

EPE-PEMC 2002

PROCEEDINGS

10th International Power Electronics and Motion Control Conference

**Cavtat & Dubrovnik, Croatia
September 9-11, 2002**

Table of Contents

A Word of Welcome from the Conference Chairman		XXXVII
KEYNOTES		1
The role of power electronics in future 42 V automotive electrical systems <i>John G. Kassakian</i>	KEY-01	3
Linear electromagnetic actuators and their control: A review <i>Ion Boldea</i>	KEY-02	12
Motion control taking environmental information into account <i>Kouhei Ohnishi, Mitsuharu Morisawa</i>	KEY-03	21
SPECIAL SESSION: Non model-based zero speed sensorless control techniques for AC motor drives		29
A study of sensorless control of induction motor at zero speed utilizing high frequency voltage injection <i>Dušan Drevenšek, Damir Žarko, Thomas A. Lipo</i>	SSAC-02	31
Sensorless rotor position control in a surface mounted PM machine using HF voltage injection <i>Cesar Silva, Greg M. Asher, Mark Sumner, Keith J. Bradley</i>	SSAC-03	32
Slot geometry – an important design parameter for zero speed sensorless control of standard induction machines <i>Thomas M. Wolbank, Reinhard Woehrschimmel, Juergen L. Machl</i>	SSAC-04	33
An alternative to high frequency current detection techniques for zero speed sensorless control of AC motor drives <i>Alfio Consoli, Giuseppe Scarcella, Antonio Testa</i>	SSAC-05	34
SPECIAL SESSION: Sliding mode control of drives		35
Sliding-mode torque control and observer design for an induction machine <i>Fang Chen, Matthew W. Dunnigan</i>	SSGA-01	37
Sliding mode approach in speed sensorless control of an induction motor <i>Karel Jezernik, Gregor Edelbaher, Asif Šabanović</i>	SSGA-02	38
Integral variable structure controller for small wind energy systems <i>Daniel Sbarbaro, Rubén Peña, Roberto Cárdenas</i>	SSGA-04	39
A modified approach to the design of robust speed and position control of servo drives <i>Stefan Brock, Jan Deskur, Krzysztof Zawirski</i>	SSGA-05	40
Shifted sliding surface for a DC motor drive <i>Franck Betin, Arnaud Sivert, Daniel Pinchon</i>	SSGA-07	41

SPECIAL SESSION: Present status of power devices and future possibility		43
Key milestone in the development of power semiconductors <i>Leo Lorenz</i>	SSHO-01	45
MOSFETs for power ICs: present status and future development <i>Florin Udrea, Ranick Ng</i>	SSHO-02	46
High voltage MOS-gated devices (IGBT/IEGT): present status and future possibility <i>Tsuneo Ogura, Hiromichi Ohashi, Kosaku Ichikawa</i>	SSHO-03	47
An integrated approach to power electronics systems <i>F. C. Lee, J. D. van Wyk, D. Boroyevich, T. M. Jahns, R. D. Lorenz, T. P. Chow, R. J. Gutmann, P. Barbosa</i>	SSHO-04	48
Prospects of the national project of ultra-low-loss power device technology in Japan <i>Kazuo Arai</i>	SSHO-05	49
High-voltage SiC and GaN devices for power electronics applications <i>T. Paul Chow</i>	SSHO-06	50
SPECIAL SESSION: Diagnosis of induction motor		51
A robust steady state detection in electromechanical system diagnosis <i>Fiorenzo Filippetti, Marcello Artioli</i>	SSHR-01	53
A method for the simulation of inter-turn short circuits in squirrel cage induction machines <i>Gilles Houdouin, Georges Barakat, Brayima Dakyo, Eric Destobbeleer</i>	SSHR-02	54
On space harmonics model of a three phase squirrel cage induction motor for diagnosis purpose <i>G. Didier, H. Razik, A. Abed, A. Rezzoug</i>	SSHR-03	55
Detection of induction motors broken bars by electromagnetic torque estimation using Kalman filtering <i>Mario Eltabach, Ali Charara, Ismail Zein</i>	SSHR-04	56
An approach to dynamic simulation of dynamic eccentricity in induction machines <i>Gojko M. Joksimović</i>	SSHR-05	57
SPECIAL SESSION: Non linear dynamic in power electronics and drives		59
Density aspects of chaotic DC-DC converters <i>Oliver Woywode, Henry Güldner</i>	SSIN-01	61
Local bifurcations in DC-DC converters <i>Chung-Chieh Fang, Eyad H. Abed</i>	SSIN-02	62
Modelling and instability of average current control <i>Chung-Chieh Fang</i>	SSIN-03	63
Bifurcation phenomena in a sliding-mode controlled boost converter <i>Gerard Olivar, Carles Batlle, Alicia Miralles, Imma Massana, Yolanda Zúñiga</i>	SSIN-05	64
Bifurcation analysis in PWM regulated DC-DC converters using average models <i>Luis Benadero, Abdelali El Aroudi, Gerard Olivar, Eliezer Toribio, Vanessa Moreno</i>	SSIN-06	65
Border collision bifurcations in a chaotic PWM H-bridge single-phase inverter <i>Robert Bruno, Robert Carl</i>	SSIN-07	66
Bifurcation phenomena in three-phase space vector modulated converters <i>Zoltan Sütő, Istvan Nagy</i>	SSIN-08	67
Internal model based sensorless control of a class of electrical machines <i>A. Astolfi, M. B. Becherif, R. Ortega</i>	SSIN-09	68

Stability analysis and bifurcations of switching regulators with PI and sliding mode control <i>Abdelali El Aroudi, Mohamed Debbat, Gerard Olivar, Javier Calvente, Roberto Giral, Luis Martinez-Salamero</i>	SSIN-10	69
SPECIAL SESSION: Packing and integration of power electronic converters		71
The development of planar high density hybrid integration technologies for power electronics <i>J. D. van Wyk, S. Wen, Z. Liang, J. T. Strydom, S-Y. Lee, W. G. Odendaal, D. W. Huff</i>	SSJAF-01	73
High power densities with three dimensional integration <i>J. A. Ferreira</i>	SSJAF-02	74
Technologies for passive component integration in power conversion <i>Terence O'Donnell, Stephen O'Reilly, Paul McCloskey, Cian O'Mathuna</i>	SSJAF-03	75
Comparison of spray cooling with direct liquid base-plate flow convection of IGBT power modules <i>G. Mitic, W. Kiffe, G. Lefranc, S. Rammingier, D. E. Tilton, B. A. Smetana, T. D. Weir</i>	SSJAF-04	76
Integrated multidisciplinary modeling, analysis and design in power electronics <i>Dushan Boroyevich, Jonah Z. Chen</i>	SSJAF-05	77
SPECIAL SESSION: Multilevel converters		79
Medium voltage converters, a cost effective solution for multi megawatt wind power turbines <i>Nikola Celanovic, Oscar Apeldoorn, Peter K. Steimer, Jürgen K. Steinke</i>	SSJB-01	81
Three-level front-end converters for distributed power systems <i>Peter Barbosa, Francisco Canales, Seong-Jeub Jeon, Fred C. Lee</i>	SSJB-02	82
Control of three-level VSI using LQR-based gain-scheduling technique for the regulation of the DC-link and the output voltages <i>Salvador Alepuz, Joan Salaet, Alex Gilabert, Josep Bordonau, Juan Peracaula</i>	SSJB-03	83
Generalized, versatile sine triangle comparison PWM scheme based upon a space vector scheme for three-level topology <i>Dognsheng Zhou, Vladimir Blasko, Josep Bordonau</i>	SSJB-04	84
SPECIAL SESSION: Non linear control of AC drives and speed estimation		85
Estimation of rotor speed for nonlinear control of the induction motor <i>Zbigniew Krzeminski</i>	SSJV-01	87
Shaft sensorless direct vector control of induction motor with forced dynamics <i>Ján Vittek, Miroslav Rapšák, Jozef Buday</i>	SSJV-02	88
Robust vector control of electrical drives using load torque estimation: an FPGA implemented synchronous motor application <i>Stephen J. Dodds, Sujith Jayasoma, Roy Perryman</i>	SSJV-03	89
Rotor flux observers and speed estimators for sensorless induction motor drives – comparative study <i>Teresa Orłowska-Kowalska</i>	SSJV-04	90
Sensorless induction motor drive with vector control <i>David Vinklarek, Pavel Brandstetter, Petr Palacky, Martin Kuchar</i>	SSJV-05	91
SPECIAL SESSION: Matrix converters		93
Commutation strategies for PWM rectifier of converter without DC link components for induction motor drive <i>Katsuji Shinohara, Kenichi Iimori, Mitsuhiro Muroya, Yoichi Matsusita</i>	SSJWK-01	95

