Introduction to Modern Austrian Capital Theory

Springer-Verlag
Berlin Heidelberg New York 1979

Fachbereich Mathematik
Technische Hochschule Darmstadt
Bibliothek

Inv.-Nr. B 17 660

Contents

PART I: AUSTRIAN CAPITAL THEORY AND THE VON NEUMANN-MODEL

1. Introduction	3
1.1 Problems	7
2. The Austrian Theory of Interest	10
2.1 von Böhm-Bawerk	10
2.2 von Stackelberg	20
2.3 An Assessment of Austrian Interest Theory	29
2.4 Problems	34
3. The von Neumann-Model and its Relations to Austrian Capital and Interest Theory	38
3.1 Introduction	38
3.2 The Meaning, Import and Historical Point of Departure of the Ideas of the von Neumann-Model	38
3.3 The von Neumann-Model	40
3.4 Criticism and Generalization of the von Neumann-Model	51
3.5 Solutions to Problems of Austrian Capital Theory	53
3.6 The Interest Rate in the Stationary State	55
3.7 Problems	56

PART II: MODERN AUSTRIAN CAPITAL THEORY

4. A Two-Period Two-Sector Neo-Austrian Model	61
4.1 Outline of the Procedure	61
4.2 The Technology	61
4.3 The Transformation Curve	64
4.4 Condition for Roundaboutness	70
4.5 Condition for Superiority	71
4.6 Prices in a Planned Economy	73
4.7 The Rate of Interest in a Planned Economy	77
4.8 Decentralizing the Decisions	85
4.9 Problems	87
5. A Multiperiod Two-Sector Model	90
5.1 Extension of the Model	90
5.2 A Model with n-Period Horizon	90
5.3 A Model with Two Techniques Using a Capital Good	98
5.3.1 The Model	98

5.3.2 The Sign of the Rate of Interest	104
5.4 Problems	109
6. A Multisector Model	111
6.1 The Problem and the Main Results	111
6.2 The Model	113
6.3 Superiority, Roundaboutness and Positive Rate of Interest	117
6.4 A Finite Economic Horizon with More than Two Periods	128
6.5 Problems	129
7. The Schumpeter-von Böhm-Bawerk Controversy on the Rate of Interest in the Stationary State	131
7.1 Introduction	131
7.2 The Origins of the Controversy	133
7.3 The Rate of Interest in a Stationary State	135
7.4 Schumpeter's Dynamic Theory of Interest	140
7.5 Problems	142
 PART III: RELATIONSHIP TO OTHER APPROACHES TO CAPITAL THEORY	
8. A Comparison with Results of Neoclassical Capital and Growth Theory	145
8.1 Introduction	145
8.2 A Simple Growth Model	145
8.3 A Neoclassical Version for Steady States	150
8.3.1 Factor-Price Frontier for T_3^* and T_4^*	150
8.3.2 Factor-Price Frontier for T_1 and T_2	154
8.3.3 Consumption-Growth Frontier	155
8.3.4 The Relationship between the Interest Rate and the Growth Rate	157
8.4 Characteristics of Optimal Steady State Programs	159
8.5 Problems	163
9. Hicks' Neo-Austrian Theory of Capital	164
9.1 Introduction	164
9.2 Hicks' Model	166
9.3 The Index of Improvement in Efficiency	168
9.4 Hicks' New Classification of Technological Change	169
9.5 Superiority and the Index of Efficiency	174
9.6 Concluding Remarks	178
9.7 Problems	179
References	181
Author Index	192
Subject Index	194
