Foreword by J.H.P. Paelinck	xii
Preface	xiv
1 THE BACKGROUND AND MOTIVATION OF REGIONAL ECONOMIC POLICY AT A NATIONAL LEVEL	1
Introduction	1
Causes of regional disequilibrium	2
<i>Relatively low mobility of labour</i>	2
<i>Relatively low mobility of capital</i>	3
<i>The geographical factors</i>	4
<i>The economic structure</i>	5
<i>Other primary factors</i>	6
<i>Secondary factors</i>	7
Backwash and spread effects	9
<i>Backwash effects</i>	9
<i>The spread effects</i>	11
International trade theory applied to regions	12
Economic motives for regional economic policy	17
<i>The full utilisation of all factors of production</i>	17
<i>The economic growth argument</i>	20
<i>Optimum location of the firm</i>	20
<i>The cost of congestion</i>	21
<i>Regional disequilibria and inflation</i>	24
The environment argument for regional economic policy	28
The social motives for regional economic policy	30
<i>The full employment argument</i>	30
<i>Regional income distribution</i>	30
<i>Welfare considerations</i>	31
The political issues	31
The regional multiplier	32
<i>The regional income multiplier</i>	33
<i>The regional investment multiplier and the regional export multiplier</i>	38
<i>Regional employment multiplier</i>	39
Compatibility between regional economic policy and general economic policy on the national and European Community levels	41
<i>Compatibility on the national level</i>	41
<i>Compatibility on the European Community level</i>	42
Definition of regional economic policy	43

2	THE REGIONAL DISPARITIES IN THE EUROPEAN ECONOMIC COMMUNITY	49
	Introduction	49
	The geographical distribution of the population	50
	The geographical distribution of employment	57
	<i>Total employment</i>	57
	<i>The evolution of total employment</i>	58
	Income disparities	67
	The example of the United States	79
	Measurement of regional disparities and the evolution of income disparities in the countries of the Community	83
	<i>Measurement of the dispersion of extreme values</i>	83
	<i>Measurement of total dispersion</i>	84
	<i>Measurement of concentration</i>	85
	<i>Theil's index</i>	88
	Regional disparities, economic structure and shift-share analysis	90
	<i>The shift-share method</i>	90
	<i>An application of shift-share analysis</i>	92
	<i>Remarks with respect to the interpretation of the results</i>	95
	A regional comparative model	96
	<i>The structural equations</i>	96
	<i>The reduced form equations</i>	97
	Types of problem regions in the EEC	101
	Appendix 2.1 The evolution of <i>per capita</i> personal income by states and regions in the United States in comparison to the national average, selected years 1929–76	106
	Appendix 2.2 The evolution of employment by sector in Flanders, Wallonie and the EEC, 1950–70	109
3	'REGION', A RELATIVE NOTION	111
	Definition of an economic region	111
	Regional prototypes	112
	<i>Classification according to J. R. Boudeville</i>	112
	<i>Classification according to the rate of growth</i>	115
	<i>Classification according to the reciprocal influence</i>	116
	Some further considerations	116
	Final remark	119
4	MICRO AND MACRO ASPECTS OF THE LOCATION OF FIRMS	121
	Introduction	121

A. Weber, the father of location theory	121
A macro-economic approach. The gravitation and potentiality models	122
Transportation costs and distance costs	125
Industrial location and economic potential in Western Europe	127
<i>The concept of economic potential</i>	128
<i>The estimation of economic potentials</i>	128
<i>Application</i>	130
Importance of location factors	131
<i>Motives behind the location of international investments in North-West Europe</i>	131
<i>An evaluation of location factors of 900 industrial firms in Flanders</i>	131
Theories on the spatial distribution of economic activities	135
<i>Models of spatial organisation</i>	135
<i>Growth pole theory</i>	142
<i>The attraction model</i>	155
<i>An inter-regional attraction model</i>	160
<i>Environmental factors</i>	165
Analytical elements of a regional industrialisation policy	167
Final observations	171
Appendix 4.1 Mathematical appendix on the inter-regional attraction model	172
5 URBAN DEVELOPMENTS AND COSTS RELATED TO URBAN GROWTH	180
Introduction	180
A general presentation of the stages of urban development	180
<i>The first stage</i>	180
<i>The second stage</i>	182
<i>The third stage</i>	183
<i>Towards an optimum?</i>	184
<i>Simultaneous development</i>	187
Urban development in the EEC	190
Considerations on city size	194
<i>The minimum size approach</i>	194
<i>The minimum cost approach</i>	196
<i>The maximising of net income</i>	207
The advantages of urban concentration	210
The disadvantages of urban concentration	212
Urban concentration and individual preferences	215
Urban concentration and living costs	216
Urban concentration and the quality of urban life	217

