CONTENTS

Introduction to the Series v
List of Figures xi
List of Tables xiii
Preface xvii

Chapter 1: Introduction 1
DALE W. JORGENSEN

Chapter 2: Tax policy and energy conservation 7
EDWARD A. HUDSON and DALE W. JORGENSEN

1. Introduction 9

2. Inter-industry model 12
   2.1. Introduction 12
   2.2. Inter-industry transactions 16
   2.3. Final demand 19

3. Producer behavior 26
   3.1. Introduction 26
   3.2. Econometric specification 27
   3.3. Parameter estimation 31

4. Growth model 38
   4.1. Introduction 38
   4.2. Variables 39
   4.3. Equations 43

5. Energy projections 44
   5.1. Introduction 44
   5.2. Energy balance 47
   5.3. Alternative projections 60

6. Energy policy 63
   6.1. Introduction 63
   6.2. Tax policy and conservation 64
   6.3. Tax impact 67
Chapter 4: A study of the demand for gasoline

PHILIP K. VERLEGER, JR. and DENNIS P. SHEEHAN

1. Introduction 179

2. The demand for gasoline 180
   2.1. Individual's demand for gasoline 180
   2.2. The relationship of the cost of gasoline to the operation costs of the vehicle 182
   2.3. Aggregate demand for gasoline 184
   2.4. Specification of the demand equation 185
   2.5. Justification of the dynamic consumption function 190
   2.6. Conclusion 190

3. The data used in the analysis 191
   3.1. Gasoline consumption data 191
   3.2. Gasoline price data 195
   3.3. Personal income data 196
   3.4. Price deflators 197
   3.5. Conclusion 197

4. Results 197
   4.1. Specification of the consumption demand 198
   4.2. Estimation procedures 201
   4.3. The identification of the demand curve 202
   4.4. Results 202
   4.5. Comparison of these results to earlier analyses 205
   4.6. 1973 simulations 212
   4.7. Conclusion 213
