and Structural Design, 465  
*W. E. Skullney*

9. Space Communications, 565  
*Eric J. Hoffman*
  10. Spacecraft Command and Telemetry, 600  
*Robert C. Moore*
  11. Spacecraft Computer Systems, 627  
*Robert C. Moore*
  12. Embedded Software Systems, 654  
*Harry K. Utterback*
  13. Spacecraft Reliability, Quality Assurance, and Radiation Effects, 670  
*R. H. Maurer*
  14. Spacecraft Integration and Test, 725  
*Max R. Peterson and Elliot H. Rodberg*
  15. Space Mission Operations, 754  
*Mark E. Holdridge*
  16. Nanosatellite Conceptual Design, 772  
*Vincent L. Pisacane*
- Appendix: Units, Conversion Factors, and Constants, 797
- Index, 805
