Contents

Preface

Introduction

I. Migration as a Sequential Decision Problem under Uncertainty

I.1 Introductory Remarks 4

I.2 A General Formal Model of a Decision Process for International Migration 6

I.2.1 States and Actions 6

I.2.1.1 "States of the Economy"–Interpretation 7

I.2.1.2 "States of Information"–Interpretation 7

I.2.2 State Transitions 9

I.2.3. Reward Function 10

I.3 Specializations of the General Model 12

I.3.1 The (General) Multi–Armed–Bandit (≡ MAB) Model of International Migration and the 'Gittins–Index' Method 12

I.3.2 Some Economic Implications of the Gittins–Index Policy 17

I.4 Risk–Averse Migrants in the Special MAB–Migration Model 26

II. Temporary vs. Permanent Migration

II.1 Introductory Remarks 36

II.2 A General Temporary– vs. Permanent–Migration Model with Target–Saving 37

II.3 Analysis of the Remigration Set for $T = 2$ 44

III. Temporary Equilibria of Migration

III.1 Introductory Remarks 52

III.2 Description of the Model 54

III.2.1 The Generation Structure 54

III.2.2 The Individual Migration Decision 55

III.3 Temporary Equilibria of Migration 59
III.3.1 Definition and Existence of Migration Equilibria 59
III.3.2 The Effects of Incomplete Information on Temporary Migration Equilibria 64
III.3.2.1 Equilibrium Migration between "Identical" Countries . . . 65
III.3.2.2 The Effects of Increasing Uncertainty 66
III.4 Extensions 69

IV. Some Remarks Concerning Econometric Modelling of Informational Aspects in International Migration

IV.1 Introduction 71
IV.2 An Econometric Model of Individual Remigration Decisions of Guest–Workers 72
IV.3 A Decision Theoretically Founded Econometric Model of Aggregate Guest–Worker Migration 79
IV.3.1 Introductory Remarks 79
IV.3.2 An Econometric Model for Aggregate Guest–Worker Migration . . . 79

Appendices

Appendix A.I.3 91
Appendix A.I.4 93
Appendix A.II 97
Appendix A.III 104
Part A: Technical Results 104
Part B: Some Remarks Concerning Assumption (A.4) 109
Appendix A.IV.2 111
Appendix A.IV.3 112
