Contents

Chapter 1 Introduction

1.1	Purpose of Database Systems	1
1.2	Data Abstraction	4
1.3	Data Models	6
1.4	Instances and Schemes	9
1.5	Data Independence	10
1.6	Data Definition Language	11
1.7	Data Manipulation Language	11
1.8	Database Manager	12
1.9	Database Administrator	13
1.10	Database Users	14
1.11	Overall System Structure	15
1.12	Summary	17
	Exercises	18
	Bibliographic Notes	

Chapter 2 Entity-Relationship Model

2.1	Entities and Entity Sets	21
2.2	Relationships and Relationship Sets	22
2.3	Mapping Constraints	25
2.4	Primary Keys	27
2.5	Entity-Relationship Diagram	30
2.6	Reducing E-R Diagrams to Tables	32
2.7	Generalization and Specialization	37
2.8	Aggregation	40
2.9	Summary	41
	Exercises	43
	Bibliographic Notes	44

Chapter 3 Relational Model

3.1	Structure of Relational Databases	45
3.2	Formal Query Languages	50
3.3	Commercial Query Languages	70
3.4	Modifying the Database	91
3.5	Views	94
3.6	Summary	99
	Exercises	100
	Bibliographic Notes	104

Chapter 4 Network Data Model

4.1	Basic Concepts	107
4.2	Data-Structure Diagrams	108
4.3	The DBTG CODASYL Model	115
4.4	DBTG Data Retrieval Facility	121
4.5	DBTG Update Facility	129
4.6	DBTG Set-Processing Facility	132
4.7	Summary	137
	Exercises	138
	Bibliographic Notes	141

Chapter 5 Hierarchical Data Model

5.1	Basic Concepts	143
5.2	Tree-Structure Diagrams	144
5.3	Data Retrieval Facility	156
5.4	Update Facility	162
5.5	Virtual Records	165
5.6	Summary	166
	Exercises	168
	Bibliographic Notes	172

Chapter 6 Relational Database Design

6.1	Pitfalls in Relational Database Design	173
6.2	Normalization Using Functional Dependencies	181
6.3	Normalization Using Multivalued Dependencies	200
6.4	Normalization Using Join Dependencies	209
6.5	Domain-Key Normal Form	213
6.6	Atomic Values	215

6.7	Alternative Approaches to Database Design	218
6.8	Summary	220
	Exercises	221
	Bibliographic Notes	226

Chapter 7 File and System Structure

7.1	Overall System Structure	229
7.2	Physical Storage Media	231
7.3	File Organization	235
7.4	Buffer Management	245
7.5	Mapping Relations to Files	248
7.6	Mapping Networks to Files	252
7.7	Mapping Hierarchies to Files	258
7.8	Summary	260
	Exercises	261
	Bibliographic Notes	263

Chapter 8 Indexing and Hashing

8.1	Basic Concepts	265
8.2	Index-Sequential Files	266
8.3	B ⁺ -Tree Indexed Files	275
8.4	B-Tree Index Files	281
8.5	Static Hash Functions	283
8.6	Dynamic Hash Functions	286
8.7	Comparison of Indexing and Hashing	291
8.8	Multiple-key Access	292
8.9	Summary	296
	Exercises	297
	Bibliographic Notes	298

Chapter 9 Query Processing

9.1	Query Interpretation	301
9.2	Equivalence of Expressions	302
9.3	Estimation of Query-Processing Cost	308
9.4	Estimation of Costs of Access Using Indices	310
9.5	Join Strategies	312
9.6	Structure of the Query Optimizer	318
9.7	Summary	319
	Exercises	320
	Bibliographic Notes	322

Chapter 10 Crash Recovery

10.1	Failure Classification	325
10.2	Transactions	330
10.3	Incremental Log with Deferred Updates	334
10.4	Incremental Log with Immediate Updates	338
10.5	Checkpoints	342
10.6	Buffer Management	343
10.7	Shadow Paging	344
10.8	Failure with Loss of Nonvolatile Storage	349
10.9	Stable Storage Implementation	350
10.10	Summary	352
	Exercises	353
	Bibliographic Notes	404

Chapter 11 Concurrency Control

11.1	Serializability	356
11.2	Testing for Serializability	361
11.3	Locking	370
11.4	Timestamp Ordering	380
11.5	Validation Techniques	383
11.6	Multiple Granularity	385
11.7	Multiversion Schemes	389
11.8	Deadlock Handling	390
11.9	Summary	395
	Exercises	397
	Bibliographic Notes	401

Chapter 12 Distributed Databases

12.1	Structure of Distributed Databases	403
12.2	Trade-offs in Distributing the Database	406
12.3	Design of Distributed Databases	408
12.4	Transparency and Autonomy	414
12.5	Distributed Query Processing	418
12.6	Recovery in Distributed Systems	422
12.7	Concurrency Control	428
12.8	Deadlock Handling	433
12.9	Coordinator Selection	439
12.10	Summary	441
	Exercises	442
	Bibliographic Notes	446

Chapter 13 Security and Integrity

13.1	Security and Integrity Violations	449
13.2	Authorization and Views	451
13.3	Integrity Constraints	455
13.4	Encryption	458
13.5	Statistical Databases	460
13.6	Summary	461
	Exercises	462
	Bibliographic Notes	464

Chapter 14 New Database Applications

14.1	Introduction	465
14.2	Design Databases	466
14.3	Knowledge Bases	473
14.4	Summary	477
	Exercises	478
	Bibliographic Notes	479

Chapter 15 Case Studies

15.1	Relational Systems	481
15.2	Network Systems	492
15.3	Hierarchical Systems	493
15.4	Microcomputer Database Systems	496
	Bibliographic Notes	502

Bibliography	505