Rectifier based robust control of bidirectional switches in AC-AC matrix converters <i>Marcus Ziegler, Wilfried Hofmann</i>	SSJWK-02	96
Analytically closed calculation of the conduction and switching losses of three-phase AC-AC sparse matrix converters <i>Frank Schafmeister, Martina Baumann, Johann W. Kolar</i>	SSJWK-03	97
Implementation of a matrix converter space vector control in programmable logic <i>Jörg Weigold, Olaf Simon, Jochen Mahlein, Jens Igney</i>	SSJWK-04	98
A direct power electronic conversion topology for multi-drive applications <i>Christian Klumpner, Frede Blaabjerg</i>	SSJWK-05	99
Comparison of losses in voltage source inverters and direct AC-AC converters <i>Michael Bland, Patrick Wheeler, Jon Clare, Lee Empringham</i>	SSJWK-06	100
Design of pulse patterns for matrix converters <i>Olaf Simon, Manfred Bruckmann, Hubert Schierling, Jochen Mahlein</i>	SSJWK-07	101
Comparison of different bidirectional bipolar switches for use in sparse matrix converters <i>A. Lindemann, M. Baumann, J. W. Kolar</i>	SSJWK-08	102
Minimization of matrix converter commutation times <i>Patrick Wheeler, Jon Clare, Lee Empringham</i>	SSJWK-09	103
SPECIAL SESSION: Field computations in electrical machines design and analysis		105
Finite element aided design of electrical machines: achievements and challenges <i>Jan Sykulski</i>	SSKH-01	107
3D eddy current calculations in electromechanical energy converters <i>Andrzej Demenko, Jan K. Sykulski</i>	SSKH-02	108
Specialized conductor models for finite element eddy current simulation <i>Herbert de Gersem, Kay Hameyer, Thomas Weiland</i>	SSKH-03	109
Finite-element models for electrical machines <i>Thomas Busch, Gerhard Henneberger</i>	SSKH-04	110
SPECIAL SESSION: State of the art of switching power conversion		111
Design of a boost push-pull converter with output filter <i>J. Calvente, E. Vidal-Idiarte, H. Valderrama, P. Garcés, L. Martínez-Salamero</i>	SSLS-01	113
Control and small-signal modelling of resonant link converter <i>Miro Milanović, Robert Kovačić</i>	SSLS-02	114
Sliding mode design of distributed circular chain control strategy for parallel-connected inverters <i>Rafael Ramos, Domingo Biel, Francesc Guinjoan, Enric Fossas</i>	SSLS-03	115
Design of power converters for new low power applications <i>Bruno Estibals, Corinne Alonso</i>	SSLS-04	116
An overview of MPPT controls and their future developments <i>Corinne Alonso, Bruno Estibals, Hugo Valderrama-Blavi</i>	SSLS-05	117
SPECIAL SESSION: Windenergy and offshore windparks		119
Windenergy and offshore windparks: state of the art and trends <i>P. Bauer, S. W. H. de Haan, M. R. Dubois</i>	SSPB-01	121
Sensorless direct power control of a doubly fed induction generator for variable speed wind turbines <i>Santiago Arnalte, José Luis Rodríguez-Amenedo</i>	SSPB-02	122

Comparison of the energy yield of wind turbines with individual AC/DC/AC converters and wind turbines connected to a common AC/DC/AC converter <i>I. Nusimovich, S. W. H. de Haan, J. G. Slootweg</i>	SSPB-03	123
Reliability study of the synchronous generator at the junction of wecs to a hybrid weak energy grid under different wind velocity <i>Evangelos C. Tsimplotsephanakis, Athanassios N. Safacas</i>	SSPB-04	124
Reliability normalizaation of autonomous system for transforming the wind's energy in electrical <i>Neli G. Georgieva, Anton Sl. Georgiev, Rozalina S. Dimova</i>	SSPB-05	125
Modelling and simulation of hybrid wind-photovoltaic generating system <i>Yann Pankow, Ludovic Leclercq, Bruno François, Benoît Robyns</i>	SSPB-06	126
SPECIAL SESSION: Recent advances and trends in electric motors for drives		127
Electric motors for the growth in the drive applications <i>Silverio Bolognani, Nicola Bianchi, Mauro Zigliotto</i>	SSSB-01	129
Electric motors for light traction <i>Jacek F. Gieras, Nicola Bianchi</i>	SSSB-02	130
Motors for home applications development of environment-friendly electric motors <i>Shigeo Morimoto, Yoji Takeda, Hiroshi Murakami</i>	SSSB-03	131
Electric motors for automotive applications <i>Tomy Sebastian, Sayeed Mir, Mohammad Islam</i>	SSSB-04	132
Application of soft magnetic composite materials to electric motors <i>Patricia Jansson</i>	SSSB-05	133
SPECIAL SESSION: Teaching and education in power electronics and drives		135
Teaching electric machines and drives: a re-examination for the new millennium <i>Tore M. Undeland, Ned Mohan</i>	SSTMU-01	137
The one-year project as a method for fusion of power electronics with other studies <i>Waldemar Sulkowski, Atle-Kjell Hjertenæs, Per-Åge Ljunggren</i>	SSTMU-02	138
Advanced prototyping tools for project- and problem- based learning <i>Remus Teodorescu, Michael M. Bech, Allan J. Holm, Kim B. Larsen, Frede Blaabjerg, John K. Pedersen</i>	SSTMU-03	139
Teaching basics of inductive power components by interactive JAVA applets for FEM-based on-line calculation of the magnetic flux distribution <i>Uwe Drofenik, Johann W. Kolar</i>	SSTMU-04	140
Challenges in the teaching of power electronics – motivation of new students <i>Jorma Kyyrä</i>	SSTMU-05	141
Advanced research and education in electrical drives by using digital real-time hardware-in-the-loop simulation <i>R. Bojoi, F. Profumo, G. Griva, R. Teodorescu, F. Blaabjerg</i>	SSTMU-06	142
Hardware and software environment for self-learning in power electronics <i>C. Fernández, O. García, J. A. Cobos, J. Uceda</i>	SSTMU-07	143
TOPIC 1: Power converters		145
Fixed frequency PWM high frequency inverter for induction heating using SIT <i>Hiroyuki Ogiwara, Misao Itoi, Mutsuo Nakaoka</i>	T1-001	147
Analysis and simulation of multilevel converter with self voltage balancing based of flying capacitors topology <i>Sobhi Delfo, Tahar Taleb, Heiner Jacobs, Juergen Petzoldt</i>	T1-003	148

Comparative evaluation of high power factor diode rectifiers with input resonant filters <i>J. Järvi, T. Sakkos, V. Sarv</i>	T1-004	149
Static sources for railway passenger wagons <i>Vasile Radulescu, Ioan Strainescu, Viorica Serbu, Leonard Moroianu, Florin Huzlau, Florin Bozas, Sergiu Gheorghe, Emil Tudor, Darius Vizireanu, Catalin Goia</i>	T1-006	150
Converter for mains supply – low-priced and intelligent <i>Stefan Soter, Stefan Buchhold</i>	T1-007	151
Design methodology for shunt active filters <i>Fabio Ronchi, Andrea Tilli</i>	T1-008	152
A novel near unity power factor converter system based on compensated controlled rectifier <i>Zhemerov George, Iliyana Nataliya, Krylov Denis, Sokol Evgen</i>	T1-009	153
High voltage three PWM rectifiers-seven-level NPC voltage source inverter cascade. Application to the induction machine drive <i>H. Gheraia, E. M. Berkouk, G. Manesse</i>	T1-012	154
A soft switching sinewave pulse modulated inverter with novel pulse regenerative type active auxiliary resonant bridge leg link snubbers <i>M. Nakamura, T. Yamazaki, M. Rukonuzzaman, S. Sato, E. Hiraki, M. Nakaoka</i>	T1-013	155
Analytical power loss expressions for diode clamped converters <i>Richard Lund, Jonas Beverfjord, Sigurd Øvrebo, Roy Nilsen</i>	T1-014	156
Bidirectional isolated DC/DC converter for energy storage integration in modular photovoltaic systems <i>Dirk Fischer, Rudolf Mecke, Christian Rathge</i>	T1-015	157
Control strategy of a solar power inverter (Analysis of a fifth order system-III) <i>K. H. Edelmöser, F. A. Himmelstoss</i>	T1-017	158
A resonant circuit of an AC to DC converter for contactless electrical energy transmission <i>Robert Stala</i>	T1-018	159
Overlapping current commutation inductor snubber-assisted series resonant soft switching PFM DC-DC converter with high frequency transformer link and voltage multiplier for magnetron drive <i>Takeshi Myoi, Manabu Ishitobi, Mutsuo Nakaoka</i>	T1-019	160
Practical configuration of single-pulse soft-switching PFC converter <i>Katsunori Taniguchi, Hiroki Baba, Toshimitsu Morizane</i>	T1-020	161
The conception of the two-section direct frequency converter <i>R. T. Shreiner, A. A. Efimov, A. I. Kalygin, K. N. Korukov, I. A. Mukhamatshin</i>	T1-021	162
Active and reactive power limits of three-phase PWM voltage source inverter connected to the grid <i>M. Chinchilla, S. Arnalte, J. C. Burgos, J. Sanz, J. L. Rodriguez</i>	T1-022	163
Coupled inductors method for current ripple minimising in modular converters <i>Maria Stefania Carmeli, Francesco Castelli Dezza, Gabrio Superti-Furga</i>	T1-023	164
Current feeded full bridge multiresonant converter <i>Stanislaw Jalbrzykowski, Tadeusz Citko</i>	T1-025	165
High frequency low voltage AC common bus to feed power converters for vehicle application <i>F. Gustin, A. Berthon</i>	T1-027	166
Power losses evaluation of the half bridge configuration parallel-loaded resonant DC-DC converter controlled with constant frequency <i>Wojciech Wojtkowski</i>	T1-028	167

