Contents

1	Introduction	1
2	Availability and Structure of Lipases, Esterases, and Proteases	5
2.1	Lipases and Esterases	5
2.1.1	Introduction	5
2.1.2	Occurrence and Availability of Lipases	7
2.1.3	Classification of Lipases	10
2.1.4	General Features of PPL, PCL, CRL, CAL-B, and RML	11
2.1.4.1	PPL	12
2.1.4.2	CRL	12
2.1.4.3	RML	12
2.1.4.4	CAL-B	13
2.1.4.5	PCL	13
2.1.5	General Features of Esterases	13
2.1.6	Lipases and Esterases are α/β Hydrolases	14
2.1.7	Lid or Flap in Interfacial Activation of Lipases	17
2.1.8	Substrate Binding Site in Lipases and Esterases	17
2.2	Proteases and Amidases	20
2.2.1	Occurrence and Availability of Proteases and Amidases	20
2.2.2	General Features of Subtilisin, Chymotrypsin, and Other Proteases and Amidases	21
2.2.2.1	Substrate Binding Nomenclature in Proteases and Amidases	21
2.2.2.2	Subtilisin and Related Proteases	22
2.2.2.3	Chymotrypsin	22
2.2.2.4	Thermolysin	23
2.2.2.5	Penicillin G Acylase	23
2.2.2.6	Amino Acid Acylases	24
2.2.3	Structures of Proteases and Amidases	24
2.2.3.1	Serine Proteases – Subtilisin and Chymotrypsin	25
2.3	How to Distinguish Between Lipase, Esterase, and Protease	26
2.4	Screening and Directed Evolution	27
3	Designing Enantioselective Reactions	32
3.1	Quantitative Analysis	32
3.1.1	Kinetic Resolutions	32
3.1.2	Recycling and Sequential Kinetic Resolutions	33
3.1.3	Asymmetric Syntheses	36

4 Choosing Reaction Media: Water and Organic Solvents 39

- 4.1 Hydrolysis in Water 39
- 4.2 Transesterifications and Condensations in Organic Solvents 39
 - 4.2.1 Increasing the Catalytic Activity in Organic Solvents 41
 - 4.2.1.1 Choosing the Best Organic Solvent for High Activity 41
 - 4.2.2 Increasing the Enantioselectivity in Organic Solvents 42
 - 4.2.3 Acyl Donor for Acylation Reactions 44
 - 4.2.4 Water Content and Water Activity 47
 - 4.2.5 Synthesis of Amide Bonds Using Proteases and Amidases 50
- 4.3 Other Reaction Media 53
 - 4.3.1 Reverse Micelles 53
 - 4.3.2 Supercritical Fluids 54
- 4.4 Useful Techniques 58
 - 4.4.1 Assays for Hydrolase Activity 58
 - 4.4.1.1 Lipase Assays 58
 - 4.4.1.2 Esterase Assays 60
 - 4.4.1.3 Protease Assays 60
 - 4.4.2 Immobilization 61
 - 4.4.2.1 Increasing the Surface Area to Increase Catalytic Activity 61
 - 4.4.2.2 Lipid- or Surfactant-Coated Lipases 63

5 Survey of Enantioselective Lipase-Catalyzed Reactions 65

- 5.1 Alcohols 65
 - 5.1.1 Secondary Alcohols 65
 - 5.1.1.1 Overview and Models 65
 - 5.1.1.2 *Candida antarctica* Lipase B 70
 - 5.1.1.3 *Candida rugosa* Lipase 72
 - 5.1.1.4 Porcine Pancreatic Lipase 75
 - 5.1.1.5 *Pseudomonas* Lipases 77
 - 5.1.1.6 *Rhizomucor* Lipases 84
 - 5.1.1.7 Other Lipases 85
 - 5.1.1.8 Choosing the Best Route 86
 - 5.1.2 Primary Alcohols 88
 - 5.1.2.1 *Pseudomonas* Lipases 88
 - 5.1.2.2 Porcine Pancreatic Lipase 92
 - 5.1.2.3 Other Lipases 94
 - 5.1.2.4 Enantioselectivity of Lipases Toward Triglycerides 95
 - 5.1.3 Other Alcohols, Amines, and Alcohol Analogs 95
 - 5.1.3.1 Tertiary Alcohols and Other Quaternary Stereocenters 95
 - 5.1.3.2 Alcohols with Axial Chirality or Remote Stereocenters 98
 - 5.1.3.3 Alcohols with Non-Carbon Stereocenters 100
 - 5.1.3.4 Analogs of Alcohols: Amines, Thiols, and Hydroperoxides 103
- 5.2 Carboxylic Acids 107
 - 5.2.1 General Considerations 107

