Contents

Preface

I INTRODUCTION	1
1 Production and Operations	3
Service Organizations	5
The Production Function	6
Productivity	10
Production/Operations Decision Levels	12
Conclusion	12
2 Systems Theory and Production	15
Organizational Systems Theory	18
Multiview Systems Concept of an Organization	20
Conclusion	32
3 Decision Theory	37
Organizational Decision Making Features	39
Decision Theory Structure	42
Models	59
Conclusion	63
Appendix A: Model Classifications	64
4 Cost and Capital Analysis	74
Breakeven Analysis	75
Cost Equalization Analysis	80
Incremental Analysis	82
Cost Control	83
Cost Reduction	84
Capital Analysis	86
A Framework for Capital Analysis	99
Conclusion	101

5	Resource Allocation and Linear Programming	109
	The Simplex Method	110
	The Dual Method	122
	The Transportation Method	130
	The Assignment Method	145
II	POLICY DECISIONS	159
6	Policy Decisions	161
	Objectives	163
	Strategies	169
	Tactics	173
	Conclusion	176
	Appendix A: Master Resource Profile	178
III	PRODUCT DECISIONS	181
7	Product Decisions	183
	Product Life Cycles	184
	Research, Development, and Engineering	186
	Feasibility Study	189
	Preliminary Design	191
	Detailed Design	191
	Drawings and Specifications	203
	Service Design	204
	Conclusion	206
8	Network Programming and Project Planning	214
	Network Development	215
	Determination of Activity Times	219
	Establishment of Critical Path	220
	Probabilistic Statements	225
	Conclusion	228
IV	PROCESS DECISIONS	237
9	Process and Operation Design	239
	Product Analysis	242
	Make or Buy	248
	Capital and Equipment	250
	Process Design	251
	Operation Design	253
	Job Design	255
	Conclusion	255

10	Job Design	262
	Division of Labor	264
	Job Content	265
	Work Methods	266
	Job Satisfaction	273
	The Physical Environment	275
	Job Descriptions	280
	Conclusion	281
11	Work Measurement	284
	Informal Time Standards	285
	Stopwatch Time Study	286
	Work Sampling	291
	Predetermined Time Study	294
	Wages and Incentives	298
	Conclusion	298
V	PLANT DECISIONS	305
12	Plant/Facility Location	307
	Selection of Region	310
	Selection of Community	312
	Selection of Site	312
	Location Factor Dependences	313
	Sources of Assistance	316
	Plant Location Trends	317
	Quantitative Analysis	318
	Foreign and International Considerations	322
	Conclusion	323
13	Plant Layout	329
	Layout Inputs	330
	Layout Constraints	331
	Layout Design Considerations	334
	Layout Outputs	338
	Conclusion	343
	Appendix A: Line Balancing	344
14	Materials Handling	356
	Materials Handling Inputs	359
	Restrains	362
	Flow Factors	367
	Materials Handling Decisions	378
	Materials Handling Outputs	379
	Conclusion	381

VI OPERATIONS DECISIONS	387
15 Forecasting and Market Analysis	389
The Forecasting Function	391
Time Series Analysis	393
Soliciting Opinions	414
Economic Indicators	414
Econometric Models	418
Conclusion	419
16 Production Planning and Master Scheduling	427
Formalized Production Planning	430
Production Planning Methods	430
Master Scheduling	444
Conclusion	453
17 Material Requirements Planning (MRP)	461
MRP Inputs	463
MRP Outputs	465
Product Structures	466
MRP Types	478
Capacity Planning and Control	478
Conclusion	482
18 Scheduling and Production Control	490
Production Control Systems	491
Job Shop Scheduling	493
In-Process Inventory	514
Conclusion	516
19 Inventory Control Models	524
Types of Inventory	525
Inventory Costs	525
Independent Versus Dependent Demand	527
Continuous and Independent Demand Items	528
Discrete and Dependent Demand Items	539
Single Order Quantities	551
In Process Inventory	557
Conclusion	557
20 Inventory Control Systems	561
Types of Control Systems	564
Selective Inventory Control	572
Inventory System Development	575
Inventory System Improvement	578
Aggregate Inventory Measurement	579
Conclusion	580

21	Purchasing and Procurement	586
	Purchasing Inputs	590
	Restraints	592
	Demand Factors	594
	Purchasing Decisions	595
	Purchasing Outputs	595
	Conclusion	609
22	Quality Control	617
	Control Charts	620
	Acceptance Sampling	626
	Conclusion	640
23	Maintenance	645
	Types of Maintenance	647
	Individual Versus Group Replacement	652
	Internal Versus External Maintenance	654
	Crew Size	654
	Queuing Theory	654
	Monte Carlo Simulation	661
	Conclusion	668
	Author Index	675
	Subject Index	677
