Typesetting by Unicus Graphics Ltd, Horsham
Printed in Great Britain by The Camelot Press, Southampton

	Appendix	63
3A.1	The Kuhn–Tucker theorem	63
3A.2	Examples	64
3A.3	Non-concave functions	65
4	**Environmental Control under Uncertainty**	68
4.1	Decision criteria under uncertainty	68
4.2	Dependent versus independent uncertainties	71
4.3	Environmental research	74
4.4	Planning mechanisms with dispersed information	78
4.5	Taxation versus regulation under uncertainty	81
4.6	The case of a single firm	84
4.7	The case of multiple firms	89
	Appendix: Imperfect Information and Optimal Pollution Control	96
4A.1	Introduction	96
4A.2	Two-way communication	97
4A.3	One-way communication	98
5	**Dimensions of Welfare**	100
5.1	Commodities and their labels	100
5.2	Social rates of discount	101
5.3	Measures of social product	104
5.4	The value of resource stocks and social overhead capital	107
5.5	Social rates of return	108
5.6	Population as social capital	111
5.7	Classical utilitarian views on population	114

5.8	Person-affecting utilitarianism	116
5.9	Rights-based population policies	118
6	**Fisheries and Aquifers: The Stationary Case**	120
6.1	Introduction	120
6.2	Growth functions of renewable natural resources	120
6.3	Harvest costs	124
6.4	Free-entry into common property resource	127
6.5	Optimal stationary policies for fisheries	130
6.6	Groundwater basins: An example	133
6.7	Optimal taxation	135
6.8	Fisheries: Some observations	136
6.9	Application to the lobster fishery	138
7	**Fisheries and Aquifers: The Transient Phase**	141
7.1	Introduction	141
7.2	The problem	141
7.3	Most rapid approach paths	143
7.4	Commentary	147
8	**The Economics of Pollution Control**	150
8.1	A simple classification of pollutants	150
8.2	The emission–output ratio	152
8.3	Clean-up costs and natural amelioration rates	155
8.4	Social damage due to pollutants	158
8.5	Social benefits from production	160

8.6	The environmental planning problem: Alternative formulations	161
8.7	United States environmental protection acts: An illustration	164
8.8	Some prototype policies	166
8.9	Cost–benefit rules for optimal pollution control	169
8.10	The carbon-dioxide problem: An application	174
9	**Forests and Trees**	178
9.1	Forest externalities	178
9.2	The value of forest products	180
9.3	Growth functions of trees	181
9.4	The optimal forest: The synchronized stationary case	183
9.5	The optimal rotating forest	188
9.6	Commentary and extensions	189
10	**Uncertainty, Irreversibility and Option Values**	193
11	**Envoi**	201