Selection criteria for the switching intervals in DC-AC converters for harmonic reduction using the Walsh transform <i>Jesús Vicente Rodrigo, Rafael Pindado Rico, Inmaculada Martínez Teixidor</i>	T1-029	168
Preferable methods of direct frequency conversion <i>L. Ribickis, I. Galkins, L. Rutmanis, J. Stabulnieks</i>	T1-030	169
High voltage pulse generator <i>Marko Petkovšek, Janez Nastran, Danijel Vončina, Peter Zajec, Damijan Miklavčič, Gregor Serša</i>	T1-032	170
The starter-generating installation based on IGBT-inverters <i>S. A. Kharitonov, V. M. Berestov, G. G. Rodikov, A. A. Stennikov, G. S. Zinoviev</i>	T1-034	171
Analysis of a lossless snubber for BIFRED and BIBRED <i>Vesa Tuomainen, Jorma Kyyrä</i>	T1-035	172
Improved switching condition for a forward with active clamp <i>Vesa Tuomainen, Jorma Kyyrä</i>	T1-036	173
Efficiency of a voltage sourced inverter with controllable intermediate DC voltage <i>Paulo Pinho, Jorma Kyyrä</i>	T1-037	174
An extended structure of NPC three level converter as a universal power compensator <i>Jacek Rąbkowski, Mieczysław Nowak, Jarosław Matulka, Roman Barlik</i>	T1-038	175
A modular high power DC-DC converter with democratic current-sharing <i>Henry Guedner, Frank Eckhölz, Henrik Wolf, Jan Losansky</i>	T1-039	176
Comparison between hard and soft-switched DC/AC converters for usage in uninterruptible power supplies <i>Renken Folker, Patt Michael</i>	T1-040	177
A two level power conversion for high voltage DC power supply for pulse load applications <i>N. Vishwanathan, V. Ramanarayanan</i>	T1-041	178
Comparative consideration of some auxiliary resonant DC link snubbers for three phase soft switching inverter <i>Yoshihiko Hirota, Eiji Hiraki, Mutsuo Nakaoka, Shigeyuki Sugimoto, Shigeaki Ogawa</i>	T1-044	179
Three-phase power factor correction using extended-period quasi-resonant boost converters <i>K. K. Law, K. W. E Cheng, Y. P. B. Yeung, Y. Lu</i>	T1-045	180
A novel voltage clamped snubber circuit topology applied for multilevel inverter and its low power loss operations <i>Masayoshi Yamamoto, Shinji Sato, Mutsuo Nakaoka</i>	T1-047	181
Consideration of converter losses and generated harmonics in VSC-HVDC <i>Hiroo Konishi, Choei Takahashi, Hideto Kishibe, Hiromichi Sato</i>	T1-050	182
Soft commutated DC-DC power converter with high frequency transformer secondary side control scheme <i>M. Rukonuzzaman, Abdullah Al Mamun, Shinji Sato, Serguei Moisseev, Mutsuo Nakaoka</i>	T1-051	183
IGBT battery charger 150 A, 24 V for tram <i>Neven Čobanov, Želimir Ivanović, Ivan Bahun</i>	T1-053	184
A novel control technique for multilevel converters with limited output voltage range <i>Giuseppe Buja, Simone Castellan, David Szabo</i>	T1-054	185
Practical evaluation of three-phase PWM buck-mode PFC rectifier <i>Yasuyuki Nishida, Shuji Nakamura, Mutsuo Ishikawa, Kiyoto Yasui</i>	T1-055	186

Practical power loss simulation method for soft switching and hard switching semiconductor power conversion system <i>Eiji Hiraki, Mutsuo Nakaoka</i>	T1-057	187
Train-heating converter <i>Nenad Rister, Josip Ungarov, Neven Čobanov, Boris Furčić</i>	T1-058	188
A single stage dual block active power factor correction scheme <i>Doron Shmilovitz</i>	T1-060	189
Structure and design of high power chopper for DC arc furnace <i>Philippe Ladoux, Cyrille Bas, H. Foch, Jacques Nuns</i>	T1-061	190
A new solution to the unbalance problem of the input DC voltages of a five levels NPC-VSI by using sliding mode regulation <i>R. Chibani, E. M. Berkouk, G. Manesse</i>	T1-062	191
TOPIC 2: Semiconductor devices		193
New MOS gated triac structures for specific mains applications <i>A. Bourennane, M. Breil, J-L. Sanchez, P. Austin, J. Jalade</i>	T2-001	195
Can silicon surge voltage suppressors reach the absorption energy capability of varistors? <i>Vasile V. N. Obreja, Keith I. Nuttall, Alexandru Obreja</i>	T2-003	196
High current 75 V MOSFET module for 42 V automotive systems: sub-mW 600 A half-bridge and 300 A full-bridge modules <i>Tetsujiro Tsunoda, Masakazu Shintome, Nobuhiro Shingai, Kazunobu Nishitani, Georges Tchouangue</i>	T2-004	197
600 V trench gate PT type IGBT development utilizing ultra thin wafer technology <i>Shin'ichi Umekawa, Masahiro Tanaka, Takahiro Okuno, Tetsujiro Tsunoda, Nobutatsu Kimura, Shoichiro Kurushima, Tomoko Matsudai, Akio Nakagawa</i>	T2-005	198
New magnetic driver for bistable electronic power switches <i>J. Jalade, M. Breil, J. L. Sanchez, R. Pezzani</i>	T2-006	199
He voids lifetime control compared with buffer-layer engineering for a 600 V punch-through IGBT <i>Ettore Napoli, Antonio G.M. Strollo, Paolo Spirito, Ferruccio Frisina, Leonardo Fragapane, Domenico Fagone</i>	T2-007	200
Fast emitter commutated thyristor for current-fed frequency converters <i>Alexey M. Surma, Alexander Y. Semenov</i>	T2-008	201
A simple thermal conductivity measurement system <i>F. Madrid, X. Jordà, P. Godignon, M. Vellvehi, J. Rebollo</i>	T2-009	202
Switching characterization of the reverse blocking IGBTs in a matrix converter structure without diodes <i>Jean-Jacques Huselstein, Hervé Boulant, Christian Glaize</i>	T2-011	203
Low on-resistance 40 V LDMOS with a new RESURF structure in submicron BCDMOS <i>S. K. Lee, Y. C. Choi, C. J. Kim, T. H. Kwon, H. S. Kang, C. S. Song</i>	T2-012	204
PSPICE – functional models of power semiconductor devices for power electronics applications <i>Jan Deskur, Jan Piłaciński</i>	T2-013	205
Single chip implementation of 600 V IGBT and freewheeling diode <i>Ettore Napoli, Antonio G.M. Strollo, Paolo Spirito, Ferruccio Frisina, Leonardo Fragapane, Domenico Fagone</i>	T2-014	206
From transient thermal impedance measurement to successful electrothermal simulation <i>Željko Jakopović, Viktor Šunde, Zvonko Benčić</i>	T2-016	207

