Operations Management

BARRY SHORE
Associate Professor of Management Science
Northeastern University

McGraw-Hill Book Company
New York St. Louis San Francisco Düsseldorf Johannesburg Kuala Lumpur London Mexico Montreal New Delhi Panama Rio de Janeiro Singapore Sydney Toronto

CONTENTS

	Preface	xv
Part One	**Design of the System**	
Chapter 1	**Operational Processes and Their Associated Decisions**	3
	Introduction	3
	Process Design, Operation, and Control	5
	The Structure of Decisions	8
	The Role of Management Science in Solving Structured Problems	13
	Management's Use of Management Science	16
	Questions	17
	Problems	17
	Bibliography	20
Chapter 2	**Capital Investment Decisions in Process Design**	21
	Introduction	21
	Capital Budgeting Process	22
	Payback	23
	Time Value of Money	25
	Discounted Cash Flow Methods	26
	A Systems Approach with Linear Programming	34
	The Incorporation of Risk through Simulation of an Investment Proposal	42
	Project Risk and the Firm's Risk	48
	Summary	51
	Questions	52
	Problems	53
	Bibliography	57
Chapter 3	**Replacement Analysis**	58
	Introduction	58
	Coterminated Plant Models	60
	The Concept of Economic Life	63
	Terborgh's Model	65
	Terborgh's Short Cut Benefit/Cost Ratio for Replacement Alternatives	76
	Summary	84
	Questions	84
	Problems	85
	Bibliography	88

Chapter 4	**Process Design: Macro**	**89**
	Introduction	**89**
	A Framework for Process Design	**90**
	Case Study: The Process Design of Progressive Patient Care Facilities	**93**
	Work Station Selection	**95**
	Schematic Aids in Process Design	**96**
	Work Flow: Material Handling	**100**
	Case Study: Material Handling	**100**
	The Make or Buy Decision	**104**
	Case Study: Make or Buy	**106**
	Summary	**107**
	Questions	**108**
	Problems	**109**
	Bibliography	**111**
Chapter 5	**Process Design: Micro**	**112**
	Introduction	**112**
	An Overview of the Micro Design Process	**113**
	Line Balancing	**117**
	Work Methods	**125**
	Labor Standards	**130**
	Summary	**136**
	Questions	**136**
	Problems	**137**
	Bibliography	**141**
Chapter 6	**Human Factors in Job Design**	**142**
	Introduction	**142**
	Engineering Design	**143**
	Human Relations	**143**
	Job Enlargement	**144**
	Job Participation	**148**
	Job Enrichment	**151**
	Job Satisfaction, Motivation, and Job Performance	**156**
	Summary	**159**
	Questions	**160**
	Bibliography	**161**
Chapter 7	**Project Design**	**162**
	Introduction	**162**
	Network Design	**163**
	PERT	**169**
	Critical Path Method	**175**
	Scheduling with Limited Resources	**181**

Summary 185
Questions 186
Problems 186
Bibliography 191

Chapter 8 Facilities Layout 192
Introduction 192
Product and Process Layouts 193
Process Layout: Independence 194
Case Study: Glover Landing 208
Process Layout: Dependence 208
Summary 216
Questions 217
Problems 217
Bibliography 220

Chapter 9 Facilities Location 221
Introduction 221
Factors Which Influence Location Decisions 222
Case Study 1: Location of a Telephone Switching Exchange 225
Case Study 2: Efficiency of Ambulance Service 225
Measuring the Relative Merits of Single-facility Alternatives When the Dominant Factors Are Both Tangible and Intangible 227
Single-facility Location Decisions When the Dominant Factors Are Measurable Costs 229
Multifacility Location Decisions When the Dominant Factors Are Measurable Costs 230
Summary 241
Questions 241
Problems 242
Bibliography 245

Chapter 10 Pollution Control and Its Impact on the Process 246
Introduction 246
How Did It Get This Way? 247
Forms of Pollution 249
Why Has Waste Disposal Gotten Out of Hand? 252
Waste Disposal Costs 253
Pollution Prevention Alternatives 257
Three Strategies for Controlling Levels of Effluent Discharge 260
Case Study 1: Metro Power and Light Company 263
Case Study 2: Logan International Airport 264
Case Study 3: Good Milk Company 265
Summary 266
Questions 266
Bibliography 267

