GEORG HASENKAMP

A Demand System Analysis of Disaggregated Consumption

With 55 Tables

Technische Hochschule Darmstadt
Inv. Nr. F627
Fachgebiet für Empirische Wirtschaftsforschung

Vandenhoeck & Ruprecht in Göttingen

VB TU Darmstadt
51568940

Table of Contents

	page
CHAPTER ONE	
Introduction	1
CHAPTER TWO	
The Basic Theory	4
A. Notation and Concepts	4
B. Utility Based Demand Systems	8
C. The Demand System under Homothetic Utility	12
D. Affine Homothetic Utility Functions	14
1. Motivation	14
2. Notation	16
3. Implications	17
E. Budgeting in Demand Analysis	18
1. Introduction	18
2. Notation	19
3. Budgeting	20
CHAPTER THREE	
Indicators of Demand Systems	29
A. Introduction	29
B. The Price and Expenditure Elasticities	36
C. The Elasticities of Substitution	38
D. The Price Index	44
E. The Real Income Index and the Quantity Index	48
CHAPTER FOUR	
Empirical Implementation	52
A. Functional Form	52
B. The Stochastic Model and Estimation	58
1. Introduction	58
2. Estimation	66
C. Remarks	73

CHAPTER FIVE
Empirical Results 76
A. Introduction 76
B. Results with National Income Accounts Data 79
1. Introduction 79
2. Aggregation Stage 1 81
3. Aggregation Stage 2 84
4. Aggregation Stage 3 89
C. Results with Private Household Expenditures 94
1. Introduction 94
2. Aggregation Stage 1 98
3. Aggregation Stage 2 101
4. Aggregation Stage 3 104
5. Aggregation Stage 4 106
D. Comment 109

APPENDIX A
Summary of Demand Functions and Indicators Used 112
1. Demand Functions 112
2. Indicators 113
3. Indices 114

APPENDIX B
Tables of empirical results corresponding to the national income accounts data 117

APPENDIX C
Tables of empirical results corresponding to the private household expenditure data 159
