Foreword xi

Preface xv

## **1. The Economics of Natural Resource Scarcity: An Interpretive**

**Introduction** *V. Kerry Smith and John V. Krutilla* 1

I. Introduction 1

II. The Definition of Natural Resources and the Meaning of Scarcity 4

III. Modeling the Role of Natural Resources in Extraction and Production Activities 9

IV. Measuring Resource Adequacy 22

V. Some Unanswered Questions 28

## **2. A Neoclassical Analysis of the Economics of Natural Resources**

*J. E. Stiglitz* 36

I. Introduction 36

II. The Issues 38

III. The Viability Issue: Is Sustained Growth Possible in the Presence of Exhaustible Natural Resources? 40

IV. The Forecasting Issue 43

V. The Efficiency Issue 49

VI. The Intertemporal Equity Issue 61

VII. Two Policy Issues 62

VIII. Concluding Remarks 64

## **3. Entropy, Growth, and the Political Economy of Scarcity**

*Herman E. Daly* 67

I. Introduction 67

II. The Ends—Means Spectrum 70

III. Means—Based Arguments 74

IV. Ends—Based Arguments 76

V. The Concept of a Steady-State Economy 79

VI. Policies for a Steady-State Economy 85

<b>4. Comments on the Papers by Daly and Stiglitz</b>	
<i>Nicholas Georgescu-Roegen</i>	95
<b>5. Fundamental Concepts for the Analysis of Resource Availability</b>	<i>Donald A. Brobst</i> 106
I. Introduction	106
II. Characteristics of Resources	112
III. Crustal Abundance and Resources	119
IV. Distribution of Abundant and Scarce Elements	123
V. Energy, Technology, and Minerals	127
VI. Exponential Growth	133
VII. Other Factors Bearing on the Resource System	134
VIII. Keeping the Resource System Functional	136
IX. Issues for Study and Research	136
<b>6. The Age of Substitutability: A Scientific Appraisal of Natural Resource Adequacy</b>	<i>H. E. Goeller</i> 143
<b>7. Comments on the Papers by Brobst and Goeller</b>	<i>Bruce M. Hannon</i> 160
<b>8. Scarcity and Growth Revisited</b>	<i>Harold J. Barnett</i> 163
I. Background for the Scarcity and Growth Analysis	163
II. Extension of U.S. Statistical Tests to 1970	174
III. Labor Cost of Minerals and Agricultural Products in World Regions and Various Countries	176
IV. Environmental Pollution	186
Appendix A. Notes on Concepts	190
Appendix B. Foreign Country and Region Time Series on Productivity, Relative Productivity, and Relative Price Regressions	197
<b>9. The Adequacy of Measures for Signaling the Scarcity of Natural Resources</b>	<i>Gardner M. Brown, Jr., and Barry Field</i> 218
I. Overview	218
II. Unit Costs of Extractive Output	220
III. Real Price of Natural Resource Products	224
IV. Rental Rates on Natural Resources	227
V. Comparisons Among Rival Scarcity Measures	231
VI. When Conventional Scarcity Indicators May Fail	237
VII. Other Scarcity Indicators	239
VIII. Further Research Directions	241
IX. Concluding Remarks	245

<b>10. Measures of Natural Resource Scarcity</b>	<i>Anthony C. Fisher</i>	249
I. Introduction: Physical and Economic Scarcity		249
II. Optimal Extraction and the Relationship Between Scarcity Measures		253
III. Problems with the Unit Cost Measure		256
IV. The Behavior of Rents and Prices over Time		260
V. Exploration and Externalities		267
VI. Conclusions		271
<b>11. Summary and Research Issues</b>	<i>V. Kerry Smith and John V. Krutilla</i>	276
I. Introduction		276
II. Institutions and the Allocation of Resources		279
III. Potential Physical Constraints on Improvement in Material Well-Being		283
IV. Implications		288
Index		291
