CONTENTS

Preface	v
List of Contributors	ix
<i>Chapter 1.</i> GEOMORPHOLOGY AND SEDIMENTOLOGY OF ESTUARIES: AN INTRODUCTION	
G.M.E. Perillo	1
Introduction	1
Historical background	3
Occurrence and distribution of estuaries	4
Evolution of estuaries in the geological time scale	6
Factors influencing the geomorphology and sediment distribution	13
Summary	14
References	15
<i>Chapter 2.</i> DEFINITIONS AND GEOMORPHOLOGIC CLASSIFICATIONS OF ESTUARIES	
G.M.E. Perillo	17
Introduction	17
Previous definitions	18
A proposed new definition of estuaries	26
Previous geomorphological classifications of estuaries	27
Physiographic classification	28
Classification by tidal range	32
Evolutionary classification	33
Morphological classification	36
A proposed new morphogenetic classification	37
Summary	40
Annex: Definitions of estuaries in dictionaries and encyclopedias	41
References	46
<i>Chapter 3.</i> SEDIMENTARY SYSTEMS OF COASTAL-PLAIN ESTUARIES	
H. Bokuniewicz	49
Introduction	49
Coastal plains	50
Hydrographic classification of estuaries	57
Sedimentological classification of estuaries	58
Summary	64
References	65

<i>Chapter 4.</i>	GEOMORPHOLOGY AND SEDIMENTOLOGY OF RIAS	
	P. Castaing and A. Guilcher	69
Definition and included areas		69
Regional description		70
Northwestern and northern coasts of the Iberian Peninsula (Spain)		70
Brittany (France)		75
Provence (France)		82
Southwest England and possible other areas in the British Isles		83
Korea		85
Southeast China and Shandong		89
Argentina		89
Red Sea sharms and their worldwide extension		90
Messinian rias in the Mediterranean sea		92
General considerations		94
Ria evolution		95
Sedimentary processes		98
Pluri-annual sedimentary budget		101
References		107
<i>Chapter 5.</i>	SEDIMENTOLOGY AND GEOMORPHOLOGY OF FJORDS	
	J.P.M. Syvitski and J. Shaw	113
Introduction		113
Character		113
Oceanographic characteristics		118
World distribution		119
Short-term depositional processes		122
Ice-influenced fjords		124
Ice-front melt		124
Glacifluvial processes		124
Iceberg calving and rafting		127
Ice-front movement		128
Land-based fjord valley deposition		130
Sea-ice influence		130
River-influenced fjords		131
Fjord river discharge		131
Sediment transport		132
Fjord deltas		133
Fjord river plumes		136
Hemipelagic sedimentation		137
Turbidity currents		140
Wave- and tide-influenced fjords		143
Tidal processes		144
Wave processes		146
Fjords dominated by slope failure		147
Release mechanisms		148
Mass transport processes		150
Deep-water renewals and anoxic fjords		152
Deep-water renewal		152
Renewal and sedimentation		154
Anoxia		154
Long-term depositional trends		155
Stages of fjord infilling		155
Relative sea-level fluctuations		156

Climate and sedimentation..... 162
 Numerical models 163
 Progress..... 164
 Summary..... 167
 References..... 168

Chapter 6. TIDE-DOMINATED ESTUARIES AND TIDAL RIVERS
 J.T. Wells 179

Introduction 179
 The classification problem 179
 Physical processes in tide-dominated estuaries 181
 Effects of tide on sediment dynamics..... 183
 Formation of a tidal turbidity maximum..... 184
 Morphologic and sedimentologic character 185
 Estuarine morphology 185
 Estuarine sedimentology..... 188
 Fluid-mud deposits 189
 Estuarine infilling..... 191
 Holocene examples: tide-dominated estuaries..... 192
 Gironde Estuary..... 192
 Severn Estuary..... 193
 Ord Estuary 194
 Cobequid Bay-Salmon River Estuary 195
 Holocene examples: tidal rivers..... 197
 Rio de la Plata..... 197
 Amazon River 198
 Summary..... 200
 References..... 202

