

Economic development in the Third World

An introduction to problems and policies in a global perspective

Michael P. Todaro

Professor of Economics,
New York University
and
Senior Associate,
Center for Policy Studies,
The Population Council

Inth: TOD

Preface	xvi
Acknowledgements	xvii
Introduction	xix

Part 1 Principles and concepts

1 Economics, institutions and development: a global perspective	2
Introduction: How the other two-thirds live	2
1.1 Economics and development studies	5
1 The nature of development economics	
2 Why study development economics?: some critical questions	
3 The important role of 'values' in development economics	
4 The nature of 'western' economic theory	
1.2 The limited relevance of traditional theory	10
1.3 Economies as 'social systems': the need to go beyond simple economics	13
1.4 Third World social systems as part of an interdependent international social system	14
Summary and conclusions	15
Concepts for review · Questions for discussion · Further readings	17
2 Diverse structures and common characteristics of developing nations	19
Introduction: Similarity within diversity	19
2.1 An overview of the diverse structure of Third World economies	20
1 Size and income level	
2 Historical background	
3 Physical and human resource endowments	
4 Relative importance of public and private sectors	
5 Industrial structure	
6 External dependence: economic, political and cultural	
7 Political structure, power and interest groups	
2.2 Common characteristics of developing nations	24
1 Low levels of living	
A Per capita national incomes	
B Relative growth rates of national (and per capita) incomes	
C The distribution of national income	
D Extent of poverty	

E Health	
F Education	
2 Low levels of productivity	
3 High rates of population growth and dependency burdens	
4 High and rising levels of unemployment and underemployment	
5 Substantial dependence on agricultural production and primary product exports	
A Small-scale agriculture	
B Dependence on exports	
6 Dominance, dependence and vulnerability in international relations	
Conclusion	37
Concepts for review · Questions for Discussion · Further readings	38
Appendix 2.1	39
Relative ranking of fifteen selected third world countries by various indices of development	40
Appendix 2.2	
Selected social and economic indicators of development: By groups of countries	
3 The meaning of development	50
Introduction: Everyone wants development – but what does it mean?	50
3.1 Two major approaches to the study of economic development	51
1 The linear ‘stages’ model	
A Rostow’s ‘stages of growth’	
B The Harrod-Domar growth model	
C Obstacles and constraints	
D Necessary versus sufficient conditions: some criticisms of the stages model	
2 International–structuralist models	
A The ‘neo-colonial’ dependence model	
B The ‘false paradigm’ model	
C Conclusions	
3.2 Dualism and the concept of dual societies	57
1 International dualism	
2 Domestic dualism	
3.3 What do we mean by ‘development’?	60
1 Traditional economic measures	
2 The new economic view of development	
3 Beyond narrow economic criteria	
4 Three ‘core’ values of development	
A Life-sustenance: the ability to provide basic necessities	
B Self-esteem: to be a person	
C Freedom from servitude: to be able to choose	
5 The three objectives of development	
3.4 Underdevelopment and development: a multi-dimensional schematic summary	64
Concepts for Review · Questions for discussion · Further readings	68
4 Historic growth and contemporary development: Lessons and controversies	70
Introduction: the growth game	70
4.1 The economics of growth: some basic concepts and illustrations	71
1 Capital accumulation	
2 Population (and labor force) growth	

3	Technological progress	
4.2	The historical record: Kuznets' six characteristics of modern economic growth	76
1	High rates of per capita output and population growth	
2	High rates of productivity increase	
3	High rates of economic structural transformation	
4	High rates of social, political and ideological transformation	
5	International economic outreach	
6	Limited international spread of economic growth	
4.3	Conclusions: the interdependence of growth characteristics	79
4.4	Some lessons and implications	80
4.5	The limited value of the historical growth experience: differing initial conditions	81
1	Resource endowment, physical and human	
2	Relative levels of per capita income and GNP	
3	Climatic differences	
4	Population size, distribution and growth	
5	The historical role of international migration	
6	The growth stimulus of international trade	
7	Basic scientific and technological research and development capabilities	
8	Stability and flexibility of political and social institutions	
	Concepts for review · Questions for discussion · Further readings	88
	Appendix 4.1	89
	The classification of innovations	

Part II Problems and policies – domestic

A note to the student on the organizational structure and operating procedure for analyzing development problems in parts II and III