Part Two Operation and Control of the System

Chapter 11 Forecasting by Exponential Smoothing 271
Introduction 271
Major Forecasting Approaches 271
A Model for Irregular Movements: Simple Exponential Smoothing 274
Models for Trend and Irregular Movements 278
A Model for Seasonal and Irregular Movements 284
A Model for Trend, Seasonal, and Irregular Movements 287
Generality of Models 290
A Control System 291
Uncertainty of the Forecast 295
Summary 295
Questions 296
Problems 296
Bibliography 300

Chapter 12 Econometric Forecasting 301
Introduction 301
Simple Linear Regression 302
Nonlinear Relationships 311
Multivariate Regression Analysis 314
The Theory of Econometrics 319
Summary 325
Questions 326
Problems 327
Bibliography 329

Chapter 13 Aggregate Planning 330
Introduction 330
Absorbing Demand Fluctuations with Overtime, Undertime, Inventory, and Subcontracting 333
Absorbing Demand Fluctuations with Overtime, Undertime, Inventory, Subcontracting, and Backorders 336
Absorbing Demand Fluctuations with Overtime, Inventory, Hiring, and Layoff 339
Absorbing Demand Fluctuations When Overtime, Undertime, Hiring, Layoff, Inventory, and Backorder Costs Are Nonlinear 346
A Heuristic Model for Production Planning 353
Some Other Considerations in Production Planning 354
Summary 355
Questions 356
Problems 357
Bibliography 361

Chapter 14 The Management and Control of Inventory Systems 362
Introduction 362
A General Framework for Inventory Models 363

	Inventory Costs	365
	EOQ Model	367
	Quantity Discounts	372
	EOQ Model with Stockouts Allowed	375
	Inventory Models under Risk	378
	Aggregate Effects	385
	Inventory Systems	385
	Summary	386
	Questions	387
	Problems	387
	Bibliography	391
Chapter 15	**Loading, Sequencing, and Control**	392
	Introduction	392
	A Framework for Sequencing Problems	395
	n Jobs, One Machine, Flow Shop, Static Arrival Pattern, SPT	395
	n Jobs, One Machine, Flow Shop, Static Arrival Pattern, Sequence-dependent Setup Times	398
	n Jobs, $m = 2$ Machines, Flow Shop, Static Arrival Pattern, Minimization of Total Elapsed Time	412
	n Jobs, m Machines, Flow Shop, Static Arrival Pattern, Minimization of Total Elapsed Time	414
	The General n/m Job Shop Problem with a Static Arrival Pattern	416
	The General n/m Job Shop Problem with Dynamic Arrival Pattern	417
	A Job Shop Scheduling and Control System	419
	Case Study: Court Scheduling	425
	Summary	426
	Questions	427
	Problems	427
	Bibliography	430
Chapter 16	**Quality Control**	432
	Introduction	432
	Where to Inspect	433
	Sampling Risk and the Economics of Sampling	434
	Acceptance Sampling by Attributes	435
	Acceptance Sampling by Variables	444
	Process Control	444
	Case Study: Quality Control in Bank Auditing	449
	Bayesian Quality Control	450
	Summary	456
	Questions	456
	Problems	457
	Bibliography	458
Chapter 17	**Management Information Systems**	459
	Introduction	459
	What Is a Management Information System and What Is It Not	460

Characteristics of Computer Systems 463
Examples of MIS 465
Integrated MIS 467
Some Management Implications 474
Questions 476
Bibliography 476

Appendix A Linear Programming and Simulation 479
Introduction 479
Mathematical Programming 480
Simulation 498
Questions 503
Problems 503

Appendix B Tables 506
Table B-1 Random Numbers 507
Table B-2 Present Value of $1.00 509
Table B-3 Present Value of Annuities: $1 per Year 510
Table B-4 Capital-recovery Factors for Interest Rates from 6 to 50 Percent 511
Table B-5 Normal Curve Areas 512
Table B-6 Summation of Terms of the Poisson Formula 513
Table B-7 Percentage Points of the F Distribution 516
Table B-8 Binomial Distribution 519

Index 545
