

OUT OF EQUILIBRIUM

MARIO AMENDOLA and
JEAN-LUC GAFFARD

CLARENDON PRESS · OXFORD
1998

CONTENTS

Introduction	1
Part I. Theory: The Building Blocks	9
1. Production	11
1.1 The <i>ex post</i> view of the phenomenon of production	11
1.2 Time and equilibrium	15
1.3 Complements and substitutes in the economics of production	18
1.4 Time and sequence: dissociating costs from proceeds	20
1.5 Out-of-equilibrium contexts: bringing to light the time structure of production	24
1.6 From the <i>ex post</i> to an <i>ex ante</i> viewpoint: the creation of resources	27
1.7 Out-of-equilibrium processes: the analytical implications	31
2. Money	35
2.1 When, why, and how money matters	35
2.2 The standard theory of money and its modern revisitations	38
2.3 Substitution and complementarity	41
2.4 Integrating real and monetary disequilibria in a sequential context	43
2.5 Financial constraints and production	45
2.6 Financial decisions and real choices	50
2.7 The interest rate and the time structure of economic activity	53
2.8 Monetary control	56
3. The Human Resource	61
3.1 Labour input, human capital, and the human resource	61
3.2 The wage rate in equilibrium and out of equilibrium	65
3.3 The wage fund	68
3.4 Towards a modern theory of the wage fund	70
3.5 The human constraint	73
3.6 Wages and employment	76
3.7 Learning	78

4. The Market and the Firm	81
4.1 Institutions and the process of change	81
4.2 Market failure and organizational co-ordination	83
4.3 Optimizing strategies of firms	85
4.4 The firm and the market as substitutes	88
4.5 Organizational design	90
4.6 The co-ordination of production	93
4.7 The market and the firm as complements	96
4.8 Out-of-equilibrium strategies	99
5. Change	106
5.1 Economic dynamics: methods and problems	106
5.2 The equilibrium approach	108
5.3 Endogenous growth	110
5.4 Transitional dynamics	114
5.5 Harrod's knife-edge	116
5.6 The analysis of the Traverse	119
5.7 Path dependence	123
5.8 The sequence 'constraints-decisions-constraints'	126
5.9 The decision process	128
Part II. Analysis: Processes of Change	135
6. Out-of-Equilibrium Modelling	137
6.1 The scope and role of modelling out of equilibrium	137
6.2 The guiding lines	140
6.3 A sequential model	142
6.4 The coherence of the model	152
6.5 Complex dynamics	159
6.6 Cancelling the sequence	164
7. Processes of Change	170
7.1 Changes in technology	170
7.2 Changes in skills	187
7.3 Credit creation	197
7.4 Changes in expectations	206
7.5 Limits to growth	211
8. Rethinking the basic issues	231
8.1 Consumption, investment, and saving	231
8.2 Structure and cycles	235
8.3 Unemployment	239

Contents

ix

8.4 Flexibility and viability	243
8.4 Economic policy	245
8.5 Re-reading the recent 'story' of Western economies	250
Conclusion	259
<i>Appendix: Numerical Simulations Data</i>	260
References	265
Index	275