Voltage source inverter in the medium voltage range <i>M. Ruff, R. Sommer, G. Zaiser</i>	T2-017	208
4.5 kV SiC PN-diodes with high current capability <i>Matthias Braun, Benno Weis, Wolfgang Bartsch, Heinz Mitlehner</i>	T2-018	209
A simple evaluation method of the transient thermal response of semiconductor packages: theory, application and identification procedure <i>N. Y. A. Shammass, M. P. Rodriguez, F. Masana</i>	T2-019	210
Application of SiC devices in power supplies <i>Tobias Reimann, Juergen Petzoldt, Ilia Zverev, Heinz Mitlehner, Peter Friedrichs</i>	T2-020	211
TOPIC 3: Control of converters		213
Hysteresis current regulation for the field-oriented-controlled induction motor drives with matrix converter <i>V. Perelmutter</i>	T3-001	215
PC-based control hardware for 200 kW double three-level converter <i>Maximilian Kail, Volker Staudt, Andreas Steimel</i>	T3-002	216
FPGA-based modulator for five-level inverter control using pulse patterns for harmonic elimination <i>D. Hasenkopf, E. Weigand, J. Xie</i>	T3-004	217
Special operating conditions and control procedures of energy converters for half-wave X-ray equipment <i>Miklós Horváth, József Borka</i>	T3-005	218
Analysis of energy converters for DC and AC supply sources operated from an accumulator plant on field <i>Miklós Horváth, József Borka</i>	T3-006	219
A hysteresis modulation technique for NPC inverters in digitally controlled induction motor drives <i>Armando Bellini, Stefano Bifaretti, Stefano Costantini</i>	T3-007	220
Generalized voltage control for a multi-purpose switching-mode converter <i>D. V. Nicolae, M. J. Case</i>	T3-008	221
High quality voltage source using a multi-converter strategy <i>Nicolas Ginot, Jean-Claude le Claire</i>	T3-010	222
DC-DC converter with intelligent power module safety operation problems of IPM <i>Maciej Tondos, Stanislaw Kosiorowski, Adam Pracownik</i>	T3-011	223
Microprocessor-based PWM inverter <i>Piotr Michalak, Andrzej Stobiecki, Maciej Tondos</i>	T3-012	224
A new modulation method to reduce common-mode voltages in multilevel inverters <i>J. Rodriguez, J. Pontt, P. Correa</i>	T3-013	225
Analysis of flux and torque control improvement of AC motor controlled by DTC method <i>Andrzej Sikorski, Marek Korzeniewski</i>	T3-014	226
Modeling and control of a three-phase neutral-point-clamped inverter by means of a direct space vector control of line to line voltages <i>Bruno François, Eric Semail</i>	T3-015	227
Control of a three phase inverter feeding an unbalanced load and operating in parallel with other power sources <i>Matthias Hauck, Helmut Späth</i>	T3-018	228
Investigation of a current controller in synchronous reference frames for inverter-based active balancing of single-phase railway loads <i>D. Hasenkopf, J. Xie</i>	T3-020	229

H ∞ control of a bi-directional flyback power converter <i>Wieslaw E. Bury, Dariusz Czarkowski, Jerzy Dzieża, Stanley Lewis, Shashi Ramamurthy</i>	T3-021	230
Triphase cascaded converters with direct synchronous pulsewidth modulation <i>Valentin Oleschuk, Frede Blaabjerg, Bimal K. Bose</i>	T3-022	231
Spice dynamic macromodel of PWM controller with selfheating taken into account <i>Janusz Zarębski, Krzysztof Górecki</i>	T3-023	232
Reference harmonics reduction method for utility tie converter with digital controller <i>Hajime Shiraishi, Jumpei Baba, Katsuhiko Shutoh, Masaaki Ohshima, Eisuke Masada</i>	T3-024	233
A voltage sag detection algorithm based on rectified voltage processing <i>R. Chiumeo, A. Florio, A. Mariscotti, M. Mazzucchelli</i>	T3-026	234
Compensation of buck PWM rectifier input current harmonics caused by distorted line voltages <i>Mieczysław Nowak, Jarosław Matulka, Jacek Rabkowski, Roman Barlik</i>	T3-027	235
Bandwidth and maximum switching frequency of multicell converters <i>Rafik Ameer, Maurice Fadel, Thierry Meynard</i>	T3-029	236
A fuzzy current control for three-phase four-wire shunt active filters <i>Antonio Dell'Aquila, Agostino Lecci</i>	T3-030	237
Use of resonance in the control of a current source rectifier <i>X. Guillaud, P. Degobert, J. F. Glowacka</i>	T3-031	238
Low switching frequency PWM with selective harmonic elimination for three-phase three-level inverters <i>Jorge Pontt, José Rodríguez, Rodrigo Benavides, Raimundo De Solminihaç, Matthias Müller</i>	T3-033	239
A novel control concept for highest precision accelerator power supplies <i>Felix Jenni, Lukas Tanner, Mladen Horvat</i>	T3-034	240
Development of embedded control based on simulation <i>Pavol Bauer, Peter J. van Duijsen</i>	T3-036	241
Experimental investigation of overmodulation region of inverter-fed AC drives <i>Sándor Halász, István Varjasi, Alexej Zacharov</i>	T3-037	242
Control of AC-DC line frequency resonant converter <i>Kuno Janson, Jaan Järvi, Toomas Vinnal</i>	T3-038	243
TOPIC 4: Electromagnetic compatibility		245
The influence of certain PWM methods on the quality of input energy of the asynchronous motor and frequency converters driving system <i>Mihaela Popescu, Alexandru Bitoleanu</i>	T4-001	247
Conducted emissions of electronic power sources for resistance welding <i>Hubert Mecke, Reinhard Doeblin, Thoralf Winkler</i>	T4-002	248
Conducted EMI in four-quadrant AC drive system <i>Adam Kempinski, Robert Smolenski, Ryszard Strzelecki</i>	T4-003	249
New power quality assessment indices for three-phase four-wire systems under unbalanced and non-sinusoidal conditions <i>Antonio Dell'Aquila, Maria Marinelli, Vito Giuseppe Monopoli, Pericle Zanchetta</i>	T4-004	250
Total harmonic current of a large number of non-linear single phase loads <i>Jan Desmet, Isabel Sweertvaegher, Greet Vanalme, Ronnie Belmans</i>	T4-005	251
Impact of ASD EMI emissions on wireless communications <i>Gordan Šišul, Drago Ban, Borivoj Modlic</i>	T4-006	252

A DSP based system for power quality indexes determination under non-sinusoidal conditions <i>F. Magnago, S. Lovera, A. Costanzo</i>	T4-007	253
The wavelet analysis of electrical impulse phenomena <i>Ondrej Smotlacha, Jaroslav Zacek</i>	T4-009	254
A current control for three-phase four-wire shunt active filters <i>Antonio Dell'Aquila, Agostino Lecci</i>	T4-010	255
Reducing costs for a fuzzy controlled shunt active filter under non-sinusoidal conditions <i>Antonio Dell'Aquila, Agostino Lecci, Vito Giuseppe Monopoli</i>	T4-011	256
Source detection of 100 Hz current in a static system tie converter <i>Helmut Weiss, Armin Effenberger</i>	T4-012	257
Magnetic field distribution in GMR sensor structure and sensors application aspects <i>Vladimir Áč, Marián Miller</i>	T4-014	258
TOPIC 5: Application of power electronic system		259
Prognosis for integrated starter alternator systems in automotive applications <i>John M. Miller, Victor R. Stefanovic</i>	T5-001	261
Calibration of premagnetized linearity correctors for CRT-monitors <i>David Nedeljković, Vanja Ambrožič, Janez Nastran</i>	T5-002	262
The application of the class E MOSFET amplifier for dielectric heating <i>H. C. v Z. Pienaar, M. J. Case</i>	T5-003	263
A novel photovoltaic array maximum power point tracker <i>M. J. Case, M. J. Joubert, T. A. Harrison</i>	T5-005	264
Modeling a 80 kV DC pulse source for pulsed electric fields (PEF) <i>B. Roodenburg, J. Morren, S. W. H. de Haan, H. A. Prins, Y. L. M. Creyghton</i>	T5-006	265
Measuring non-linear rectifier load characteristics with a controlled-current power converter <i>Hamish Laird, Simon Round, Richard Duke</i>	T5-007	266
Asymmetrical duty cycle controlled high frequency soft switching inverter for electromagnetic induction fluid heater <i>Hideki Sadakata, Yoichi Kurose, Mutsuo Nakaoka, Hidekazu Yamashita, Hideki Omori</i>	T5-008	267
Novel power supply configurations for high voltage systems <i>M. J. Case, J. F. Janse van Rensburg, D. V. Nicolae</i>	T5-011	268
Pulse density modulated zero current soft-switching series resonant high frequency inverter for consumer induction-heated roller <i>Kudryavtsev Oleg, Yue lu Feng, Hidenori Shira, Atsushi Okuno, Mutsuo Nakaoka</i>	T5-012	269
Power electronics in automotive hybrid drives <i>Zdenek Čerovský, Stanislav Fligl, Zdeněk Halámka, Petr Hanuš, Pavel Mindl, Vladek Pavelka</i>	T5-013	270
Battery charger for a mobile robot using a forward quasi-resonant converter with zero current switching (QRC-ZCS) with average current control mode <i>Carlos Sánchez, Fernando Ibáñez, Antonio Mocholí, Miguel Alcañiz, Santiago Alegre, Salvador Orts</i>	T5-014	271
Voltage sags effects on the operation of a synchrotron light source: experimental analysis and solution project <i>Roberto Visintini, Stefano Quaia, Riccardo Chiumeo</i>	T5-015	272
A step-down multi-phase converter, based on IGBT technology, for traction applications <i>Marek Kowalczewski, Wojciech Mysiński, Waldemar Zajac</i>	T5-017	273

