Contents

Preface	**ix**
1 Temporal Concepts	**1**
1.1 The problem of the treatment of time	1
1.2 Temporal concepts in natural language	7
1.2.1 Principal temporal concepts	7
1.2.2 Aspectual concepts	11
1.2.3 Viewpoints	17
1.2.4 Types of validation	20
1.2.5 Metric concepts	21
1.2.6 Conclusion	22
1.3 Temporal reasoning in artificial intelligence	22
2 Temporal Structures	**26**
2.2 Point Structures	28
2.1.1 Temporal frames	28
2.1.2 Binary relations revision	29
2.1.3 Orders and strict orders	30
2.1.4 Examples	31
2.1.5 Products and sums of temporal frames	35
2.1.6 Properties of temporal frames	37
2.1.7 Temporal frame morphisms	49
2.2 Interval Structures	54
2.2.1 Introduction	54
2.2.2 Intervals associated with a temporal frame	56

2.2.3 Abstract intervals 59
2.3 Allen systems and generalized intervals 67
2.3.2 Planar representation and associated polygon 68
2.3.3 Composition of Allen relations 72
2.3.4 Allen systems 76
2.3.5 Generalized intervals 79
2.3.6 Application to the representation of linguistic time 89
2.4 Passage from one viewpoint to another 89
2.4.1 Filters and ultrafilters 90
2.4.2 Boundaries associated with Allen systems 95

3 Temporal Logics 102
3.1 Temporal Logics: Basic Theory 103
3.1.1 Minimal temporal logic 102
3.1.2 Semantics of temporal logic 105
3.1.3 Properties of models 109
3.1.4 Consistent sets 114
3.1.5 Completeness: Henkin's method 118
3.1.6 Overview of completeness results 123
3.2 Temporal logics: complements 129
3.2.1 Finite models and filtration in temporal logic 129
3.2.2 Temporal language and classical language 140
3.2.3 The theory of correspondences 144
3.2.4 Summary of correspondences 150
3.2.5 Incompleteness results 150
3.3 Extensions to Priorian Logics 152
3.3.1 Temporal Operators 153
3.3.2 Temporal and modal logic 166
3.3.3 Temporal interval logics 169
3.3.4 Halpern and Shoham's system 174
3.3.5 First-order temporal logics 186

4 Implementation 190
4.1 Intensional Logic 192
4.2 Temporal Reasoning Systems in Artificial Intelligence 214
4.2.1 Allen's system 215
4.2.2 McDermott 222

4.2.3 Kowalski and Sergot 233
4.3 Algorithms and Decision Procedures 240
4.3.1 Algorithm for computing coherence between Allen relations 242
4.3.2 Semantic tableau methods 248
4.3.3 Resolution in temporal logics 266

Appendix: General Characterization of Logical Representation Systems 274
A.1 Introduction 274
A.2 Propositional Logic 279
A.3 The Language of First-Order Predicates 285
