Preface xii

1 Stochastic Sequences 1

1.1 Preliminaries 1

1.2 Stationary Processes 4

1.3 Spectral Representation 13

1.4 Taxonomy of Stationary Sequences 17

1.4.1 Scalar Sequences 17

1.4.2 Multivariate Sequences 27

1.4.3 Identification Issues in $MARMA(m,n)$ Processes . . . 33

1.5 Nonstationary and Integrated Sequences 35

2 Prediction and Estimation 40

2.1 Preliminaries 40

2.2 Orthogonal Complements 44

2.3 Wold's Decomposition 51

2.4 Best Linear Predictors (BLP) 55

2.4.1 Preliminaries 55

2.4.2 Derivation of BLP 57

2.4.3 BLP in $MARMA(m,n)$ Sequences 69

2.5 Estimation in Stationary Sequences 71

2.5.1 Estimation of Sequences of Known Order 71

2.5.2 Estimation of the $MARMA(m,n)$ Model 77
2.5.3 Estimation of Sequences of Unknown Order 87
2.5.4 Estimation of Structural VAR Models 95
2.5.5 Identification Issues 99
2.6 State Space Models 104
2.6.1 Fundamental Definitions and Properties 104
2.6.2 Kalman Procedures 110

3 Unit Roots; I(1) Regressors **120**
3.1 Introduction 120
3.2 UR Model With i.i.d. Errors 122
3.2.1 The case $\beta = 0$ 124
3.2.2 The case $\beta \neq 0$, *a priori* 132
3.3 The UR Model without i.i.d. Errors 137
3.3.1 Stationary and Ergodic Errors 137
3.3.2 Nonstationary (Heterogeneous) Errors 144
3.4 Vector Random Walks 144
3.4.1 Symmetric Parameter Matrices 144
3.4.2 Nonsymmetric Parameter Matrices 151
3.5 Cointegration 154
3.5.1 Cointegration in General VAR Models 155
3.6 Regressors Which Are $I(1)$ 165
3.7 Instrumental Variables 167

4 Cointegration I **173**
4.1 Preliminaries 173
4.2 Integrated Processes 174
4.3 Characterization of Cointegration 188
4.4 Implications of Cointegration 194
4.4.1 Cointegration in $MIMA(\infty)$ Processes 194

4.4.2 Cointegration in $MIMA(k)$ Processes 208
4.4.3 Cointegration in $VAR(n)$ Processes 214
4.4.4 Empirical Implementation 218
4.5 $VAR(n)$ with a Constant Term 226

Appendix to Chapter 4 **230**

5 Cointegration II **232**
5.1 Introduction 232
5.2 Limiting Distributions 236
5.2.1 Notation and Preliminaries 236
5.2.2 Unrestricted Estimators 243
5.2.3 Unrestricted Estimators in $VAR(n)$ 248
5.2.4 Restricted Estimators 255
5.3 Tests for Cointegration Rank 264
5.3.1 Model-free Tests Based on the Covariance Matrix . . . 264
5.3.2 Rank Tests Based on the $VAR(n)$ Formulation 272
5.3.3 Limiting Distribution of Characteristic Roots 281

Appendix to Chapter 5 **284**

6 Cointegration III **292**
6.1 Introduction 292
6.2 CT for Cointegration in $VAR(n)$ Models 293
6.2.1 Conformity Cointegration Tests for $MIMA(k)$ Processes 305
6.2.2 Limiting Distribution of Zero Root Estimators, Case i: Standard VAR, no Constant Term 310
6.3 $VAR(n)$ with a Constant Term 315
6.3.1 Preliminaries and Implications 315
6.3.2 Case ii: Constant in VAR; No Trends in Levels 317

6.3.3 Case iii: Constant in VAR, Trends in Levels 320
6.4 Extension to MARMA Processes 322
6.4.1 Unrestricted Estimators 322
6.4.2 Restricted Estimators 333

Appendix I to Chapter 6 **345**

Appendix II to Chapter 6 **353**

7 Brownian Motion **367**
7.1 Preliminaries 367
7.2 Random Walk and Brownian Motion 368
7.3 P. Levy's Construction 376
7.4 Properties of Sample Paths 379
7.5 Wiener Measure 384
7.6 Brownian Bridge 386

8 Stochastic Integration **388**
8.1 Motivation and Preliminaries 388
8.2 The Ito Integral 389
8.2.1 Why Standard Integration Fails 389
8.2.2 Derivation of the Integral 391
8.3 Ito's Formula 401

9 Central Limit Theorems; Invariance **416**
9.1 Introduction 416
9.2 Convergence in $C(R_+, R^d)$ 419
9.2.1 Tightness and Relative Compactness on C 421
9.2.2 Donsker's Theorem; Invariance 427
9.3 Convergence in $D(R_+, R^d)$ 435
9.3.1 The Skorohod Topology 438

9.3.2 Tightness and Convergence on $D(\mathcal{T}, R^d)$ 440
9.4 CLT for Stationary Sequences 444
9.5 Mixing Sequences 456
9.5.1 Covariance or Correlation Inequalities 459
9.6 Limit Theorems for Mixing Sequences 465
9.6.1 Laws of Large Numbers 465
9.6.2 Law of the Iterated Logarithm (LIL) 467
9.6.3 CLT and FCLT for Mixing Sequences 469
9.6.4 CLT for Nonstationary Mixing Sequences 475

Frequently Used Symbols **479**

Graphs of Sequences of Various Types **481**

Bibliography **504**

Index **516**