Install location study of SMES for high-speed railway system <i>Yuuki Tsuchiide, Jumpei Baba, Katsuhiko Shutoh, Eisuke Masada</i>	T5-019	274
Design optimization of soft switching PWM inverter for diesel emission control system using induction heating <i>Sachio Kubota, Nobuo Ogawa, Yoshihiro Shimaoka</i>	T5-020	275
Novel control strategy of motor torque ripple in hybrid vehicle <i>Slim Tnani, Patrick Coirault, Gérard Champenois</i>	T5-021	276
High efficiency FPGA based transconductance amplifier for 'AMB application <i>M. Chiaberge, C. Damilano, F. Maddaleno</i>	T5-022	277
Multilevel inverters adapted to photovoltaic energy conversion <i>H. Valderrama-Blavi, C. Alonso, L. Martínez-Salamero, M. F. Shraif, A. Cid-Pastor, R. Pedrola, J. Calvente</i>	T5-024	278
Unconventional power modulators for mono- and three- phase resistive heaters <i>P. Bolognesi, D. Casini, L. Taponecco</i>	T5-025	279
Excitation system for piezoelectric atomizer characterization <i>X. Jordà, M. Lozano, E. Chico, A. Lozano, H. Amaveda, F. Barreras</i>	T5-026	280
Functional electrical stimulator without using transformer for voltage step-up and its associated adaptive neural network control for arm movements <i>K. W. E. Cheng, L. Cao, K. Y. Tong, A. B. Rad, H. K. Chow, D. Sutanto, Y. Lu</i>	T5-027	281
Test procedure to determine the energetic model of an electric vehicle through on board measurements <i>L. Ferraris, A. Tenconi</i>	T5-031	282
Stability analysis of power circuit including negative inductance produced by variable active-passive reactance (VAPAR) <i>Hirohito Funato, Takashi Ogura</i>	T5-034	283
Extended utilization of the inverter at photovoltaic systems <i>Osvald Droegsler, Helmut Weiss</i>	T5-036	284
Computer modelling of a system: supply circuit – locomotive with AC motors in order to determine current harmonics <i>Waldemar Zajac, Wojciech Czuchra</i>	T5-037	285
Universal battery tester <i>Josip Jurić, Matija Matišić, Branko Vukić</i>	T5-038	286
A switching-mode DC/DC converter for automotive dual voltage electrical networks <i>Jacek Chęcinski, Zdzisław Filus, Edward Hryniewicz, Flavio Girardengo</i>	T5-040	287
TOPIC 6: Power electronics in electrical energy generation, transmission and distribution		289
Simulation study on enhancement of maximum power transfer capability of long transmission line with midpoint sitting STATCOM for voltage support <i>S. Kincic, A. Chandra, Z. Huang, S. Babic</i>	T6-001	291
A novel stand-alone single-phase induction generator using a three-phase machine and a single-phase PWM Inverter <i>J. Soltani, N. R. Abjadi</i>	T6-002	292
A simple maximum power point tracking control employing Fibonacci search algorithm for power conditioners of photovoltaic generators <i>Masafumi Miyatake, Tooru Kouno, Motomu Nakano</i>	T6-003	293
Investigations on the effect of field weakening on the efficiency of generators for wind turbines <i>I. Nusimovich, S. W. H. de Haan, J. G. Sloopweg, H. Polinder</i>	T6-004	294
Self-commutated flicker compensator applying flat-packaged IGBT <i>Kansuke Fujii, Shigeo Konishi, Masashi Kato, Katsuya Uto</i>	T6-006	295

Comparison of DC/DC converter topologies with, and without transformer <i>M. Pavlovsky, S. W. H. de Haan, J. A. Ferreira</i>	T6-007	296
Unified power flow controller (UPFC) and its effect over an uncompensated parallel line <i>R. León Vasquez-Arnez, Luiz Cera Zanetta</i>	T6-008	297
Results of a novel failure proof control and power section for rotating system tie frequency converters <i>A. Schmidhofer, Helmut Weiss, Osvald Droegeles</i>	T6-010	298
DSP-based experimental rig with the doubly-fed induction generator for wind-turbines <i>Balduino Rabelo, Wilfried Hofmann</i>	T6-011	299
Active power filters for suppression of line current and voltage harmonics <i>Pavel Brandstetter, Tomas Mlcak</i>	T6-012	300
Three-phase shunt active power filter using IGBT based voltage source inverter <i>Tomislav Kilić, Stanko Milun</i>	T6-013	301
A new positive sequence voltage detector for unbalanced power systems <i>P. Rodríguez, J. Bergas, J.A. Gallardo</i>	T6-015	302
Digital control circuit for current-fed active power filter <i>Krzysztof Sozański, Ryszard Strzelecki</i>	T6-016	303
PWM inverter matches generator conductance for maximum power transfer in grid-connected photovoltaic systems <i>Franco Quarona, Federico Scapino, Filippo Spertino</i>	T6-017	304
Selection of the parallel active filter's power rating when it is applied in distribution systems <i>Ryszard Strzelecki, Henryk Supronowicz, Grzegorz Benysek, Jacek Bojarski, Marius Klytta</i>	T6-018	305
A DC-AC converter for solar power applications <i>S. Shirsavar, M. McCulloch, J. S. Knight, A. Wheldon</i>	T6-019	306
A low cost 10 kW fuel cell inverter for domestic power <i>Jody J. Nelson, Andrew M. Tuckey</i>	T6-020	307
Fuzzy logic based control of a flywheel energy storage system based on an induction machine associated with wind and diesel generators <i>Ludovic Leclercq, Benoit Robyns, Jean-Michel Grave</i>	T6-022	308
Characteristics of high-speed phase shifter at demand side during load fluctuation <i>Hajime Shiraishi, Jumpei Baba, Katsuhiko Shutoh, Eisuke Masada</i>	T6-023	309
Control method of power units with compensation for unbalanced load <i>Luděk Schreier, Miroslav Chomát, Jiří Bendl</i>	T6-024	310
Excitation system with microprocessor based twin-channel voltage regulator for synchronous machines <i>Vinko Česić, Mladen Kajari, Siniša Marijan, Zvonko Jurin, Marin Kolić</i>	T6-026	311
A flexible test-bench for power quality conditioning algorithms testing <i>I. Etxeberria-Otadui, U. Viscarret, S. Bacha, R. Rezero</i>	T6-027	312
Sliding mode control and robust analysis of parallel hybrid filters <i>Jérôme Bosche, Slim Tnani, Olivier Bachelier</i>	T6-028	313
Single phase active power line conditioners without transformers <i>Grzegorz Meckien, Strzelecki Ryszard</i>	T6-030	314
Neural network-based controller for an active power filter <i>Bogusław Swiatek, Zbigniew Hanzelka</i>	T6-032	315
Filtering properties of the selected double tuned passive filter structures designed using genetic algorithm <i>Ryszard Klempka, Zbigniew Hanzelka</i>	T6-033	316

Dynamic performance of a power conditioner applied to photovoltaic sources <i>Gabriele Grandi, Domenico Casadei, Claudio Rossi</i>	T6-034	317
Specification guidelines to improve power quality immunity and reduce plant operating costs <i>Roger Lawrence, W. A. (Bill) Moncrief</i>	T6-035	318
On implementing recent computer-based technologies to develop electric and electronic micro industries <i>A. M. Abdel-Hamid</i>	T6-036	319
High voltage multi-cellular converters applied to AC/AC conversion <i>David Gerry, Patrick Wheeler, Jon Clare</i>	T6-037	320
3-phase DSP controlled active compensation shunt system <i>Michał Gwóźdź, Ryszard Porada, Leszek Frąckowiak</i>	T6-038	321
Digital control of a 1 kW battery charger with a single IGBT switch in the grid <i>Francisco J. Gimeno, Salvador Seguí, Salvador Orts, Rafael Masot, Fernando Ibañez</i>	T6-039	322
Power quality enhancement and harmonic compensation scheme for asymmetrical nonlinear loads <i>A. M. Sharaf, Pierre Kreidi</i>	T6-041	323
Utilisation of renewable and waste energy by turbine-generator system in disperse power plants <i>Rafael K. Járdán, István Nagy, Wolf-Rüdiger Canders, Tamás Ruzsányi, Dezső Bereknýei</i>	T6-042	324
Decoupling multivariable GPC control of UPFC-based power flow compensation <i>T. Allaoui, M. A. Denai, M. Bouhamida</i>	T6-044	325
Simple direct power control of three-phase PWM rectifier using space vector modulation <i>Mariusz Malinowski, Marek Jasiński, Marian P. Kazmierkowski</i>	T6-045	326
Digital control system of a synchronous generator <i>Gorislav Erceg, Tomislav Idžotić, Nikola Tonković</i>	T6-046	327
An analysis of voltage sags ride-through methods for modern AC drives <i>Vladimir Katić, Dejan Raca, Milan Hajder</i>	T6-047	328
High voltage multilevel flying-capacitor type inverter <i>Jiří Pavelka</i>	T6-051	329
TOPIC 7: Sensing and observing		331
Identification and observation of mechatronic systems with unknown nonlinear dynamic functions <i>Stefan Hofmann, Thomas Treichl, Dierk Schröder</i>	T7-002	333
Sensor-less speed control based on fuzzy estimator <i>J. Català, L. Romeral, A. Arias, M. R. Chekkouri</i>	T7-003	334
Auto-tuning of permanent magnet motor drives with observer based parameter identifiers <i>Jacek Kabziński, Tomasz Sobieraj</i>	T7-005	335
Sensorless control of PMSM with modified observer structure <i>Konrad Urbaniski, Krzysztof Zawirski</i>	T7-006	336
Sensorless speed detection of induction machines using S-method decomposition <i>Aleksandar Obradovic, Momir Djurovic</i>	T7-007	337
Sensorless position and speed estimation in induction machines <i>Nikolas Teske, Cyril Spiteri Staines, Joseph Cilia, Greg Asher</i>	T7-008	338
Neural network improvement of model reference adaptive system in induction motor drive <i>Jerzy Jelonekiewicz</i>	T7-009	339

