## Preface xiii

## PART 1: SIMULATION FUNDAMENTALS

### CHAPTER 1 Introduction to Simulation 1

The Nature of Simulation	3
<i>Models and simulation</i>	3
Types of Simulation Models	6
<i>An example of Monte-Carlo simulation</i>	6
<i>An example of systems simulation</i>	10
The Simulation Process	12
<i>Verification and validation</i>	13
Benefits and Limitations of Simulation	14
Simulation in Practice	14
<i>Business simulation for dental practice management</i>	15
<i>Simulation modeling for hazardous waste remediation alternatives</i>	16
Questions and Problems	19
References	20

### CHAPTER 2 Simulation Using Excel 21

Basic Excel Skills	22
<i>Copying formulas and cell references</i>	22
<i>Functions</i>	24
<i>Charts and graphs</i>	26
<i>Other useful Excel tips</i>	27
Building Simulation Models Using Excel	28
<i>A simulation model for Dave's Candies</i>	29
<i>A simulation model for Mantel Manufacturing</i>	30
<i>Constructing frequency distributions and histograms</i>	31
Random Variates	33
<i>Random numbers</i>	33
<i>Generating random variates from discrete distributions</i>	35
<i>Using Excel's VLOOKUP function</i>	36
<i>Using Excel's random number generation tool</i>	37
Monte-Carlo Simulation on Spreadsheets	39
<i>Simulation analysis of Dave's Candies</i>	39

<i>Simulation analysis of Mantel Manufacturing</i>	40
<i>Simulating casino games</i>	43
<i>Concluding remarks</i>	48
Simulation in Practice	49
<i>Risk/return financial modeling and analysis</i>	49
<i>A deterministic spreadsheet simulation model for production scheduling at Welch's</i>	51
Questions and Problems	52
References	56
Appendix	57

## **CHAPTER 3 Probability and Statistics in Simulation 63**

Basic Statistical Concepts	64
<i>Descriptive statistics</i>	64
<i>Sampling distributions</i>	67
<i>Confidence intervals</i>	68
Random Variables and Probability Distributions	69
<i>Useful continuous distributions</i>	71
<i>Useful discrete distributions</i>	77
<i>Other useful distributions</i>	78
Generating Random Variates	81
<i>Inverse transformation method</i>	82
<i>Special methods</i>	86
<i>Generating random variates in Excel and Crystal Ball</i>	87
Applications in Financial Analysis and Management	89
<i>Simulating stock prices</i>	89
<i>Options pricing</i>	89
<i>Cash management simulation</i>	91
Modeling Probabilistic Inputs	93
<i>Distribution fitting of empirical data</i>	94
<i>Goodness-of-fit tests</i>	97
<i>Distribution fitting with Crystal Ball</i>	100
<i>Judgmental modeling</i>	101
Statistical Issues in Monte-Carlo Simulation	102
<i>Sample size</i>	102
<i>Output analysis</i>	103
Simulation in Practice	104
<i>Simulation analysis for Red Cross blood drives</i>	104
<i>Simulating a major running race</i>	105
Questions and Problems	107
References	111

## **PART 2: SIMULATION IN RISK ANALYSIS**

### **CHAPTER 4 Risk Analysis Using Crystal Ball 112**

Risk Analysis	113
Monte-Carlo Simulation with Crystal Ball	115
<i>A financial analysis risk simulation</i>	115

<i>Specifying input information</i>	115
<i>Crystal Ball output</i>	122
<i>Creating Crystal Ball reports</i>	126
Additional Crystal Ball Modeling and Analysis Options	127
<i>Correlated assumptions</i>	127
<i>Overlay charts</i>	128
<i>Trend charts</i>	130
<i>Sensitivity analysis</i>	130
<i>Statistical issues in risk analysis</i>	133
<i>Analyzing decision alternatives</i>	135
<i>Other Crystal Ball tools</i>	138
Simulation in Practice	139
<i>Applications of risk analysis using Crystal Ball</i>	139
<i>Simulation in new-product screening at Cinergy Corporation</i>	142
Questions and Problems	145
<b>CHAPTER 5 Applications of Risk Analysis</b>	<b>152</b>
Operations Management Applications	153
<i>Machine reliability and maintenance</i>	153
<i>Project management</i>	157
<i>Hotel overbooking</i>	161
<i>Call center capacity analysis</i>	163
Finance Applications	166
<i>Rate of return analysis</i>	166
<i>Retirement planning</i>	167
<i>Cash budgeting</i>	170
<i>New-product development</i>	172
<i>Recycling decision model</i>	176
Marketing Applications	180
<i>Sales projection</i>	180
<i>Marketing analysis for pharmaceuticals</i>	180
<i>Analysis of distribution strategies</i>	182
Engineering Applications	185
<i>Reliability of a spring</i>	186
<i>Risk assessment of toxic waste</i>	187
<i>Electrical circuit analysis</i>	188
Simulation in Practice	190
<i>Risk analysis at Getty Oil Company</i>	190
<i>Assessing tritium supply alternatives by the U.S. Department of Energy</i>	190
Questions and Problems	192
References	198