5.2.2	Carboxylic Acids with a Stereocenter at the α -Position	107
5.2.2.1	<i>Candida antarctica</i> Lipase B	107
5.2.2.2	<i>Candida rugosa</i> Lipase	108
5.2.2.3	<i>Pseudomonas</i> Lipases	110
5.2.2.4	Other Lipases	111
5.2.3	Carboxylic Acids with a Stereocenter at the β -Position	112
5.2.4	Other Carboxylic Acids	113
5.2.4.1	Quaternary Stereocenters	113
5.2.4.2	Sulfur Stereocenters	114
5.2.4.3	Remote Stereocenters	114
5.2.5	Double Enantioselection	115
5.2.6	Anhydrides	116
5.3	Lactones	117
5.4	Dynamic Kinetic Resolutions	122
5.5	Commercial Enantioselective Reactions	127
5.5.1	Enantiomerically-Pure Chemical Intermediates	127
5.5.2	Enantiomerically-Pure Pharmaceutical Intermediates	127
6	Chemo- and Regioselective Lipase-Catalyzed Reactions	131
6.1	Protection and Deprotection Reactions	131
6.1.1	Hydroxyl Groups	131
6.1.1.1	Primary Hydroxyl Groups in Sugars	132
6.1.1.2	Secondary Hydroxyl Groups	142
6.1.1.3	Hydroxyl Groups in Non-Sugars	147
6.1.2	Amino Groups	151
6.1.3	Carboxyl Groups	152
6.2	Lipid Modifications	156
6.2.1	1,3-Regioselective Reactions of Glycerides	156
6.2.1.1	Modified Triglycerides	157
6.2.1.2	Diglycerides	161
6.2.1.3	Monoglycerides	164
6.2.2	Fatty Acid Selectivity	167
6.2.2.1	Saturated Fatty Acids	167
6.2.2.2	Unsaturated Fatty Acids	168
6.3	Oligomerization and Polymerizations	169
6.4	Other Lipase-Catalyzed Reactions	172
7	Phospholipases	173
7.1	Phospholipase A ₁	173
7.2	Phospholipase A ₂	174
7.3	Phospholipase C	174
7.4	Phospholipase D	175

8 Survey of Enantioselective Protease- and Amidase-Catalyzed Reactions 179

- 8.1 Alcohols and Amines 179
 - 8.1.1 Secondary Alcohols and Primary Amines 179
 - 8.1.1.1 Overview and Models 179
 - 8.1.1.2 Subtilisin 180
 - 8.1.1.3 Other Proteases and Amidases 181
 - 8.1.2 α -Amino Acids via Reactions at the Amino Group 182
 - 8.1.2.1 Amino Acid Acylases 182
- 8.2 Carboxylic Acids 183
 - 8.2.1 α -Amino Acids via Reactions at the Carboxyl Group 183
 - 8.2.1.1 Subtilisin 184
 - 8.2.1.2 Chymotrypsin 185
 - 8.2.1.3 Hydantoinases 188
 - 8.2.1.4 Amidases 189
 - 8.2.2 Other Carboxylic Acids 190
 - 8.2.2.1 Subtilisin 190
 - 8.2.2.2 Chymotrypsin 191
 - 8.2.2.3 Other Proteases and Amidases 192
 - 8.2.3 Commercial Enantioselective Reactions 192
 - 8.2.3.1 Unnatural Amino Acids 192
 - 8.2.3.2 Other Carboxylic Acids 193

9 Reactions Catalyzed by Esterases 195

- 9.1 Pig Liver Esterase 195
 - 9.1.1 Biochemical Properties 195
 - 9.1.2 Overview of PLE Substrate Specificity and Models 196
 - 9.1.3 Asymmetrization of Carboxylic Acids with a Stereocenter at the α -Position 198
 - 9.1.4 Asymmetrization of Carboxylic Acids with Other Stereocenters 199
 - 9.1.5 Asymmetrization of Primary and Secondary *meso*-Diols 200
 - 9.1.6 Kinetic Resolution of Alcohols or Lactones 201
 - 9.1.7 Kinetic Resolution of Carboxylic Acids 202
 - 9.1.8 Reactions Involving Miscellaneous Substrates 202
- 9.2 Acetylcholine Esterase 203
 - 9.2.1 Biochemical Properties 203
 - 9.2.2 Application of AChE in Organic Syntheses 204
- 9.3 Other Mammalian Esterases 205
- 9.4 Microbial Esterases 205
 - 9.4.1 Carboxylesterase NP 206
 - 9.4.2 Other Microbial Esterases 208

10	Epoxide Hydrolases	209
10.1	Introduction	209
10.2	Mammalian Epoxide Hydrolases	212
10.3	Microbial Epoxide Hydrolases	213
10.3.1	Bacterial Epoxide Hydrolases	213
10.3.2	Fungal and Yeast Epoxide Hydrolases	216
11	Hydrolysis of Nitriles	221
11.1	Introduction	221
11.2	Mild Conditions	223
11.3	Regioselective Reactions of Dinitriles	226
11.4	Enantioselective Reactions	227
12	Glycosidases	231