5	Growth, poverty and income distribution	94
	Introduction: The growth controversy	94
5.1	'Who' gets 'how much' of 'what?': a simple illustration	95
5.2	Some basic concepts: size and functional distributions of income	99
1	Size distributions	
2	Lorenz curves	
3	Gini coefficients and aggregate measures of inequality	
4	Functional distributions	
5.3	A review of evidence: inequality and absolute poverty in Third-World countries	104
1	Inequality: variations among countries	
2	'Absolute' poverty: extent and magnitude	
5.4	Economic characteristics of poverty groups	107
5.5	Economic growth and the extent of poverty	108
5.6	Redefining development goals – growth with improved income distribution	110
5.7	The role of economic analysis: redistribution from growth	111
1	Growth versus income distribution	
A	The traditional argument: factor shares, savings and economic growth	
B	A counter-argument	
2	GNP as a 'biased' index of national development and welfare	
3	Constructing a 'poverty-weighted' index of social welfare	

4	Combining the economics of growth and distribution	
5.8	The range of policy options: some basic considerations	118
1	Areas of intervention	
2	Policy options	
A	Altering the functional distribution of income through policies designed to change relative factor prices	
B	Modifying the size distributions through progressive redistribution of asset ownership	
C	Modifying (reducing) the size distribution at the upper levels through progressive income and wealth taxes	
D	Modifying (increasing) the size distribution at the lower levels through direct transfer payments and the public provision of goods and services	
3	Summary and conclusions: The need for a 'package of policies'	
4	A final question	
	Concepts for review · Questions for discussion · Further readings	123
	Appendix 5.1	124
	Factor shares, savings and economic growth: An illustration	
6	The population debate	127
	Introduction: numbers and controversies	127
6.1	The basic issue: population growth and the quality of life	128
6.2	A review of numbers: population growth – past, present and prospective	129
1	World population growth through history	
2	The structure of the world's population	
A	Geographical region	
B	Fertility and mortality trends	
C	Age structure and dependency burdens	
3	Birth rates: their relation to income levels, GNP growth rates and income distribution	
4	The 'hidden momentum' of population growth	
6.3	The population debate: some conflicting opinions	138
1	Population growth is not a real problem	
A	'Some other issue'	
B	'A deliberately contrived false issue'	
C	'Population growth is desirable'	
2	Population growth is a real problem	
A	The population 'hawk' argument	
B	The provision of family planning services	
C	Human rights	
D	'Development' plus population programs	
6.4	Goals and objectives: towards a 'consensus'	142
	Concepts for review · Questions for discussion · Further readings	144
7	Economics of population and development	146
	Introduction	146
7.1	The theory of demographic transition	146
7.2	The Malthusian 'population trap'	149
1	The basic model	
2	Criticisms of the model	
7.3	The micro-economic theory of fertility	153
1	General considerations	
2	The demand for children in developing countries	
3	Some empirical evidence	

4	The implications for development and fertility	
7.4	Some policy approaches	157
1	What developing countries can do	
2	What the developed nations can do in their own countries	
3	How developed countries can assist developing countries in their varied population programs	
7.5	Conflicts, 'trade-offs' and choices among alternative policies and competing objectives: some final observations	161
	Concepts for review · Questions for discussion · Further readings	163
8	Unemployment: Issues, dimensions and analyses	164
	Introduction: the employment problem – some basic issues	164
8.1	Dimensions of Third World unemployment: evidence and concepts	166
1	Employment and unemployment: trends and projections	
2	Urban population growth	
3	Labor force: present and projected	
4	The magnitude and age structure of urban unemployment	
5	Labor underutilisation: some definitional distinctions	
6	Linkages between unemployment, poverty and income distribution	
7	The lag between industrial output and employment growth: the misplaced emphasis of the 1950s and 1960s	
8.2	Economic models of employment determination	174
1	The traditional competitive free market model	
A	Flexible wages and full employment	
B	Limitations of the competitive model for developing countries	
2	The Keynesian model	
A	Insufficient demand and the 'employment gap' – the simple model	
B	Limitations of the model in the development context	
3	Output and employment growth: conflict or congruence?	
A	Growth models and employment levels: the conflict argument	
B	Growth and employment: the congruence argument	
4	Appropriate technology and employment generation: the price incentive model	
A	Choice of techniques: an illustration	
B	Factor-price distortions and appropriate technology	
C	The possibilities of labor-capital substitution	
	Concepts for review · Questions for discussion · Further readings	184
9	Rural – urban migration: Theory and policy	186
	Introduction	186
9.1	Migration and development	186
9.2	The Lewis theory of development	188
1	The basic model	
2	Criticisms of the Lewis model	
9.3	Migration in developing nations: some general facts	192
1	The migration process	
2	Migrant characteristics	
9.4	Towards an economic theory of rural-urban migration	193
1	A verbal description of the Todaro model	

