
World without End

Economics, Environment, and
Sustainable Development

David W. Pearce and Jeremy J. Warford

PUBLISHED FOR THE WORLD BANK
OXFORD UNIVERSITY PRESS

Contents

Preface	ix
PART ONE Sustainable Development	
1. <i>Environment and Development: An Overview</i>	3
Two Environmental Revolutions	7
Environmental Economics	9
Reconciling Growth and Environmental Impact	15
Determining the Costs of Resource Degradation	18
Offering Incentives for Sustainable Development	28
Moving toward Sustainable Development	36
Notes	37
2. <i>The Concept of Sustainable Development</i>	41
Economic Development and Economic Growth	42
Environment and Sustainable Development	43
Sustainable Development and Equity	44
Intergenerational Compensation	51
Substituting between Types of Capital	53
Sustainable Development and Environmental Capital	54
Economic Implications of Sustainable Development	57
Notes	61

3. <i>Fairness and Time</i>	65
The Rationale for Discounting	66
The Choice of Discount Rate	66
The Debate over Discounting from an Environmental Perspective	68
Discount Rates and Specific Environmental Issues	76
A Sustainability Approach	78
Note	80
4. <i>Measuring Sustainable Development</i>	83
Sustainable Income	84
A Wider Concept of Sustainable Income	87
The Physical Approach to Environmental Accounting	89
Environmental Indicators	91
Notes	95
5. <i>Evaluating Environmental Damage and Benefits</i>	97
Economic Valuation	99
Total Economic Value	102
Recent Valuation Experience	105
Environmental Valuation in the Developing World	106
Ecosystem Valuation of Tropical Forests	115
Environment and Health	133
Appendix: Methodologies for Eliciting Economic Values	138
Notes	143

PART TWO Resource Degradation: Causes and Policy Responses

6. <i>Population, Resources, and Environment</i>	149
World Population Growth	150
Population Growth in Africa	152
Carrying Capacity and the Links between Population and Environment	155
Population Growth, Soil Degradation, and Technological Change	159
Population Growth and Resource Scarcity	161
Policy on Population and Environment	170
Notes	171
7. <i>Policy Failure: Pricing below Private Cost</i>	173
Pricing for Cost Recovery	174
Pricing in the Irrigation Sector	176
Pricing in the Energy Sector	179
Public Policy and Tropical Deforestation	181
Policies on Pesticides	188
Pricing of Agricultural Output	189

Policies on Industrial Pollution	191	
Notes	193	
8. <i>Market Failure: Social Pricing Distortions</i>		195
Pollution and Resource Use	196	
Pollution as Externality	197	
Market Paradigms and Pollution	200	
Environmental Taxes in Practice	206	
Marketable Permits in Practice	209	
Market-Based Incentives and Developing Countries	212	
Notes	214	
9. <i>Planning Failure: Socialist Planning and the Environment</i>		217
The State of the Environment in Eastern Europe	219	
Economic and Environmental Reform in Eastern Europe	224	
Czechoslovakia	224	
Issues in Environmental and Economic Development in Eastern Europe	226	
China	230	
Notes	232	
10. <i>Property Rights Failure and Renewable Resources</i>		235
The Nature of Renewable Resources	235	
Renewable Resource Analytics: The Fishery	236	
Introducing Time	240	
Applications of Fishery Economics	241	
Renewable Resources and Games	244	
Extensions of Game Theory	247	
Resource Management Regimes	248	
Conclusions	256	
Appendix: A Public Goods Model	256	
Notes	258	
11. <i>Poverty, Income Distribution, and Environment</i>		261
Income Growth and Distribution in the Developing World	263	
Poverty in the Developing World	266	
Theories of the Link between Poverty and Environment	272	
The Policy Response to Poverty and Environment	276	
Note	277	
PART THREE		International Environmental Issues
12. <i>World Markets and Natural Resource Degradation</i>		281
Dependence of Developing Countries on Commodity Trade	282	

Terms of Trade	283	
Terms of Trade and Environment	284	
The Ivory Trade	288	
The Hardwood Trade	291	
The Cassava Trade	293	
The Hamburger Connection	294	
European Community Beef and Range Degradation in Southern Africa	296	
Agricultural Protection in Industrial Countries	296	
Trade Links and Environment	297	
The Benefits of Free Trade	298	
Does Free Trade Cause Environmental Degradation?	299	
GATT and the Environment	300	
Environmental Disputes under GATT	303	
Trade Restrictions: The Case of Unidirectional Externality	305	
Trade Restrictions: The Case of Mutual Externality	308	
GATT and the Instruments of Environmental Policy	309	
Do Environmental Regulations Inhibit Competitiveness and Do Firms Move to Pollution Havens?	312	
Using Economic Policy to Manage the Environment: Structural Adjustment Lending	313	
Notes	324	
13. <i>Transfrontier Environmental Issues</i>		327
An Acid Rain Game	328	
The Mediterranean Basin	333	
The Himalayas	341	
The International Transfer Issue	344	
International Conservation Financing	346	
Global Environmental Facility	348	
Debt-for-Nature Swaps	350	
Notes	355	
14. <i>Managing Global Resources</i>		357
The Greenhouse Effect	358	
The Problem of the Ozone Layer	387	
Antarctica	390	
Protecting the World's Biodiversity	394	
Notes	398	
<i>References</i>	399	
<i>Credits for photographs</i>	426	
<i>Index</i>	427
