## vi Contents

3.7	Reinforcing Steel Members by Welding	127
3.8	Reinforcing Beams by Composite Action with Concrete	140
3.9	Strengthening Beam Connections	145
3.10	Composite Steel-Concrete Columns	147
3.11	Openings in Existing Steel Beams	151
3.12	Steel Corrosion: Evaluation and Protection	152
3.13	Thermal Prestressing of Steel Structures	158
	References	164
Chap	ter 4. Strengthening Concrete Buildings	167
4.1	Historical Perspective	167
4.2	Design Methods of the Past	171
4.3	Properties of Old Concrete and Reinforcing Steel	179
4.4	Some Early Proprietary Systems	181
4.5	Strengthening Concrete Beams	184
4.6	Strengthening Structural Slabs	214
4.7	Strengthening Concrete Columns	225
4.8	Openings in Existing Slabs	239
	References	246
Chapter	5. Repairing Deteriorated Concrete	249
5.1	Overview	249
5.2	Repairing Cracks	252
5.3	Corrosion of Reinforcement and Its Effects on Concrete	263
5.4	Patching Spalls and Deteriorated Areas	276
5.5	Cathodic Protection and Electrochemical Chloride Extraction	291
5.6	Corrosion Inhibitors	293
5.7	Other Types of Damage to Concrete	294
5.8	Materials for Concrete Repair	300
5.9	Durability of Repairs	309
5.10	Systematic Maintenance Programs	312
	References	314
Chapter	6. Renovating Slabs on Grade	317
6.1	Introduction	317
6.2	Field Investigation	319
6.3	Cracking	320
6.4	Surface Deterioration	330
6.5	Slab Settlement, Heaving, and Curling	335
6.6	Joint Failures	342
6.7	Water Penetration or Emission	348
	Chemical Attack	354
	Slab Replacement	359
	Slab Overlays	362
	Improving Abrasion Resistance	367
6.12	Repair of Deteriorated Overlays, Toppings, and Hardeners	373

	Contents	vii
	References	375
Chapter	7. Renovating Post-Tensioned Concrete	379
7.1	System Overview	379
7.2	Evolution of Post-Tensioned Structures	382
7.3	Typical Reasons for Repair of Post-Tensioned Buildings	389
7.4	Planning for Repairs	392
7.5	Nondestructive Testing	396
7.6	Destructive Testing	399
	Repair Methods	401
7.8	A Step-by-Step Example: Replacing Post-Tensioned	400
	Stressing-End Anchorage	406
	References	417
Chapter	8. Renovating Wood Structures	419
8.1	Historical Background	419
8.2	Wood Deterioration	430
8.3	Detecting Deterioration	439
8.4	Preventing Deterioration	446
	Shrinkage and Defects	450
	Repairing Wood Members	457
	Strengthening Wood Members	469
	Renovating Wood Trusses	479
	Case Study 1: Repairing Termite Damage in Trusses	485
8.10	Case Study 2: Restoring Fire Damage to the Exeter Street Theater References	493 502
Chapter	9. Renovating Masonry	505
9.1	Masonry as a Construction Material	505
	Evolution of Masonry Design Methods	518
9.3	Evaluation of Masonry Structures	522
9.4	Masonry Repair	539
9.5	Strengthening Masonry Structural Elements	548
	Repairing Masonry Arches	554
9.7	Other Masonry Renovation Tasks	55 <del>9</del>
	References	565
Chapter	10. Renovating Metal Building Systems	569
10.1	Introduction	569
10.2	Evolution of Metal Building Systems	573
10.3	Primary Frames	575
10.4	Expansion of Metal Building Systems	582
	Lateral Stability	587
	Secondary Framing	589
	Wall Materials	593
	Metal Roofing	598
	Insulation and Vapor Retarders	610
10.10	Renovation Checklist	612

vili	Contents
------	----------

10.11		640
10.11	Case Study References	613 624
	References	024
Chapter	11. Strengthening Lateral-Load-Resisting Systems	625
11.1	Lateral-Load Basics	625
11.2	Past Methods of Resisting Lateral Loads	630
11.3	History of Wind and Seismic Codes	637
11.4	Code Provisions for Seismic Upgrading	644
11.5	Typical Elements of Lateral-Load Upgrading	649
11.6	Reinforcing Diaphragms	653
11.7	Reinforcing Wood, Steel, and Masonry Buildings	663
11.8	Reinforcing Concrete Buildings	673
11.9	Energy-Dissipating Devices	680
11.10	Seismic Isolation	685
11.11	Reinforcing Nonstructural Elements	<b>689</b>
	References	695
Chapter	12. Case Studies in Seismic Upgrading	699
12.1	Case 1: Seismic Upgrading of a Former Industrial Building	699
12.2	Case 2: Proposed Renovation of an Unreinforced-	
	Masonry Building	714
12.3	Case 3: Seismic Upgrade of Terminal 1, Oakland International Airport	735
12.4	Case 4: Seismic Retrofit of the Administration Building,	
	San Francisco State University	745
Chapter	13. Renovating Building Façades	763
13.1	General Issues	763
13.2	Curtain-Wall Problems Caused by Structural Forces and Movements	766
13.3	Water Leakage	770
13.4	Rehabilitating Solid Masonry Walls	783
13.5	Brick-Veneer Walls with CMU Backup	793
13.6	Brick-Veneer Walls with Steel Studs	800
13.7	Repairing Brick-Veneer Walls	807
13.8	Repairing Stone and Stone-Panel Walls	823
13.9	Rehabilitating Exterior Insulation and Finish Systems	833
13.10	Rehabilitating Other Wall Types	841
	References	847