Effect of equation of motion on low-frequency impedance of induction motors – an approach for rotor flux angle estimation <i>Veli-Matti Leppänen, Jorma Luomi</i>	T7-010	340
Neural network based tuning of speed observer for control system of induction motor <i>Miroslaw Włas, Zbigniew Krzemiński</i>	T7-011	341
Detection of squirrel-cage breaks in induction machines <i>Stjepan Štefanko, Marijan Bogut, Ivan Kurtović</i>	T7-013	342
Signal testing and diagnosing in CAN communication based control networks without PC <i>D. Fodor, T. Bencze, V. Hauptmann, M. Molnár, K. Horváth, T. Göndör</i>	T7-014	343
Torque estimation in industrial control systems with AC slip-ring motors <i>Fetah Kolonić, Alojz Slutej, Alen Poljuga</i>	T7-015	344
Application of extended Kalman filter for road condition estimation <i>Jadranko Matuško, Ivan Petrović, Nedjeljko Perić</i>	T7-017	345
Adaptive equivalent integrator for flux estimation in wide speed range for sensorless control of AC drives <i>Gheorghe Daniel Andreescu</i>	T7-018	346
Study of methods for induction machine torque monitoring <i>Novák Jaroslav, Gregora Stanislav, Schejbal Vladimír</i>	T7-020	347
TOPIC 8: Electrical machines and actuators		349
Braking operations of electrical drives including asynchronous motors <i>D. Iannuzzi, E. Pagano, L. Piegari, O. Veneri</i>	T8-001	351
The causes and reduction of rotor bar breakages in large squirrel cage induction motors <i>G. M. J. Parsley</i>	T8-002	352
Effects of stator and rotor slottings on the performance of a new type of converter-fed synchronous motor drive/system <i>J. Soltani, N. R. Abjadi</i>	T8-003	353
Magnetic field determination in a motor with slots using conformal mappings <i>Miroslav Marković, Marcel Jufer</i>	T8-009	354
Design considerations of an axial flux permanent magnet machine with U-shaped stator <i>Eefje Peeters, Paul Van Tichelen</i>	T8-010	355
Application of Newton-Raphson method combined with analytical equations for determination of the induction motor equivalent circuit parameters <i>Vedran Boras, Sead Berberović</i>	T8-011	356
Identification of induction motor parameters from free acceleration test measurements <i>Martin Jadrić, Marin Despalatović, Božo Terzić</i>	T8-012	357
Analysis of squirrel cage induction motor performance using a prototype based on DSP <i>João A. Moor Neto, Nelson C. de Jesus, Samir A. Mussa, Diorge B. Zambra, Fabiano Salvadori, Gideon Villar Leandro</i>	T8-015	358
Characterisation of Kouznetsov single-phase oscillating linear parametric motor <i>R. Abdessemed, D. Hedjazi, V. F. Tomachevitch</i>	T8-020	359
A simple way to lower transient I ² R losses in small induction motor drive <i>Jerzy Zadrożny, Jarosław Zadrożny</i>	T8-021	360
Nonlinear modelling of switched reluctance motor <i>V. Trifa, O. Rabulea, L. Zarnescu</i>	T8-023	361

Determination of parameters in Jiles-Atherton model from the family of hysteresis loops <i>Zdzisław Włodarski, Jadwiga Włodarska</i>	T8-024	362
Identification of the parameters of induction machine <i>Naceri Farid, Abida Lazhar</i>	T8-025	363
MMF of high phase order induction motors for different shapes of supply voltages and currents <i>Jacek Grochowalski</i>	T8-026	364
Neural network and genetic algorithm as a new approach in design optimization of induction machines <i>Jasmin Smajić, Sead Berberović, Vlado Madžarević, Izudin Kapetanović, Zijad Haznadar, Amir Tokić</i>	T8-027	365
Application, calculation and analysis of the doubly fed longstator linear motor for the wheel-on-rail NBP test track <i>Bo Yang, Horst Grotstollen</i>	T8-028	366
Implementation of fuzzy controller for DC-servo drive using a low-cost microcontroller <i>Sinan Pravadaliloglu, Eyüp Akpınar</i>	T8-029	367
Some considerations on the design method of a linear parametric motor with double driving surfaces <i>Kazumi Ishikawa, Tatuya Sekimoto, Shinki Kikuchi</i>	T8-030	368
Computer aided dynamic regime analysis of electric machines <i>Gheorghe Atanasiu, Ciprian Sorandaru</i>	T8-031	369
Computation of magnetic force developed by linear synchronous motors based on finite-element method <i>Ferenc Tóth, Norbert Szabó</i>	T8-032	370
Torque derivative approach to the direct torque control of induction motor <i>Miran Rodič, Karel Jezernik</i>	T8-034	371
Induction machine testing using PROFIBUS industrial communication network <i>Mario Vražić, Ivan Gašparac, Zoran Šimunić</i>	T8-035	372
Inductance calculation in switched reluctance motors <i>Hansjörg Köfler, Irma Hajdarevic</i>	T8-036	373
Design rules for minimum cogging torque in a permanent magnet motor <i>Ekaterina Bozeva</i>	T8-037	374
Design method of reluctance synchronous motor with axially laminated rotor <i>Valéria Hrabovcová, Pavol Rafajdus, Peter Hudák, Marek Franko, Jozef Mihok</i>	T8-040	375
Low-noise EC motor with external rotor for automotive application <i>Michael Schier, András Lelkes</i>	T8-041	376
Torque ripple reduction in switched reluctance motors by pole tip shaping <i>Yusuf Ozoglu, Nurdan Guzelbeyoglu, Muhammet Garip, Erkan Mese</i>	T8-042	377
Design of a high power density electromagnetic actuator for a portable braille display <i>Tiene Nobels, Frank Allemeersch, Kay Hameyer</i>	T8-044	378
Genetic algorithm based design of current control for a PMSM <i>P.-O. Nyman, W. Sulkowski, T. Dragset, D. Samuelsen</i>	T8-045	379
The coaxial transformer – the influence of primary winding shape on the transformer properties <i>Bogusław Grzesik, Mariusz Stępień</i>	T8-048	380
Design and analysis of a permanent magnet generator in the steady state load conditions <i>Livio Susnjic, Zijad Haznadar, Drago Ban</i>	T8-049	381