2	Some policy implications	
	A The need to reduce imbalances in urban-rural employment opportunities	
	B Urban job creation is an insufficient solution for the urban unemployment problem	
	C Indiscriminate educational expansion will lead to further migration and unemployment	
	D Wage subsidies and traditional scarcity factor pricing can be counterproductive	
	E Programs of integrated rural development should be encouraged	
9.5	Summary and conclusions: The shape of a comprehensive employment strategy	198
	Concepts for review · Questions for discussion · Further readings	200
	Appendix 9.1	201
	A mathematical formulation of the Todaro migration model	
10	Agricultural transformation and rural development	204
	Introduction: the imperative of agricultural progress and rural development	204
10.1	Agricultural stagnation in the 'development decade'	206
10.2	The structure of Third World agrarian systems	209
	1 Two kinds of world agriculture	
	2 Peasant agriculture in Latin America, Asia and Africa	
	A Latin America and Asia: similarities and differences	
	B The <i>latifundio-minifundio</i> pattern and resource underutilization in Latin America	
	C The fragmentation and subdivision of peasant land in Asia	
	D Subsistence agriculture and extensive cultivation in Africa	
	E Conclusions	
10.3	The economics of small-scale agricultural development: transition for subsistence to specialized farming	219
	1 Stage I: subsistence farming: risk, uncertainty, and survival	
	2 Stage II: the transition to mixed and diversified farming	
	3 Stage III: from divergence to specialization: modern commercial farming	
	4 Stages of farm evolution: a summary	
10.4	Towards a strategy of agricultural and rural development: some main requirements	225
	1 Improving small-scale agriculture	
	A Technology and innovation	
	B Policies and institutions	
	2 Three conditions for rural development	
	A Land reform	
	B Supportive policies	
	C Integrated development objectives	
10.5	Rural development in China: a unique approach	228
	1 The people's commune	
	2 Poverty, employment and income distribution	
	3 How the Chinese system works: six important factors	
	4 Implications for rural development in other Third World nations	
	Concepts for review · Questions for discussion · Further readings	233

11 Education and development	235
Introduction: education and human resources	235
11.1 A profile of education in developing regions	237
1 Public educational expenditure	
2 Enrollments	
3 Dropouts	
4 Literacy	
5 Costs and earnings	
11.2 Basic problems of primary and secondary education	240
1 Inertia and inefficiency	
2 Poor management and distorted incentives	
3 Maladjustment to social needs at the primary level	
11.3 Problems of higher education	243
11.4 Factors affecting the ability to learn: some causes and consequences	244
11.5 The economics of education and employment	245
1 Educational supply and demand: the relationship between employment opportunities and educational demands	
2 Social versus private benefits and costs	
3 The need to curtail artificially induced educational demands: convergent benefits and costs	
11.6 Education, society and development: some issues	253
1 Education and economic growth	
2 Education, inequality and poverty	
3 Education, internal migration and fertility	
4 Education and rural development	
5 Education and international migration: intellectual dependence and the 'brain drain'	
11.7 Summary and conclusions: major educational policy options	262
1 Policies largely external to educational systems	
A Adjusting imbalances, signals and incentives	
B Modifying job-rationing by educational certification	
C Curbing the brain drain	
2 Policies internal to educational systems	
A Educational budgets	
B Subsidies	
C Primary school curricula in relation to rural needs	
D Quotas	
Concepts for review · Questions for discussion · Further readings	265

Part III Problems and policies – international

12 Trade theory and development experience	270
Introduction: the importance of international trade and finance	270
12.1 Five basic questions about trade and development	272
12.2 The importance of trade for development: a statistical review	273
1 Commodity exports	
2 Importance of exports to different developing nations	
3 The composition of trade	
4 The terms of trade	
12.3 The traditional theory of international trade	278
1 Specialization and the principle of comparative advantage: the classical labor-cost model	
2 Relative factor endowments and international specialization: the neo-classical model	

3	Trade theory and development: the traditional arguments	
12.4	Some criticisms of traditional free trade theories in the context of Third World experience	282
1	Fixed resources, full employment and the international immobility of capital and skilled labor	
A	Trade and resource growth	
B	Unemployment, resource underutilization and the 'vent-for surplus' theory of trade	
C	International factor mobility and multinational corporations	
2	Fixed, freely available technology and consumer sovereignty	
3	Internal factor mobility and 'perfect competition'	
4	The absence of national governments in trading relations	
5	Balanced trade and international price adjustments	
6	Country trade gains accrue to country nationals	
12.5	Some conclusions: trade and economic development, the limits of theory	291
	Concepts for review · Questions for discussion · Further readings	294
13	The balance of payments and commercial policies	296
	Introduction: extending our analysis to commercial and financial policies	296
13.1	The balance of payments	297
13.2	Financing payments deficits: the international monetary system and Special Drawing Rights	298
13.3	Trade strategies for development: to look 'outward', or 'inward', or 'outward and inward'?	300
1	Export promotion: 'looking outward' and seeing trade barriers	
A	Primary commodity export expansion	
B	Expanding exports of manufactured goods	
2	Import substitution: 'Looking inward' but still paying outward	
A	The strategy and results	
B	Tariff structures and effective protection	
3	Foreign exchange rates, exchange controls and the devaluation decision	
4	Conclusions: trade policies and development	
13.4	Economic integration: the potential benefits of looking both outward and inward	315
1	Some basic concepts	
2	Third World regional integration in practice: some case studies	
3	Conclusions	
13.5	Trade policies of developed countries: the need for reform	320
1	Rich-nation tariff and non-tariff trade barriers	
2	Export incentives of developed countries	
3	The problem of adjustment assistance	
4	Domestic economic policies	
	Concepts for review · Questions for discussion · Further readings	324
14	Foreign investment and aid: Old controversies and new opportunities	325
	Introduction: the international flow of financial resources	325

