

K. Pingali U. Banerjee D. Gelernter
A. Nicolau D. Padua (Eds.)

Languages and Compilers for Parallel Computing

7th International Workshop
Ithaca, NY, USA, August 8-10, 1994
Proceedings

Technische Hochschule Darmstadt FACHBEREICH INFORMATIK BIBLIOTHEK Inventar-Nr.: 21163 Sachgebiete: Standort:
--

Springer-Verlag
Berlin Heidelberg New York
London Paris Tokyo
Hong Kong Barcelona
Budapest

Table of Contents

Starting Small: Fine-Grain Parallelism

Fine-Grain Scheduling under Resource Constraints	1
---	----------

Paul Feautrier
Université de Versailles, France

Mutation Scheduling: A Unified Approach to Compiling for Fine-Grain Parallelism	16
--	-----------

Steven Novack, Alexandru Nicolau
University of California at Irvine

Compiler Techniques for Fine-Grain Execution on Workstation Clusters Using PAPERS	31
--	-----------

H.G. Dietz, W.E. Cohen, T. Muhammad, T.I. Mattox
Purdue University, West Lafayette, Indiana

Getting Your Ducks in a Row: Alignment and Distribution

Solving Alignment Using Elementary Linear Algebra	46
--	-----------

David Bau, Induprakas Kodukula, Vladimir Kotlyar, Keshav Pingali, Paul Stodghill
Cornell University, Ithaca, New York

Detecting and Using Affinity in an Automatic Data Distribution Tool	61
--	-----------

Eduard Ayguadé, Jordi Garcia, Mercè Gironés, Jesús Labarta, Jordi Torres, Mateo Valero
Polytechnic University of Catalunya, Barcelona, Spain

Array Distribution in Data-Parallel Programs	76
---	-----------

Siddhartha Chatterjee, Robert Schreiber, Thomas J. Sheffler
NASA Ames Research Center, Moffett Field, California
John R. Gilbert
Xerox Research Center, Palo Alto, California

Postlinear Loop Transformations

Communication-Free Parallelization via Affine Transformations .	92
--	-----------

Amy W. Lim, Monica S. Lam
Stanford University, California

Finding Legal Reordering Transformations Using Mappings . . .	107
Wayne Kelly, William Pugh <i>University of Maryland, College Park</i>	
A New Algorithm for Global Optimization for Parallelism and Locality	125
Bill Appelbe, Srinivas Doddapaneni, Charles Hardnett <i>Georgia Institute of Technology, Atlanta</i>	
What Next?	
Polaris: Improving the Effectiveness of Parallelizing Compilers .	141
William Blume, Rudolf Eigenmann, Keith Faigin, John Grout, Jay Hoeflinger, David Padua, Paul Petersen, William Pot- tenger, Lawrence Rauchwerger, Peng Tu, Stephen Weatherford <i>University of Illinois at Urbana</i>	
A Formal Approach to the Compilation of Data-Parallel Languages	155
J.A. Trescher, L.C. Breebaart, P.F.G. Dechering, A.B. Poelman, J.P.M. de Vreught, H.J. Sips <i>Delft University of Technology, The Netherlands</i>	
The Data Partitioning Graph: Extending Data and Control Dependencies for Data Partitioning	170
Tsuneo Nakanishi, Kazuki Joe, Akira Fukuda, Keijiro Araki <i>Nara Institute of Science and Technology, Japan</i> Hideki Saito, Constantine D. Polychronopoulos <i>University of Illinois at Urbana</i>	
Back to Basics: Program Analysis	
Detecting Value-Based Scalar Dependence	186
Eric Stoltz, Michael Wolfe <i>Oregon Graduate Institute of Science & Technology, Portland</i>	
Minimal Data Dependence Abstractions for Loop Transfor- mations	201
Yi-Qing Yang, Corinne Ancourt, François Irigoin <i>Ecole des Mines de Paris, France</i>	

Differences in Algorithmic Parallelism in Control Flow and Call Multigraphs	217
Vincent Sgro, Barbara G. Ryder <i>Rutgers University, New Brunswick, New Jersey</i>	
Flow-Insensitive Interprocedural Alias Analysis in the Presence of Pointers	234
Michael Burke, Paul Carini, Jong-Deok Choi <i>IBM Watson Research Center, Yorktown Heights, NY</i> Michael Hind <i>State University of New York at New Paltz, and</i> <i>IBM Watson Research Center, Yorktown Heights, NY</i>	
How to Communicate Better	
Incremental Generation of Index Sets for Array Statement Execution on Distributed-Memory Machines . . .	251
S.D. Kaushik, C.-H. Huang, P. Sadayappan <i>The Ohio State University, Columbus</i>	
A Unified Data-Flow Framework for Optimizing Communication	266
Manish Gupta, Edith Schonberg, Harini Srinivasan <i>IBM Watson Research Center, Yorktown Heights, NY</i>	
Interprocedural Communication Optimizations for Distributed Memory Compilation	283
Gagan Agrawal, Joel Saltz <i>University of Maryland, College Park</i>	
Automatic Parallelization Considered Unnecessary	
Analysis of Event Synchronization in Parallel Programs	300
J. Ramanujam, A. Mathew <i>Louisiana State University, Baton Rouge</i>	
Computing Communication Sets for Control Parallel Programs .	316
Jeanne Ferrante <i>IBM Watson Research Center, Yorktown Heights, NY</i> Dirk Grunwald, Harini Srinivasan <i>University of Colorado, Boulder</i>	
Optimizing Parallel SPMD Programs	331
Arvind Krishnamurthy, Katherine Yelick <i>University of California at Berkeley</i>	

Languages for Parallelism: Something Borrow, Something New

- An Overview of the Opus Language and Runtime System** 346
 Piyush Mehrotra, Matthew Haines
*Institute for Computer Applications in Science and Engineering,
 Hampton, Virginia*
- SIMPLE Performance Results in ZPL** 361
 Calvin Lin, Lawrence Snyder
University of Washington, Seattle
- Cid: A Parallel, "Shared-Memory" C for Distributed-Memory
 Machines** 376
 Rishiyur S. Nikhil
Digital Equipment Corporation, Cambridge, Massachusetts
- EQ: Overview of a New Language Approach for Prototyping
 Scientific Computation** 391
 Thomas Derby, Robert Schnabel, Benjamin Zorn
University of Colorado at Boulder
- And Now, for Something Completely Different**
- Reshaping Access Patterns for Generating Sparse Codes** 406
 Aart J.C. Bik, Peter M.W. Knijnenburg, Harry A.G. Wijshoff
Leiden University, The Netherlands
- Evaluating Two Loop Transformations for Reducing Multiple-
 Writer False Sharing** 423
 François Bodin, Thierry Montaut
IRISA, Campus de Beaulieu, Rennes, France
 Elana D. Granston
Rice University, Houston, Texas
- Parallelizing Tree Algorithms: Overhead vs. Parallelism** 440
 Jon A. Solworth, Bryan B. Reagan
University of Illinois at Chicago
- When Your Program Runs (Finally)**
- Autoscheduling in a Distributed Shared-Memory Environment** . 455
 José E. Moreira, Constantine D. Polychronopoulos
University of Illinois at Urbana-Champaign

Optimizing Array Distributions in Data-Parallel Programs 472

Krishna Kunchithapadam, Barton P. Miller
University of Wisconsin at Madison

**Automatic Reduction Tree Generation for Fine-Grain Parallel
Architectures when Iteration Count is Unknown 487**

Kei Hiraki
University of Tokyo, Japan
Satoshi Sekiguchi
Electrotechnical Laboratory, MITI, Ibaraki, Japan