### PART 3: SYSTEMS SIMULATION

<b>CHAPTER 6 Building System Simulation Models</b>	<b>199</b>
System Simulation Modeling Approaches	200
Simulating Inventory Systems Using Activity Scanning	201
<i>Basic concepts of inventory modeling</i>	201

<i>Continuous review model with lost sales</i>	203
<i>Continuous review model with back orders</i>	208
Simulating Waiting-Line Systems Using Process-Driven Models	211
<i>Basic concepts of queueing models</i>	212
<i>Analytical models</i>	213
<i>Single-server queueing model</i>	214
<i>Multiple-server models</i>	220
Event-Driven Simulation Models	223
<i>An event-driven simulation for a single-server queue</i>	223
An Event-Driven Inventory Simulation Model	229
Entities and Attributes	233
Continuous Simulation Modeling	234
Simulation in Practice	238
<i>Improving distribution costs at Ciba-Geigy using simulation</i>	238
<i>Security checkpoint improvement through simulation</i>	239
<i>A system dynamics model for insurance evaluation</i>	241
Questions and Problems	243
References	248
<b>CHAPTER 7 Output Analysis and Experimentation for Systems Simulation</b>	<b>249</b>
Dynamic Behavior in Systems Simulation	250
<i>Output analysis for terminating systems</i>	250
<i>Output analysis for nonterminating systems</i>	253
<i>The method of batch means</i>	255
Comparing Policies and Systems	256
<i>Independent sampling</i>	256
<i>Correlated sampling</i>	257
<i>Comparing several systems</i>	257
Experimental Design	260
<i>Simple factorial experiments</i>	260
Simulation in Practice	262
<i>Simulation in Waste-Processing System Design</i>	262
<i>Improving Florida Driver's Licensing Offices Through Simulation</i>	263
Questions and Problems	266
References	270
<b>CHAPTER 8 Systems Simulation Using ProcessModel</b>	<b>271</b>
ProcessModel Overview	273
<i>Model elements</i>	273
<i>The modeling environment</i>	275
<i>Diagramming the process flow</i>	277
<i>Input distributions</i>	277
<i>Defining special logic</i>	278
<i>Running a simulation</i>	278
ProcessModel Example: Simulating a Phone Support Help Desk	279
<i>Define process flow</i>	280

Specify resource requirements	280
Specify resource information	281
Run the simulation	282
View output reports	282
Enhancing the Help Desk Process Model	287
Reneging	287
Visual staffing	288
Changing arrival patterns	288
Simulation Options and Scenarios	290
Attributes and Variables	292
Action logic	295
ProcessModel Example: Inventory Simulation with Back Orders	300
Simulation in Practice	304
A simulation model for Air Force maintenance	304
Questions and Problems	304
<b>CHAPTER 9 Applications of Systems Simulation</b>	<b>307</b>
Simulation in Practice: Designing Emergency Room Facilities Using Simulation	308
An Emergency Room Simulation Model	308
ProcessModel implementation	309
Sensitivity analysis	311
Simulation in Practice: Simulation in Local Area Network Design	312
A Local Area Network Simulation Model	314
ProcessModel implementation	314
Simulation results	316
Simulation in Practice: Simulating Dispatching Policies in a Manufacturing Plant	317
A Job Shop Simulation Model	318
ProcessModel implementation	319
Analysis of results	323
Simulation in Practice: Simulation in Supply Chain Management	324
Simulating Alternative Supply Chain Systems	326
ProcessModel implementation	328
Just-in-time model	331
Analysis of results	331
Questions and Problems	331
References	334

## PART 4: EXTENSIONS OF SIMULATION

<b>CHAPTER 10 Simulation in Forecasting and Optimization</b>	<b>335</b>
Time Series Forecasting	336
Linear smoothing methods	336
Seasonal smoothing methods	338

<i>Error metrics and forecast accuracy</i>	338
<i>Regression models</i>	339
Forecasting with CB Predictor	339
Integrating Forecasting and Simulation	343
<i>Forecasting and simulating a net income model</i>	345
Optimization	348
<i>Types of optimization models</i>	349
<i>Linear optimization example: Portfolio allocation</i>	349
<i>Integer optimization example: Project selection</i>	351
<i>Nonlinear optimization example: Hotel pricing</i>	352
Spreadsheet Optimization Using Excel Solver	353
<i>Solving integer optimization models</i>	356
<i>Solving nonlinear optimization models</i>	356
Risk Analysis of Optimization Results	357
Combining Optimization and Simulation	359
<i>Using OptQuest</i>	360
<i>Interpreting results</i>	364
<i>Adding a requirement</i>	364
<i>Finding an optimal inventory policy</i>	366
Questions and Problems	366
<b>APPENDIX A Normal Distribution</b>	<b>370</b>
<b>APPENDIX B t Distribution</b>	<b>371</b>
<b>APPENDIX C Chi-Square Limits</b>	<b>372</b>
<b>APPENDIX D Kolmogorov-Smirnov Limits</b>	<b>373</b>
<b>Bibliography</b>	<b>374</b>
<b>Index</b>	<b>387</b>