14.1	Private foreign investment and the multinational corporation	326
1	Multinational corporations: size, patterns and trends	
2	Private foreign investment: some 'pros' and 'cons' for development	
A	Traditional economic arguments in support of private investment: filling 'gaps'	
B	Arguments against private foreign investment: widening gaps	
C	Reconciling the pros and cons	
14.2	Foreign aid: the development assistance debate	332
1	Conceptual and measurement problems	
2	Why donors give aid	
A	Political motivations	
B	Economic motivations: 'two-gap' models and other criteria	
C	Economic motivations and self interest	
3	Why LDC recipients accept aid	
4	The effects of aid	
14.3	OPEC and development assistance	342
1	Surplus 'petrodollars'	
2	Two new initiatives	
3	Other possibilities	
A	Bilateral aid	
B	Expanded financial support for international assistance agencies	
C	Concessional oil sales	
D	Looking to the future	
14.4	Conclusions: towards a new view of foreign aid	346
	Concepts for review · Questions for discussion · Further readings	348

Part IV Possibilities and prospects

15	Development planning: theory and practice	350
	Introduction: the planning mystique	350
15.1	The nature of development planning	351
1	Basic concepts	
2	Planning in 'mixed' developing economies	
15.2	The rationale for planning in developing economies	352
1	The market failure argument	
2	The resource mobilization and allocation argument	
3	The attitudinal or psychological argument	
4	The foreign-aid argument	
15.3	The planning process: some basic models	354
1	Characteristics of the planning process	
2	Planning in stages: three basic models	
A	Aggregate growth models: projecting macro variables	
B	Input-output models and sectoral projections	
(i)	The basic idea	
(ii)	An illustration	
(iii)	The mathematical input-output model	
(iv)	Some extensions of the basic input-output model	
(a)	Determination of employment levels	
(b)	Balance of payments analysis	
(c)	Non-human primary inputs	

(v) Criticisms and conclusions	
C Project appraisal and social cost-benefit analysis	
(i) Social cost-benefit analysis: basic concepts and methodology	
(ii) Setting objectives	
(iii) Computing 'shadow' prices and social discount rates	
(iv) Choosing projects: some decision criteria	
D Conclusions: planning models and plan consistency	
15.4 Important considerations in choosing particular planning models	373
15.5 The crisis in planning: problems of implementation and plan failures	375
1 Theory versus planning practice	
A Factor prices, choice of technique and employment creation	
B Rural-urban imbalances and migration	
C The demand for education and the employment problem	
D The structure of the economy	
2 Reasons for plan failures	
A Deficiencies in plans and their implementation	
B Insufficient and unreliable data	
C Unanticipated economic disturbances both external and internal	
D Institutional weaknesses	
E Lack of 'political will'	
Concepts for review · Questions for discussion · Further readings	381
16 Monetary and fiscal policy: The role and limitations of the state	383
Introduction: an eclectic view of development policy	383
16.1 Some components of 'macro' economic policy in developing countries	384
1 Monetary and financial policies: the limitations of traditional macro instruments	
2 The emergence of development banking	
3 Fiscal policy for development	
A Taxation: direct and indirect	
B Fiscal policy to control inflation	
C Inflationary-financed industrial growth: scope and limitations	
16.2 The interrelationship between problems and policies	394
16.3 Development policy and the role and limitations of the state: concluding observations	396
Concepts for review · Questions for discussion · Further readings	399
17 Global interdependence and the 'new international economic order'	401
Introduction: the new interdependence	401
17.1 Manifestations of emerging global economic interdependence: Energy, food and natural resources	401
1 Energy and the world economy	
2 Raw materials and mineral resources	
3 World food shortages	
A Determinants of food demand: population and affluence	
B Constraints on supply: land, water, energy and fertilizers	

17.2 Some concluding observations: global interdependence and the 'new international economic order'	410
Questions for discussion · Further readings	412
Appendix 17.1	413
Santiago declaration of Third World social scientists, April 1974	
Appendix 17.2	414
Communique of the Third World forum conference in Karachi, January 1975	
Glossary	418
