Contents

Introduction J. Minker 1

PART I—Negation and Stratified Databases 17

Chapter 1 Negation in Logic Programming 19
J.C. Shepherdson

Chapter 2 Towards a Theory of Declarative Knowledge 89
K.R. Apt, H.A. Blair, and A. Walker

Chapter 3 Negation as Failure Using Tight Derivations for General Logic Programs 149
A. Van Gelder

Chapter 4 On the Declarative Semantics of Logic Programs with Negation 177
V. Lifschitz

Chapter 5 On the Declarative Semantics of Deductive Databases and Logic Programs 193
T.C. Przymusinski

Chapter 6 On Domain Independent Databases 217
R.W. Topor and E.A. Sonenberg
PART II—Fundamental Issues in Deductive Databases and Implementation

Chapter 7  Foundations of Semantic Query Optimization for Deductive Databases
U.S. Chakravarthy, J. Grant, and J. Minker

Chapter 8  Intelligent Query Answering in Rule Based Systems
T. Imielinski

Chapter 9  A Theorem-Proving Approach to Database Integrity
F. Sadri and R. Kowalski

Chapter 10  A Logic-based Language for Database Updates
S. Manchanda and D.S. Warren

Chapter 11  Compiling the GCWA in Indefinite Deductive Databases
L. Henschen and H. Park

Chapter 12  Performance Evaluation of Data Intensive Logic Programs
F. Bancilhon and R. Ramakrishnan

Chapter 13  A Superjoin Algorithm for Deductive Databases
J.A. Thom, K. Ramamohanarao, and L. Naish

PART III—Unification and Logic Programs

Chapter 14  Logic Programming and Parallel Complexity
P.C. Kanellakis

Chapter 15  Unification Revisited
J-L. Lassez, M.J. Maher, and K. Marriott

Chapter 16  Equivalences of Logic Programs
M.J. Maher

Chapter 17  Optimizing Datalog Programs
Y. Sagiv

Chapter 18  Converting AND-Control to OR-Control by Program Transformation
M.H. van Emden and P. Szeredi