Chapter 7. DELTA FRONT ESTUARIES
 B.S. Hart 207

Introduction 207
 Delta morphology and growth 207
 Alluvial feeder systems..... 209
 Receiving basin characteristics 210
 Deltaic environments..... 211
 Channels 212
 River mouths 217
 Interchannel areas..... 221
 Summary..... 223
 References..... 224

Chapter 8. STRUCTURAL ESTUARIES
 M. Pino Quivira..... 227

Introduction 227
 General classifications of structural estuaries 228
 Morpho-tectonic classification..... 230
 Neotectonic influence on the formation of estuaries..... 232
 Summary..... 237
 References..... 237

<i>Chapter 9.</i>	COASTAL LAGOONS	
	F.I. Isla	241
Introduction		241
Origin of coastal lagoons		242
Geomorphology		243
Sedimentology		244
Conditioning factors for the development of coastal lagoons		245
Climate effects		246
Tectonic effects		249
Biogenic effects		250
Wind-wave effects		250
Tidal and wave effects		252
Longshore-drift effects		253
Related environments		254
Tidal inlets		254
Tidal deltas		255
Barriers		261
Tidal flats		263
Marshes		263
Mangroves		264
Coastal lagoon evolution		265
Summary		266
References		267
<i>Chapter 10.</i>	SILICICLASTIC TIDAL FLATS	
	C.L. Amos	273
The classification of tidal flats		273
Siliciclastic tidal flat research		275
The zonation of tidal flats and relative elevation		279
Tidal flat sedimentation — a comparison between the Wash and the Bay of Fundy		282
Mud flat deposition and sediment supply		282
Mud flat erosion		288
Sand flat stability and the transport of non-cohesive sediment		290
A model for sediment accretion/erosion on the tidal flats of the Wash and Minas basin		293
The influences of waves on tidal flats		298
References		301
<i>Chapter 11.</i>	SALT MARSHES	
	J.L. Luternauer, R.J. Atkins, A.I. Moody, H.F.L. Williams and J.W. Gibson	307
Introduction		307
Overview of coastal marsh morpho-sedimentology		309
Estuarine marsh dynamics		318
Modelling estuarine marshes		326
Summary		328
References		329
<i>Chapter 12.</i>	GEOMORPHOLOGY AND SEDIMENTOLOGY OF MANGROVES	
	P.G.E.F. Augustinus	333
Introduction		333
Global distribution of mangrove species		333
Composition and zonation of mangroves		336

Mangrove species and their environmental constraints	339
The influence of mangroves on hydrodynamics	341
Sedimentation and sediment in estuarine mangrove forests	346
The influence of mangroves on soil stability	349
Mangroves and geomorphology	349
Conclusion	352
References	353

Chapter 13. ESTUARINE DUNES AND BARS

R.W. Dalrymple and R.N. Rhodes..... 359

Introduction	359
Dune classification	359
Distribution of dunes	363
Controlling variables	363
Distribution within estuaries	365
Dune size	366
Water depth/boundary-layer thickness	367
Current speed and grain size	371
Water temperature and sediment availability	372
Unsteady flow	373
Summary	374
Dune shape	374
Profile shape	375
Plan shape	382
Dune orientation	386
Variability of current direction	386
Non-uniform migration	388
Discussion	389
Superimposed dunes	391
Morphological response to unsteady flow	392
Dune migration rates	399
Internal structure of dunes	401
Simple dunes	402
Compound dunes	404
Estuarine barforms	406
General characteristics and classification	406
Repetitive barforms	407
Elongate tidal bars	410
Delta-like bodies	413
Internal structures	413
Summary and research needs	416
References	417

Chapter 14. SEDIMENT TRANSPORT PROCESSES IN ESTUARIES

K.R. Dyer..... 423

Introduction	423
Tidal effects	424
Types of estuary	427
Highly stratified estuary	428
Partially mixed estuaries	428
Well mixed estuaries	428
Modes of sediment transport	429

Mud properties	430
Flocculation	430
Settling velocity.....	431
Deposition.....	431
Erosion.....	433
Transport of mud in tidal currents	433
Turbidity maximum.....	435
Processes forming the turbidity maximum.....	438
Residual circulation.....	438
Lag effects.....	439
Horizontal fluxes.....	442
Estuarine trapping	443
Summary.....	446
References.....	447
Geographic Index.....	451
Subject Index	459