PM coreless type surface motor <i>Hiroyuki Ohsaki</i>	T8-050	382
Development of low permeability transformer based on polymer bonded magnetic materials <i>K. W. E. Cheng, D. K. W. Cheng, C. Y. Tang, Y. L. Ho, Y. Lu</i>	T8-051	383
On a high force modular surface motor <i>Loránd Szabó, Ioan-Adrian Viorel</i>	T8-052	384
Torque ripple reduction by optimal power supply for saturated synchronous motors <i>Guy Sturtzer, Damien Flieller</i>	T8-053	385
Induction generator output voltage and frequency stabilization <i>A. S. Zein el Din, A. E. el Sabbe</i>	T8-058	386
Direct torque control with space vector modulation (DTC-SVM) for permanent magnet synchronous motor (PMSM) <i>Dariusz Świerczyński, Marian P. Kazmierkowski, Frede Blaabjerg</i>	T8-059	387
Analysis of a single-sided linear induction motor drive performance <i>Rastko Fišer, Miroslav Bugeza</i>	T8-060	388
Experimental evaluation of a two-phase axial flux circumferential current (AFCC) permanent magnet machine <i>Ronghai Qu, Jian Luo, Surong Huang, Thomas A. Lipo</i>	T8-062	389
A predictive voltage-vector selection algorithm in direct torque control of induction motor drives <i>Domenico Casadei, Claudio Rossi, Giovanni Serra, Angelo Tani</i>	T8-063	390
Improvement of LSRM tracking at low speed operation <i>Drago Dolinar, Gorazd Štumberger, Miro Milanović</i>	T8-064	391
A consistent mathematical model of the PMSM using the fictitious field current <i>Alexander Thaler, Bernd Klöckl</i>	T8-065	392
Electromagnetic variation controlled gear with integrated clutch function <i>Rudolf Surtmann, Alexander Thaler</i>	T8-066	393
High performance permanent magnet synchronous machines for traction applications <i>Franz Aschenbrenner, Peter Woditschka</i>	T8-067	394
Compact motors and drives for electric vehicles <i>Gyula Knercz, Lóránt Nagy, Péter Korondi, Sándor Peresztegi, Tamás Mező</i>	T8-068	395
Torsional dynamics of generator-units for feeding induction motor drives <i>Marija Mirošević, Zlatko Maljković, Mateo Milković</i>	T8-069	396
A multipole asynchronous machines with mutually immovable windings <i>Vladislav Pugachov, Nikolaj Levin, Leonid Ribickis, Muhabat Manonov</i>	T8-070	397
Induction motor stator faults diagnosis using neural networks <i>Czesław T. Kowalski, Teresa Orlowska-Kowalska</i>	T8-072	398
TOPIC 9: Motion control		399
Two reliable methods for estimating the mechanical parameters of a rotating three-inertia system <i>Ingo Müller, Peter Mutschler</i>	T9-001	401
Power supply concept of the longstator linear motor of the NBP-test track <i>Andreas Pottharst, Markus Henke, Horst Grotstollen</i>	T9-004	402
Direct torque control of induction motor with stator flux correction <i>Dubravko Krušelj, Mario Bilić, Miroslav Vučetić, Vladimir Siladi, Boris Furčić</i>	T9-005	403
Speed and power of train control system <i>Vasile Radulescu, Ioan Strainescu, Emil Tudor, Florin Bozas, Sergiu Ggheorghe, Doru Braslasu, Adrian Dascalu</i>	T9-007	404

A digital speed filter for motion control drives with a low resolution position encoder <i>Armando Bellini, Stefano Bifaretti, Stefano Costantini</i>	T9-008	405
Output power control algorithms in switched reluctance drives <i>Mikhail Bychkov, Alexander Krasovsky</i>	T9-010	406
Intelligent soft starters for induction motors on the base of fuzzy logic control <i>Valery Chrisanov, Ryszard Brzesinski</i>	T9-011	407
A Full State Observer for Sensorless Control of a Salient PMSM <i>Gilead Tadmor</i>	T9-012	408
A new optimization algorithm of position estimation for zero- and low- speed range using magnetic saliency method <i>Branislav Dobrucky, Roman Filka, Mahmud A.R. Abdalmula, R. Holcek</i>	T9-013	409
Examination of the short circuit model for sensorless PM synchronous motors with respect to torque ripple, measurement period and model deviation <i>Ulf-Helmut Rieder, Ewald Robeischl, Manfred Schroedl</i>	T9-015	410
Application of model algorithmic control to AC servo drives <i>Ge Baoming, Wang Xiangheng, Su Pengsheng, Zheng Hongtao, Jiang Jingping</i>	T9-016	411
Design of a robust position controller for IPMSM by hybrid fuzzy control and maximum torque per input current <i>A. Aarefi, E. Abdi J., M. R. Zolghadri, H. Oraee</i>	T9-017	412
Fuzzy adaptive control of an induction motor drive <i>M. R. Chekkouri, J. Català, E. Aldabas, L. Romeral</i>	T9-018	413
Single controller current-sensorless speed control of PMSM using the inverse drive model <i>Hafedh Sammoud, Walter Schumacher</i>	T9-019	414
Concerning designing of model of hopping apparatus <i>Vladimir B. Larin, Vladimir M. Matiyasevich</i>	T9-020	415
Induction motor control with parallel speed and stator resistance MRAS based estimation <i>Veran Vasić, Slobodan Vukosavić, Dejan Reljić</i>	T9-021	416
Fuzzy-logic based state selector for DTFC of induction machine <i>Milan Žalman, Ivica Kuric</i>	T9-024	417
Control of DC drive using artificial neural networks <i>Martin Kuchar, Pavel Brandstetter</i>	T9-025	418
A fuzzy solution of optimal control problem with the quadratic performance criteria <i>Marian Gaiceanu, Emil Rosu</i>	T9-026	419
Asynchronous machine drive system with multivariable optimal direct torque control <i>Fabiano Salvadori, Gideon V. Leandro, João A. M. Neto, Nelson C. de Jesus, Mauricio de Campos</i>	T9-029	420
Self-learning impedance control of the robot systems <i>F. Palis, V. Rusin</i>	T9-030	421
Robust control of an induction machine: comparative study of H infinity synthesis and robust pole placement <i>Cédric Duval, Jean Marie Retif, Xuafang Linshi, Yann Legorrec, Guy Clerc</i>	T9-032	422
A novel approach to step drive design using a concentrated parameter multi-domain modelling approach including cogging torques <i>Olaf Haedrich, Andreas Pohl, Manfred Schulze</i>	T9-034	423
Motion control of a bogie with independently motorised wheels <i>Federico Cheli, Roberto Corradi, Ferdinando Mapelli, Marco Mauri</i>	T9-037	424

The analysis of direct torque control induction drive microtransient <i>M. A. Averyanov, E. I. Barats, I. Ya. Braslavsky, Z. Sh. Ishmatov, A. V. Kostylev</i>	T9-038	425
The influence of the rotor resistance changes on the global stability of indirect field-oriented drive systems <i>Marian Dubowski, Andrzej Andrzejewski</i>	T9-039	426
Analysis and optimization of an electronic throttle for linear operating modes <i>Joško Deur, Danijel Pavković, Nedjeljko Perić, Martin Jansz</i>	T9-040	427
Amphibious-vehicle control method based on neural network estimation of underwater running-resistance <i>Kinjiro Yoshida, Abderrahmane Nafa</i>	T9-042	428
Vector sliding mode control of sinusoidal-field synchronous servo drive <i>I. Schmidt, K. Vincze, K. Veszprémi</i>	T9-043	429
Improved INFORM-measurement sequence and evaluation for sensorless permanent magnet synchronous motor drives <i>Ewald Robeischl, Manfred Schroedl, Kilian Salutt</i>	T9-044	430
An extended sliding mode observer for control of an induction motor <i>Xuefang Lin-Shi, Jean Marie Retif, Olivier Asseu, Cédric Duval, Guy Clerc</i>	T9-045	431
Sensorless control of double fed machine for wind power generators <i>E. Bogalecka, Z. Krzemiński</i>	T9-046	432
Field weakening operation of a sinusoidal-field synchronous servo drive with d - q current controllers <i>Dezso Bakos, István Schmidt, Károly Veszprémi, Katalin Vincze</i>	T9-047	433
Vector control systems of tandem converter fed asynchronous motor for rapid prototyping with module library <i>Maria Imecs, József Vásárhelyi, Ioan I. Incze, Csaba Szabó, Radu Munteanu</i>	T9-048	434
Introduction of stored energy variation factor (SEVF) in switched reluctance motor drive <i>K. W. E. Cheng, X. D. Xue, S. L. Ho, Y. Lu</i>	T9-049	435
Exploring zero voltage switching in SRM drive design <i>Y. P. B. Yeung, K. W. E. Cheng, D. Sutanto, S. L. Ho, Y. Lu</i>	T9-050	436
Linear quadratic optimal control of an electrical servo drive system <i>Corneliu Botan, Florin Ostafi, Stefan Dumbrava, Alexandru Onea</i>	T9-051	437
Nonlinear feedback robot arm control <i>P. Ph. Robet, M. Gautier</i>	T9-052	438
Sensorless torque control of permanent magnet synchronous machines over the whole operation range <i>Jürgen Kiel, Stephan Beineke, Andreas Bunte</i>	T9-053	439
Extended Kalman filter based speed sensorless AC motor control with parameter estimation <i>D. Fodor, Sz. Vajda, K. Biró</i>	T9-054	440
H_{∞} output feedback controller design for AC motor control <i>D. Fodor, L. Szalay, K. Biró</i>	T9-055	441
Control of a shape memory alloy driven robot hand <i>Péter Zsiros, Péter Baranyi, Antal Huba, Péter Korondi</i>	T9-057	442
Industrial sensorless permanent magnet synchronous motor drives based on the INFORM [®] method for high performance including standstill <i>Manfred Schroedl, Ewald Robeischl, Michael Lambeck, Ulf-Helmut Rieder</i>	T9-058	443
Sliding mode technique for AC drive <i>Sergy Ryvkin</i>	T9-061	444
Autotuning controller with backlash compensation <i>Tomislav Jukić, Nedjeljko Perić</i>	T9-063	445

