

**HEAT-INDUCED EXPLOSION IN
HIGH STRENGTH CONCRETE**

NICHOLAUS HOLKMANN OLSEN

LIST OF TABLES

LIST OF FIGURES

NOTATIONS

1. INTRODUCTION

1.1 Purpose of the investigation

2. EXPERIMENTAL PROGRAM

2.1 Introduction

	PAGE
3. EXPERIMENTAL RESULTS AND DISCUSSION	8
3.1 Introduction	8
3.2 Compressive Strength	8
3.3 Physically Bound Water	9
3.3.1 Physically Bound Water	9
3.3.2 Physically Bound Water versus Compressive Strength	9
3.4 Heat Testing of Concrete	9
3.4.1 Heat Tests	9
3.4.2 Heat Tests versus Compressive Strength	9
3.4.3 Heat Tests versus Physically Bound Water	10
3.5 Compressive Strength after Heating	10
3.5.1 Compressive Strength	10
3.5.2 Compressive Strength after Heating versus Compressive Strength before Heating	11
4. CONCLUSION	12
5. REFERENCES	13
6. TABLES	14
7. FIGURES	20

PREFACE	i
ABSTRACT	ii
RESUME	vii
LIST OF TABLES	xiv
LIST OF FIGURES	xv
NOTATIONS	xvi
1. INTRODUCTION	1
1.1 Purpose of the investigation	1
2. EXPERIMENTAL PROGRAM	3
2.1 Introduction	3
2.2 Concrete	3
2.2.1 Materials	3
2.2.2 Mix proportions	4
2.2.2.1 Series 1	4
2.2.2.2 Series 2	5
2.2.3 Mixing, Casting and Curing	5
2.3 Tests	6
2.3.1 Compressive Strength	6
2.3.2 Physically Bound Water	6
2.3.3 Heat Testings of Concrete	6
2.3.4 Compressive Strength after Heating	7