6	THE REGIONAL IMPACT OF THE INTEGRATION PROCESS	227
	The fear of repercussions	227
	The spatial impact of a customs union: the Giersch model	230
	<i>The Giersch model</i>	230
	<i>The Giersch model and reality</i>	231
	The possible evolution of regional disparities in the case of a customs union	232
	<i>The possible evolution of existing activities</i>	232
	<i>Localisation of new activities</i>	234
	The frontier regions	235
	<i>Frontier problems</i>	236
	<i>The economic impact of economic integration on the frontier regions</i>	237
	Rigidities within countries that do not exist between them	238
	The impact of a monetary union	240
	Final remarks	250
7	OBJECTIVES AND STRATEGIES OF REGIONAL ECONOMIC POLICY IN EEC COUNTRIES	257
	The objectives of regional economic policy	257
	<i>Preliminary remarks</i>	257
	<i>Evolution of objectives and strategies</i>	258
	<i>The objectives of regional policy in EEC member countries</i>	263
	Criteria for the selection of regions to be assisted	280
	The strategy of regional development	284
	<i>How many regions should be promoted?</i>	285
	<i>The relation between growth pole theory and regional development</i>	286
	<i>How big should a centre be?</i>	291
	<i>What kind of instruments and activities should be promoted?</i>	296
	<i>The role of regional development agencies</i>	297
8	INSTRUMENTS OF REGIONAL ECONOMIC POLICY IN EEC COUNTRIES	304
	Categories of instruments	304
	<i>Infrastructure aids</i>	304
	<i>Financial aids or incentives</i>	307
	<i>Discouragement measures</i>	318
	<i>Decentralisation of government offices</i>	323

<i>Regional allocation of public investment and government orders</i>	323
<i>Regional development agencies</i>	324
Advantages and disadvantages of some regional instruments	325
<i>Investment grants</i>	325
<i>Soft loan systems</i>	327
<i>Tax exemptions</i>	327
<i>Regional employment premium or labour subsidies</i>	328
<i>Transport cost subsidy</i>	331
<i>Industrial sites and advance factories</i>	331
<i>IDC's and other building licence controls</i>	331
<i>Other discouragement measures</i>	336
Macro-economic evaluation methods of regional economic policy instruments	337
<i>Cost-benefit approach</i>	338
<i>Multiple regression approach based on autonomous factors</i>	342
<i>A modified shift-share analysis</i>	346
<i>The effect of regional policy on the movement of manufacturing industry in the United Kingdom</i>	347
9 MOBILITY AND MIGRATION	357
Introduction	357
Motives behind inter-regional migration	357
Migration models	358
<i>The Model of M.J. Greenwood</i>	358
<i>The model of L.H. Klaassen and P. Drewe</i>	361
<i>The J.A.M. Heijke—L.H. Klaassen study</i>	363
<i>The Bartels-Ter Welle study</i>	369
Mobility policy and migration policy	369
Mobility policy, migration policy and regional policy	371
Workers to the work or work to the workers?	373
Government action to influence geographical labour mobility: migration subsidy or not?	375
<i>The migration policy is a servant of general economic goals</i>	375
<i>Migration policy is a servant of regional policy</i>	377
10 REGIONAL ECONOMIC POLICY ON THE COMMUNITY LEVEL	382
The Treaty of Rome	382
<i>Implicit references</i>	382
<i>Derogation from the general rules</i>	383
<i>Methods and instruments designed to encourage regional policy</i>	384

Regional economic policy on the EEC level takes shape	385
The motives for regional economic policy on the Community level	394
<i>General EEC issues</i>	394
<i>The risk of overbid</i>	394
<i>A pre-condition for the realisation of a monetary and economic union</i>	395
<i>The realisation of other common policies</i>	398
<i>To meet the impact of the integration process and the new international division of labour</i>	400
The objectives of the regional policy in the EEC	401
<i>Objectives stated in the 'First Communication of the Commission on Regional Economic Policy in the EEC'</i>	402
<i>The objectives stated in the Commission's proposal to the Council</i>	402
<i>The guidelines for a Community regional policy stated in the Thomson Report</i>	403
<i>Aims stated in the framework of the new guidelines</i>	404
The strategy of regional development	405
Traditional instruments of EEC regional policy	409
<i>The coordination of national financial instruments</i>	409
<i>The European Investment Bank</i>	412
<i>Intervention in the framework of the Treaty of Paris</i>	414
<i>The European Social Fund</i>	418
<i>The European Agricultural Guidance and Guarantee Fund</i>	421
<i>Regional development studies</i>	422
The European Regional Development Fund	423
<i>The structure of the Fund</i>	423
<i>The intervention of the ERDF</i>	425
<i>Complementary character of Fund activity and national measures</i>	427
<i>The Fund's activity in the first period: 1975-77</i>	427
<i>The Regional Policy Committee</i>	429
The common policies	430
11 A NEW BASIS FOR REGIONAL POLICY ON THE COMMUNITY LEVEL	438
Introduction	438
A direct or indirect approach?	439
EEC coordination as a support to the direct approach	442
The FLEUR study as a means towards the creation of consistent regional policy for the territory of the Common Market as a whole	446
<i>Variables identified</i>	447

<i>The model</i>	449
<i>Significance of the FLEUR study</i>	450
Community regional policy should consider congested regions	451
A more powerful Regional Development Fund	453
Creation of new tools	453
<i>A regionally differentiated tax subsidy scheme</i>	454
<i>A regionally differentiated credit policy</i>	456
<i>Regional income transfers</i>	457
The necessity of integrating tertiary and quaternary activities in the regional economic policy	458
The problem in stagnant or declining large cities	459
Final considerations	460
Bibliography	463
Periodicals and Articles	472
Index	479