Estimation of induction motor variables based on artificial neural networks <i>Martin Borbel, Jaroslava Žilková, Jaroslav Timko, Viliam Fedák</i>	T9-065	446
Integral criterion-based adaptive PID angular speed control <i>Zdenko Kovačić, Stjepan Bogdan, Mario Punčec</i>	T9-066	447
Computer controlled harmonious two-coordinate positioning system <i>V. Gelezevicius, G. Blaziunas</i>	T9-067	448
Modernization of electrical transport systems in Estonia <i>Juhan Laugis, Tõnu Lehtla, Jüri Joller, Vitali Boiko, Dmitri Vinnikov, Madis Lehtla</i>	T9-068	449
Controlled linear electric drives <i>Algimantas Poška, Roma Rinkevičienė, Zita Savickienė</i>	T9-069	450
A speed estimator for high performance sensorless control of induction machines above base speed <i>Emil Levi, Mingy Wang</i>	T9-070	451
Robust fuzzy-sliding mode position control for motor drives operating with variable loads <i>Jesus Arellano-Padilla, G. M. Asher, M. Sumner</i>	T9-072	452
Reduction of secondary saliencies for improved sensorless control of induction machines using HF Injection <i>C. Caruana, G. M. Asher, K. J. Bradley</i>	T9-073	453
TOPIC 10: Mechatronic systems		455
Identification and control of a nonlinear mechatronic system <i>Christian Hintz, Bernhard Angerer, Dierk Schröder</i>	T10-001	457
Silicon electrostatic micromotor <i>Slawomir Wiak, Piotr Dumania, Zbigniew Lisik, Zbigniew Szczepaniak</i>	T10-002	458
Implementation of CAN communication protocol in autonomous mobile robot control <i>Štefan Szabó, Vladislav Singule</i>	T10-003	459
Bearingless electromechanical actuator <i>Juraj Wagner, Tomáš Boroš, Ján Lorenc</i>	T10-004	460
TOPIC 11: Industrial drive systems		461
A modified sliding mode speed controller for an induction motor drive without speed sensor using the feedback linearization theory <i>J. Soltani, N. R. Abjadi</i>	T11-001	463
Structure and test results of IGCT high power voltage source inverter with heat pipe cooling system <i>S. Januszewski, A. Jasiński, Z. Zakrzewski, K. Zymmer</i>	T11-003	464
Indirect adaptive fuzzy logic control: Application to the stator field oriented double fed asynchronous motor drive (DFAM) <i>R. Abdessemed, A. L. Nemmour</i>	T11-006	465
Model reference adaptive control of SRM drives <i>László Számel</i>	T11-007	466
Experimental evaluation of the high performance vector controlled matrix converter-fed induction motor <i>E. Chekhet, S. Peresada, V. Sobolev, S. Kovbasa</i>	T11-008	467
Comparison of several control strategies for parallel connected dual induction motors <i>Rosendo Peña-Eguiluz, Maria Pietrzak-David, Bernard de Fornel</i>	T11-010	468
Simulation model of the main electrical drive of the thyristorized locomotive <i>Nenad Težak, Vinko Česić, Josip Ungarov</i>	T11-011	469

Presentation of an efficient design methodology to develop IP-core functions for control systems: application to the design of an antiwindup PID controller <i>L. Charaabi, E. Monmasson, I. Slama-Belkhodja</i>	T11-012	470
Sensorless control of high speed brushless DC motor <i>Wojciech Bojarczyk, Aleksandr Ivanov, Zbigniew Krzemiński, Mirosław Włas</i>	T11-013	471
On the acoustic noise radiated by PWM AC motor drives <i>Stefan Laurentiu Capitaneanu, Bernard de Fornel, Maurice Fadel, Fabrice Jadot</i>	T11-017	472
Control diagrams of energy controlled current source inverter drive <i>G. Fekete</i>	T11-018	473
High quality sinusoidal voltage inverter for variable speed AC drive systems <i>R. Seliga, W. Koczara</i>	T11-019	474
A four-wheel drive hybrid electric car configuration <i>Mihai Panu, Alina Viorel</i>	T11-020	475
Digital control system for the traction applications <i>Siniša Marijan, Vinko Česić, Boris Furčić, Mario Bilić, Nenad Težak, Ivan Bahun</i>	T11-021	476
Digital implementation of full-order flux observers for induction motors <i>Marko Hinkkanen, Jorma Luomi</i>	T11-022	477
Dynamics of pulse-width modulated DC motor drive with LC-filter at power input port <i>Yu. V. Kolokolov, S. L. Koschinsky, K. H. Adjallah</i>	T11-023	478
Analog controlled drives with PROFIBUS: Experimental results <i>Zoran Šimunić, Davor Gadže, Mario Vražić</i>	T11-024	479
Cycloconverter application in rolling mill drive systems <i>Goce L. Arsov, Slobodan Mircevski</i>	T11-027	480
A real-time estimator of electrical parameters for vector controlled induction motor using a reduced order extended Kalman filter <i>Vicente Leite, Rui Araújo, Diamantino Freitas</i>	T11-029	481
Position sensorless control of three-phase SRM for hydraulic pump unit driven by newly developed power converter <i>Takashi Kosaka, Yoshinari Nabeya, Kazunobu Ohyama, Nobuyuki Matsui</i>	T11-030	482
Multioutput auxiliary converter for electric locomotives <i>Vladimir Siladi, Josip Ungarov, Jusuf Crnalić</i>	T11-031	483
Simulation of power trains for hybrids and electrical cars <i>Davor Gospodaric, Arne Schmenkel</i>	T11-032	484
Harmonic study analysis in gas industrial facilities employing large variable frequency drives <i>Drago Ban, Zlatko Maljković, Milivoj Puzak, Mijo Sobota, Drago Ružman</i>	T11-033	485
Control network as back bone of the crane motion control system <i>Alojz Slutej, Fetah Kolonić</i>	T11-036	486
Design optimization of switched reluctance drives using artificial neural networks <i>Alexei Matveev, Tore Undeland, Robert Nilssen</i>	T11-037	487
Power analyse and new loss minimisation possibilities of a tram system <i>Jüri Joller, Madis Lehtla</i>	T11-038	488
Multi-criterion optimizer for synchronous drive system <i>Roman Muszynski</i>	T11-039	489
TOPIC 12: Education and related areas		491
A novel and fundamental approach to matrix converter theory <i>M. J. Case, H. A. Langa</i>	T12-001	493
Electrogeometric model simulation for lightning protection systems <i>Rafael Rodrigues, Constantino Soares</i>	T12-003	494

Mechanotronics – A new study field or a new branch of science and engineering? <i>Juhan Laugis, Tõnu Lehtla</i>	T12-004	495
High-frequency pulse width modulation for power converters <i>Rémy Moreau, Jean-Claude Le Claire</i>	T12-005	496
The interdependence of education and the future of alternative energy <i>Jody J. Nelson, Andrew Tuckey</i>	T12-008	497
Multilingual web-based teaching and learning techniques for power electronics <i>K. W. E. Cheng, Y. Lu</i>	T12-011	498
Teaching energy management on the internet <i>Orlando Manuel Soares, Henrique Nuno Gonçalves, Carla Antónia Barbosa</i>	T12-012	499
Development of an electronic book for power electronics, machine and drives based on the multilingual and problem-based learning techniques <i>K. W. E. Cheng, Y. Lu</i>	T12-013	500
Converter design for a model solar car <i>Richard Duke, Simon Round</i>	T12-014	501
Educational project: Battery charger supplied by PV energy <i>V. Boitier, C. Alonso, H. Valderrama-Blavi</i>	T12-016	502
Integrated power electronics teaching method <i>Helmut Weiss, Gennady Zinoviev</i>	T12-019	503
An integral view of AC/DC rectifiers and current-source inverters based on single phase bridge <i>Zvonko Bencic, Zeljko Jakopovic, Viktor Sunde</i>	T12-021	504
Theory of electrical machines for power electronics and electrical drives applications. Didactic approach <i>Mieczysław Ronkowski</i>	T12-023	505
Education in mechatronics systems at faculty of electrical engineering and control systems in Kaunas University of Technology <i>Vidmantas Macerauskas, Romualdas Masteika, Vaclovas Kubilius, Petras Cernys</i>	T12-024	506
ROUND TABLE		507
Maglev projects: Status and application fields <i>Eisuke Masada</i>		509
Index of Authors		519
